SUMMARY.

SUMMARY

OF

THE ADMINISTRATION REPORT OF BURMA FOR THE YEAR 1899-1900.

THE HON'BLE SIR FREDERIC FRYER, K.C.S.I., held charge of the Administration throughout the year under review.

2. The number of Commissioners' divisions and of districts was unaltered. Various changes were effected in district, subdivisional, and township boundaries, and the total number of townships was reduced by one.

Southern Shan States.

3. The year was barren of incident in the Southern Shan States. The people were prosperous, crime was light, and crops were good. Inter-State relations between the different Shan Chiefs were friendly, and good relations were also maintained between Kēngtūng and the French and Siamese territories which lie along its border. Some friction took place on the Kēngtūng-Kēnghūng frontier in consequence of the Kēnghūng officials expelling a Kēngtūng village from territory assigned to Kēnghūng by the Boundary Commission. The *Sawbwas* of two important States, Lawksawk and Mawkmai, died during the year. Slavery was abolished in Kēngtūng. There was no change in the assessment of tribute. The year was one of progress and improvement from a revenue point of view. Almost the whole of the tribute due for the year was collected within the year. The public health was good save for an epidemic of small-pox which ravaged parts of the States. Vaccination grows in popular favour. The agricultural season was good. The rice-crop was above the average and there was little cattle disease. The attendance of patients increased largely at the dispensaries of Hsamōnkhan, Bampôn, and Kēngtūng, but fell off at Taunggyi and Loikaw. The four vaccinators employed in the States performed 4,644 operations against 3,750 in the previous year. A large amount of useful work was done during the year in the improvement of old and opening of new roads, and in the construction of bridges, bazaars, and other works of public utility.

Northern Shan States.

4. Except on the border near Möngmau, and in the neighbourhood of the Wa State of Sônmu, tranquillity was maintained in the Northern Shan States during the year. The disturbances on the Möngmau border were due to raids by Chinese Kachins on the British circle of Selan. The raids were resisted and some lives were lost. The disturbances which occurred on the border of Sônmu were a consequence of the operations of the Burma-China Boundary Commission. These operations excited the hostility of the *Wang* or chief of Sônmu, one of the British border States, and led to attacks by the Was on a British survey party and on the reserve escort of the Burma-China Boundary Commission.

The State of Hsipaw continued to flourish. The administration was in the hand of Saw Hkè for the greater part of the year, the *Sawbwa* being absent in

Rangoon or Mandalay from August to March. The revenue of the year was about Rs. 3,02,000 against Rs. 2,43,000 in the previous year. The expenditure amounted to Rs. 3,17,091 as against Rs. 2,64,374. Large expenditure was incurred on public works. The year was remarkably free from crime. No dacoities occurred and only four murders and three robberies. The sub-States were well administered and were almost free from crime. The State of Tawngpeng was also remarkably free from crime during the year and shows indications of growing prosperity. In Hsenwi population is growing rapidly and the State was almost free from crime. The year was uneventful in South Hsenwi. There is little crime and the State is prosperous. The rainfall was unusually heavy in the Northern Shan States, but in spite of extensive floods the rice crop was one of the best on record and the tea harvest was good. The cultivation of wheat is extending. Trade was impeded by the floods which carried bridges away and rendered roads impassable. Progress was made in the construction of roads in Hsipaw and South Hsenwi. The Kainggyi forest reserve, the first created in the Northern Shan States, was constituted during the year under report.

Other Shan States.

5. In the Shan State of Hsawnghsup there was a change in succession, the *Sawbwa* having died in December 1899. He was succeeded by his brother. The *Sawbwa* of Singkaling Hkamti was invested with his sanad of appointment during the year. The State of Möng Mit was prosperous during the year and crime was very light.

The Chin Hills.

6. No change was made in the administration of the Chin Hills. The principal events were the punishment of those concerned in the abortive rising of April 1899, most of the ringleaders of which died or surrendered, and the disarmament of the southern hills. No open resistance was shown, and 1,362 guns were withdrawn, as well as 88 guns in the Northern Chin Hills. No disturbance occurred on the Upper Chindwin frontier; trade continued to increase. The Pakôkku Chin Hills were also free from disturbance. The garrison remained the same. The men suffered much from fever, and the experiment of keeping detachments at Mount Victoria has so far not proved a success.

The Arakan Hill Tracts.

7. No disturbances occurred in the Arakan Hill Tracts. The usual durbar was held.

The Kachin Hills.

8. The year 1899-1900 was free from disturbance within administered territory. In Bhamo, Myitkyina, and Katha touring on the usual lines was carried out by Civil Officers with satisfactory results. Progress was made during the year with the erection of permanent boundary pillars along a part of the lately demarcated frontier with China. The most important event in the history of the year was the despatch of an exploring column into unadministered territory and its conflict with Chinese forces at Hpare. The column was sent out in order to collect materials for the demarcation of the Burma-China frontier in the extreme north. The number of criminal cases instituted rose from 222 to 343, and of cases disposed of from 218 to 333. Tribute amounting to Rs. 27,729 was collected without difficulty. Satisfactory progress was made in the construction of roads in hill tracts.

Legislation.

9. Four Acts passed by the Council of the Lieutenant-Governor of Burma became law during the year 1899, namely, Act I (The Burma Gambling Act, 1899); Act II (An Act to amend

the Burma Ferries Act, 1898); Act III (An Act to amend the Burma Military Police Act, 1887); and Act IV (The Rangoon Police Act, 1899). During the year 1899 several other Bills were under the consideration of the Local Government; of these, two were introduced during the year 1900 and have since become law, namely :—

(i) The Burma Vaccination Law Amendment Bill; and

(ii) The Rangoon Water-works Act Amendment Bill.

The Upper Burma Towns Regulation was amended by Regulation II of 1899; and the Caste Disabilities Removal Act, 1850, was extended to the whole of Upper Burma, except the Shan States, under the provisions of the Scheduled Districts Act, 1874. The General Clauses Act, 1897, and the Upper Burma Forest Regulation, 1898, were declared applicable to members of a hill tribe in a hill tract under the provisions of the Kachin Hill Tribes Regulation, 1895 and to Chins in the Chin Hills under the provisions of the Chin Hills Regulation, 1896. Under the provisions of the last named Regulation, Section 31 of the Upper Burma Land and Revenue Regulation, as amended by Regulation III of 1898, was also declared applicable to Chins in the Chin Hills.

Police.

10. There was a slight increase of 88 officers and men to the civil police force during the year of report. While the military police force remained practically unaltered, there was a considerable decrease in the strength of the Railway Police. The conduct of the Civil police is reported to have been generally good. The most noticeable features of the year were the increase of cognizable crime of the less serious kind and the falling off in the number of dacoities and robberies. The forms of crime which most largely engaged the attention of the police were cattle thefts and serious hurt cases. The efficiency of the police was maintained, and they were assisted in a most satisfactory manner by headmen and villagers. The percentage of illiterate men in the Civil Police Force was 18·17, as against 20·98 in the previous year, and there was a general improvement in the training of the force. The total number of true cognizable cases disposed of during the year was 39,593, against 37,786 in the previous year. Crime increased under each class heading, the most serious increases being those under Classes II and III. There was an increase of 488 in the number of ordinary thefts, but the value of the property stolen was considerably lower than in the previous year. There were 33 fewer dacoities and 38 fewer robberies than in the previous year. Detection improved in cases of the kind classed as "violent crime" and the number of cases in which firearms were used fell from 81 to 34. There were 3,442 cattle-thefts in 1899 as compared with 3,300 in 1898.

Proceedings were instituted under the preventive sections of the Criminal Procedure Code in 4,703 cases or 566 more than in the previous year, and 3,863 persons were ordered to furnish security as against 3,280 in 1898, the percentage rising from 79 to 82. The number of registered criminals and pardoned offenders under police surveillance at the end of 1899 was 18,642 as against 17,725 at the end of the previous year.

Railway Police.

11. The strength of the Railway Police was reduced by 50 men and the force was redistributed. Its efficiency remained unimpaired and in spite of the extension of the railway line under supervision there was a decrease of cognizable crime and a most satisfactory improvement in its detection.

Military Police.

12. In the Military Police the reduction of the Lower Chindwin (subsequently the Karen) Battalion by two companies was counterbalanced by additions to the Toungoo and Mandalay Battalions. The number of British officers serving with the force remained unaltered. The total number of casualties was 480, or nearly 100 more than in the previous year. This large increase was mainly due to a severe epidemic of cholera in the Karen Battalion at Toungoo and Mônywa. The conduct of the Karen Battalion at Mônywa was a blot on the record of the year. Six men were convicted of a disgraceful mutiny and riot in which British officers were wounded, and as a result of the trial and of a departmental enquiry a large number (including three Native officers) were dismissed from the force. The battalion has been broken up and the companies composing it have been distributed over other battalions.

Rangoon Town Police.

13. The Rangoon Police Act, 1899, came into force on the 15th June 1899. The Town force was on the whole well disciplined and administered. Cognizable crime increased, but detection was good. Violent crime was normal, with the exception of the occurrence of a case of *thuggi*.

Supply and Clothing.

14. The Department of Police Supply and Clothing continued to work on the same lines as in the previous year. The net expenditure was Rs. 45,062 less than in the previous year but the average number of men rationed was smaller. The system of local purchase of rice by Battalion Commandants was tried in the Chin Hills.

Criminal Justice.

15. The total number of cases instituted during the year was 77,856 as compared with 70,571 in 1898. Of this large increase the Magistrates' Courts in Rangoon contributed some 6,200 cases; while in Upper Burma there was an increase of 1,007. The increase in Rangoon was due to an increase in the number of petty cases under the Police and Municipal Acts, and under special and local laws. The percentage of true cases to the total number instituted rose in Upper Burma and fell slightly in Lower Burma outside Rangoon. The percentage of convictions was 60·60 in Lower Burma, and 69·94 in Upper Burma. There was an increase in the number of persons proceeded against under Chapter VIII of the Code of Criminal Procedure in Lower Burma, and a considerable decrease in Upper Burma. The percentage of convictions was 80·18 and 74·46 respectively. There was an increase in the number of Sessions cases, but the percentage of convictions was less than in 1898. The number of appeals rose in both Upper and Lower Burma. In Upper Burma the percentage of sentences left untouched was less than in 1898; in Lower Burma it rose slightly. In both Upper and Lower Burma more cases were called for and dealt with on revision than in the previous year.

Jails.

16. The jail population at the commencement of the year (12,190, of whom 12,072 were males and 118 females) was somewhat less than at the beginning of 1898 (12,886, of whom 12,750 were males and 136 females). The year's admissions (27,989, of whom 27,023 were males and 966 females) were greater than in 1898 (26,789, of whom 25,832 were males and 957 females). There were 16,917 direct commitments. No new jails were opened and none were closed during the year, but by stricter measurement and re-classification the accommodation of some jails has been increased, while that of others has been decreased. Of the 16,917 convicts com-

mitted during the year, 3,895 or 23·02 per cent. had previous convictions, 1,372 of these having been previously convicted more than once. Habitual offenders numbered 3,459 compared with 3,181 the previous year. Four prisoners escaped from the Mônywa Jail in April; otherwise there were no escapes. None of these four men were recaptured. The gross cost of up-keep of the jails amounted to Rs. 7,87,598 against Rs. 8,24,871 in the previous year, the cost per head of average strength being Rs. 62-12-4 against Rs. 65-1-6 in 1898. In calculating the earnings of the Jail Press during the past year for the present report, the method of calculation which has been recently prescribed has been adopted. No comparison can therefore be made with the earnings of the Press in previous years. It appears, however, that the amount of work done was the largest in the history of the Press. If the Jail Press earnings are excluded, the cash earnings of convicts sentenced to labour have sunk from Rs. 2,18,884 in 1898 to Rs. 1,93,745. Including the earnings of convicts employed in the Jail Press the net earnings of convicts were Rs. 3,33,093. The ratios of admissions to hospital and of deaths per mille of population were 583·65 and 18·73 in 1899 compared with 619·48 and 20·60 in 1898. There were 90 boys remaining in the Reformatory School at Insein on 31st December 1898: 35 were admitted during the year and 27 discharged.

Civil Justice.

17. The number of regular suits instituted in Burma during the year 1899 was 54,257 as compared with 51,075 in 1898. The increase was common to both Lower and Upper Burma. The total value of suits rose in Lower Burma from Rs. 66,43,460 to Rs. 70,23,224, and in Upper Burma from 14,40,219 to Rs. 14,74,404. The average duration of suits in Lower Burma remained unchanged. In Upper Burma there was a slight increase. Three thousand six hundred and thirty-four cases were pending at the close of the year. The number of cases in which debtors were imprisoned in execution of decrees rose slightly in Lower Burma and considerably in Upper Burma. There was an inconsiderable increase in the number of regular appeals preferred during the year. The percentage of confirmation rose both in Upper and Lower Burma. The percentage of total costs to total value of original suits was nearly stationary. The aggregate number of civil processes showed a considerable increase. About the same number of courts were inspected as in 1898. Progress was made with the translation of the Burmese Digest of Buddhist Law. An Upper Burma Courts Manual was prepared by the Judicial Commissioner.

Registration.

18. One new office was opened in Lower Burma at Pyuntaza in th e Pegu district. The number of documents registe red in Lower Burma increased by 1,306 while the value rose by Rs. 58,71,076. The average value of documents registered rose from Rs. 1,231, to Rs. 1,451. Receipts and expenditure both rose, the increase in the net surplus amounting to Rs. 3,745. In Upper Burma the number of registrations affecting immoveable property decreasd by 194, while those affecting moveable property rose by 187. There was an increase in the value under both heads of over 4½ lakhs. Total receipts rose from Rs. 14,771 to Rs. 14,929, while expenditure rose from Rs. 8,867 to Rs. 9,322.

Municipal Administration.

19. The opening balance of the Rangoon Municipal Fund on the 1st April 1899 was Rs. 5,33,025. The aggregate receipts for the year amounted to Rs. 30,25,977, and the total expenditure was Rs. 30,68,386. The year closed with a credit balance of Rs.

4,90,616. Ordinary expenditure exceeded the estimate by Rs. 1,17,079. The incidence of Municipal taxes rose during the year to Rs. 5-1-8. The Municipality is not now indebted to Government. The total expenditure on education was Rs. 82,651. The expenditure in the General Hospital was Rs. 1,49,929. There was an increase in the numbers of both births and deaths as registered during the year. The expenditure on Reclamation Works was Rs. 2,39,163. The number of Municipalities in the province was reduced by one, owing to the abolition of the Ramree Municipality, with effect from the 1st September 1899. The number of Municipalities at the close of the year was 41. The limits of the Henzada Municipality were extended, and an area of $4\frac{3}{4}$ square miles was added to the Municipality. Excluding extraordinary debts and credits and debt accounts, the aggregate income of all Municipalities (except Rangoon) amounted to Rs. 20,15,019, compared with Rs. 19,33,284 last year. Receipts from taxation, markets and slaughter-houses accounted for a considerable portion of the increase. Expenditure on public safety in Lower Burma decreased considerably from Rs. 1,52,850 to Rs. 75,199. In Upper Burma the fact that the Mandalay Police charges were for the first time met from Provincial instead of Municipal revenues caused a large decrease under this head of expenditure. Prome is still the only Municipality which possesses a regular water-supply. It is anticipated that a good supply of water at Mandalay will be obtained by means of tube wells which are being sunk close to the river bank. This will be a great boon to the inhabitants, for the present supply is open to contamination. Expenditure on conservancy increased over 5 per cent. The cost of vaccination and registration remained about the same. Less was spent on markets and slaughter-houses in both Upper and Lower Burma. There was a large increase in expenditure on public instruction. The increase was due to the fact that a new school house was built at Prome and a considerable sum was, for the first time, expended on education by the Mandalay Municipality. No loans from Government were sanctioned during the year. Five towns were declared notified areas under the Burma Municipal Act, 1898.

Forests.

20. The aggregate area of reserved forests in Burma was increased during the year from 15,669 square miles to 17,153 square miles, of which 865 square miles were burdened with *taungya* rights. The demarcation of new reserves made fair progress. A party of the Imperial Survey Department was employed in the Tenasserim and Southern Circles. In the former circle one working plans party carried on operations, while two parties were at work in the Southern Circle. Fire protection was carried on over 3,809 square miles, and of this area 3,473 square miles were successfully protected; 39,685,184 cubic feet of timber and fuel were extracted, the figures showing a decline of 10,985,031 when compared with the corresponding figures of 1898-99.* The decrease was most marked under the head of extractions by free grantees. There was a satisfactory increase, under extraction of minor forest produce, of cutch and rubber. The nett forest revenue of the year was Rs. 52,93,766, which was Rs. 6,95,067 less than in 1898-99, but was very considerably above the average of the past five years. Exports of teak aggregated 272,286 tons, the amount being slightly in excess of the exports of the previous year. The price of teak remained much the same.

Commercial Marine.

21. The number of vessels engaged in the seaborne trade of the province was 121 less than in the previous year. The aggregate tonnage, however, has increased. The aggre-

* Figures subject to revision.

gate value of the foreign imports of the year was 487 lakhs, or 67 lakhs less than in the preceding year. The falling off was again due to the large unsold stocks on hand at the end of 1898-99, and also to the advance in prices of articles in the home markets. The value of the foreign export trade of the year was 1,018 or 154 lakhs less than that of its predecessor. The decrease was principally in the shipments of rice, exports to Europe having declined in quantity owing to the abnormal demand for India consequent on the famine. The aggregate value of the coasting trade increased by about 318 lakhs as compared with the previous year chiefly due to the heavy shipments of rice to Bombay. The imports, however, declined, the total value showing a decrease of 19½ lakhs as compared with the previous year, partly due to the general advance in prices and partly to the smaller outturn by the cotton mills in India. The number of shipping casualties in Rangoon pilotage waters was 10, one less than in the preceding year. No serious damage was done except in the collision between the steamers *Camorta* and *Newton Hall*. Two accidents of a minor nature occurred at Bassein. At Moulmein the stranding of the S.S. *Amboina* off Bentinck Island and the grounding of the S.S. *Wraggoe* formed the subjects of enquiry.

The receipts of the Rangoon Pilot fund amounted to Rs. 2,21,094 being a decrease of Rs. 45,551 and the amount paid to the pilots was Rs. 1,45,416 as against Rs. 1,49,283 last year. The total amount of pilotage earned at Bassein during the year was Rs. 18,863, against Rs. 22,132 in the previous year. The establishment of a Pilot fund at Bassein from 1st April 1900 was sanctioned. The receipts of the Rangoon Port Trust Fund increased by Rs. 29,322. Expenditure decreased by Rs. 1,88,058. Expenditure on plague-precautionary measures has increased largely. During the year a quarantine camp was established below King's Point. The rules for the prevention of the importation of plague were strictly observed. Four cases of plague were detected, of which three proved fatal. Lights were erected at Syriam Point, Choki Point, and Deserter's Creek during the year and are said to have facilitated night pilotage on the river. The total income (excluding debt accounts) of the remaining six Port funds amounted to Rs. 2,29,398 and the total expenditure to Rs. 1,84,381.

Military.

22. The total strength of the troops in Burma at the beginning of the year was 12,309, of whom 4,656 were Europeans and 7,653 were natives, the number at the close of the year being 10,324 of whom 2,811 were Europeans and 7,513 were natives. A detachment of Mounted Infantry from the British regiments in Burma took part in the operations in South Africa. The number of efficient volunteers rose from 2,349 to 2,467. The rifle range at Thamaing was completed during the year.

Agriculture.

23. The rainfall in Lower Burma was favourable and the crop heavy. Prices continued high and the cultivator is believed to have sold his crop satisfactorily. The total area under cultivation rose from 6,665,056 to 6,857,898 acres. In Upper Burma the rainfall was good and the season is said to have been the best the Upper Province has enjoyed since the Annexation. Cattle disease was prevalent in some districts. Prices appear to have been lower than in 1898-99 but too much reliance cannot be placed in the figures sent in from districts.

Mines and Quarries.

24. The revival in the ruby market, accompanied by greater activity at the mines, made the year the most successful the Ruby Mines Company has yet seen, and it was

able to declare a dividend of 12½ per cent. There are no indications that the market will fall, and the introduction of improved methods of mining should keep the output high. In the Nanyaseik and Sagyin tracts the production was insignificant. The gold mines at Kyaukpazat produced a slightly higher yield. The cyanide process is to be introduced in them. The output of the Letkôkpin colliery was larger than in 1898. The amber and jade mines suffered from excessive rains and the production diminished. There was again a large increase in the yield of petroleum from the Yenangyat and Yenangyaung fields, which are the chief oil-fields of the province. The total output for Burma was 32,309,531 gallons. A lease of a large area in the tin tract at Maliwun has been given to a European firm, who propose to introduce hydraulic machinery. Several prospecting licenses were given in Katha district, where workable gold is said to occur over a considerable area. Deficiency of the means of communication makes it impossible yet to tap successfully the coal-fields of the Chindwin and the Shan States.

Sea-borne trade.

25. The total value of the seaborne trade amounted in the year of report to over 32⅘ crores, showing a substantial advance of 3⅓ crores or over 11 per cent. on the corresponding figures for 1898-99. The feature of the year's trade was the diversion to Bombay of a large portion of the rice exports, which in 1898-99 went to European Ports. Although the large increase noticeable in exports was to a slight extent reduced by a small falling off in imports the trade of the year was on the whole very satisfactory.

Inland trade.

26. The total volume of trade passing through the 19 stations of Upper Burma and nine of Lower Burma where trade was registered amounted to 307 lakhs against 289 lakhs in the preceding year. Increases were most noticeable in the trade with the Northern Shan States, with Western China and Karenni, while trade with the Southern Shan States, Siam and Zimme showed a falling off.

Public Works.

27. The total Public Works expenditure for the year was Rs. 93,52,264 excluding Establishment, Tools and Plant, Barrack Department and Suspense.

This was distributed as follows :—

	Original works.	Repairs.
	Rs.	Rs.
Imperial military works	2,40,586	3,16,303
Imperial major irrigation works	9,95,608	...
Provincial minor works and navigation	7,68,694	5,55,066
Provincial civil buildings	25,61,248	5,01,798
Provincial communications	10,78,464	15,21,791
Provincial miscellaneous public improvements ...	1,36,229	49,228
Incorporated local minor works and navigation ...	69	2,600
Incorporated local civil buildings	15,165	3,554
Incorporated local communications	2,17,106	1,70,003
Incorporated local miscellaneous public improvements	1,10,215	41,135
Contributions	61,464	5,936
Totals ...	61,84,848	31,67,416

The total cost of establishment, excluding the Barrack Department, was Rs. 17,64,710 or 18·87 per cent. on the total expenditure. The percentage in the previous year was 23·92.

Under *Military* the erection of staff offices at Mandalay was commenced. At Shwebo the conversion of the native infantry barracks into barracks for British troops was completed. At Maymyo the quarters of British officers of the native regiment and barrack accommodation for the native regiment were nearly completed. At Meiktila a pipe water-supply for the troops was taken in hand.

Under the head of Civil Buildings the following were the principal works :—

Forest.—Offices at Papun, Moulmein and Tavoy for the Deputy Conservators of Forests and Vernacular Forest School at Tharrawaddy.

Post and Telegraphs.—Combined Offices at Wuntho and Thatôn were in hand, and also the new Telegraph office at Mandalay.

Administration.—Satisfactory progress was made in the scheme for providing treasure vaults at outlying stations, and record-rooms at headquarters of districts.

Educational.—A school for the sons of Shan Chiefs at Taunggyi, a new college building at Rangoon, and Government Engineering School at Insein were all in hand.

Ecclesiastical.—The foundations of the Memorial Church at Mandalay were started and the cemetery at Shwebo enlarged.

Law and Justice.—Numerous court-houses were under construction, either to meet new requirements or to replace old structures.

Jails.—A large number of improvements and additions were carried out, the most important being extension of the Thayetmyo, Insein, Rangoon, Toungoo, Paungdè, Henzada and Bassein jails, and the construction of a new jail at Myaungmya.

Police.—Thirty-eight thanas were under construction and a large number of other works, mainly new posts and re-construction of lines, were carried out The total expenditure during the year was Rs. 6,28,957.

Medical.—The construction of new hospitals or additions to existing ones were in hand at 11 stations.

Miscellaneous.—Eleven circuit and rest-houses were taken in hand and very good progress made towards the provision of officers' quarters all over the province ; and the work of providing quarters for the Secretariat clerks in Rangoon was continued.

Communications.—Owing to the large demands for police and civil buildings, the funds available for roads were very limited, consequently only 37 miles of metalled roads and 104 miles of roads of other classes were constructed during the year, and 166 miles of roads raised in class.

Markets.—Fifteen bazaars were constructed or enlarged in Lower Burma.

Water-supply.—A pipe water-supply for Maymyo was taken in hand.

Harbours.—The construction of a large number of landing stages in Lower Burma was in hand.

Light-houses.—The more important works were substitution of a new light at Alguada Reef, screw pile beacon at Oyster Reef, and renewing the piles of the China Bakir light-house.

Miscellaneous.—The erection of pillars along the Chinese boundary was in hand.

IRRIGATION.

Pegu and Sittang canal.—Renewal of Myitkyo lock gates completed and improvements to lock chamber were in hand. Masonry regulators across Zwebat and Singyidaing creeks were commenced and part of the left bank of the Pegu river was raised.

Sittang-Kyaikto canal.—Head works at Mopalin and the Supanu weir were completed.

Kyaikto-Bilin canal.—Erosion by the Sittang river continued and all work was suspended.

River conservancy.—Maintenance and improvements were carried out in the Chindwin, Myittha, Yu, Uru, and Yunzalin.

Kyauksè district.—The remodelling of the various canal systems was continued.

Mandalay canal.—The headworks were nearly completed and the Thapangaing aqueduct proceeded with: drainage crossings were continued and some completed. Satisfactory progress was made with earthwork on the main canal.

Railways.

28. The gross earnings for the official year were Rs. 94,93,925 being an increase of Rs. 8,32,927. The increase in net earnings was Rs. 5,63,689. The length of line open to traffic on the 31st March 1900 was 993·2 miles. The Meiktila-Myingyan line was opened for traffic of all descriptions in November, and the Myohaung-Sedaw section of the Mandalay-Kunlông Railway was open throughout the year for goods traffic only. The Sagaing-Alôn branch was nearly ready to open by the end of the year. A heavy flood breached the Mandalay-Kunlông line in 41 places and delayed the opening of the line. The Salween Extension Survey parties were recalled in February owing to the disturbed state of the country. The construction of the Bassein-Henzada-Letpadan line was commenced and further borings were made for the Sagaing bridge over the Irrawaddy.

Telegraphs.

29. A departmental wire was erected from Mandalay to Kalewa. An extra wire was erected on the Akyab-Taungup line, and cables were laid across the Irrawaddy and in the Koladyne in connection with extra wires from Prome and Akyab to Taungup. A new line was constructed along the Railway from Meiktila to Myingyan and a second wire was erected for the Mandalay-Kunlôn and Sagaing-Alôn Railways. A new Government office was opened at Masein in the Upper Chindwin district and combined Post and Telegraph offices were opened at Tharrawaddy, Pazundaung, Myawaddy, Thabyegan and Mudon. The offices at Namkhan and Nanyaseik were closed. The number of telegrams despatched from Government offices increased by 45,782. The total mileage of lines in the Province decreased by 113 and the total mileage of wire increased by 638.

Post Offices.

30. The British India Steam Navigation Company and the Irrawaddy Flotilla Company worked their different contract services satisfactorily. There was no very serious delay in the departure or arrival of mail steamers. The Burma Railways Company opened a branch line from Meiktila to Myingyan, 57 miles, on the 15th Novem-

ber 1899, and mails for the districts of Myingyan and Pakôkku, hitherto sent *viâ* Mandalay and thence by steamer are now sent direct by train, giving an earlier delivery at Pakôkku and Myingyan of about 24 hours.

The following statement shows the mileage and various modes of conveyance of mails in Burma :—

	Railway lines.	Mail cart or pony lines.	Runners and boat lines.	Steamer lines.	Total.
Imperial	979¾	823½	1,156½	5,895½	8,855¼
District Dâk	...	23	1,555½	223	1,801½
Total of 1899-1900 ...	979¾	846½	2,712	6,118½	10,656¾
Total of 1898-99 ...	922¾	825½	2,816	6,054	10,618¼
Increase	57	21	...	64½	38½
Decrease	...	...	104	...	...

The total number of post offices of the Imperial and district dâk establishments in existence at the close of the official year 1899-1900 was 287 or an increase of 11 offices over the figures of the preceding year. The increase was mainly due to the establishment of district *dâk* offices and the development of the district post system, which was extended to Mandalay, Sagaing, Lower Chindwin, Yamèthin, Meiktila, and Kyauksè districts.

The deliveries by the post in the year under review numbered 18,234,797 against 17,417,670 in 1898-99. The increase of 4·7 per cent. is due to natural expansion of business. Out of 14,456,397 letters and postcards, 3,492,866 were in Burmese and Chinese character, *i.e.*, 24 per cent. The total number of letters registered by the post office in Burma was 333,557 against 305,323 of last year. The advantages of postal communications appear to be gradually eliciting the appreciation of the public. Money-orders issued rose from 660,124 to 708,711, or an advance of 7 per cent. Their value rose by 6 per cent. The commission realized was Rs. 3,72,258, against Rs. 3,52,008 in the preceding year, an increase of 5·8 per cent. The number of money-orders paid increased by 7·9 per cent., to 203,447, and in value by 7·8 per cent. Under the orders of the Government of India the system of paying money-orders in sovereigns was introduced into Rangoon from 23rd March 1900.

The value of Post Office Savings Bank deposits paid in in the year of review fell slightly : the number of accounts open at the close of the year rose, however, by 2,386 and the aggregate balance advanced from Rs. 77,11,239 to Rs. 82,61,515.

The total number of combined post and telegraph offices open at the end of the year was 76, against 71 in 1898-99. The business and revenue expanded considerably. Telegraphic messages dealt with by the combined offices increased from 285,200 to 312,159 and receipts rose from Rs. 1,25,845 to Rs. 1,43,511. Of the 76 offices 40 were authorised to receive foreign messages. In addition to the combined post and telegraph offices there were 109 receiving offices on the 31st March 1900, where telegrams can be posted for despatch to the nearest telegraph office for onward transmission by wire.

Sales of quinine by the postal officers were continued and under the orders of the Local Government the price of a dose of quinine powder was increased from 3

to 4 pies. The increase in sale was as much as 5·33 per cent. The number of doses sold was 148,384 against 128,655 of the previous year.

Revenue Survey and Settlement.

31. In Lower Burma an Imperial survey party revised the cadastral survey of 185 square miles in the Bawni circle of Pegu district. Special local staffs were employed in the survey of *potta* grant lands over large areas in several districts. Special local staffs also undertook extension and revision Surveys in several districts. Supplementary survey operations were carried on over an area of 23,860 square miles, as against 22,993 square miles in 1898-99. Revision settlement operations continued in Hanthawaddy, Henzada and Pegu districts. In Upper Burma an Imperial survey party traversed 800 square miles in the Lower Chindwin district and surveyed cadastrally 828 square miles.

Local revision surveys were carried out in three districts. The total area under supplementary survey in Upper Burma is now 11,079 square miles, or 4,052 square miles more than the area returned for the preceding year. This figure, however, includes the area under settlement or summary settlement in Magwe, Sagaing, and Myingyan. Outdoor settlement work was continued in Magwe and concluded in Sagaing. Summary settlements were begun in the unsettled part of Minbu and in Myingyan districts.

Transfers and Tenancies.

32. The number of holdings and the area sold in Lower Burma decreased, whilst the average price per acre rose from Rs. 20·9 to Rs. 23·5. The area mortgaged rose by as much as 35 per cent., whilst the average mortgage rate fell. The area rented rose from 1,459,386 to 1,560,942 acres; nearly 21 per cent. of the whole occupied area is now held by tenants. An experimental Tenancy Bill is under consideration. The area granted for purposes of cultivation under the Land and Revenue Rules rose by 22 per cent. from 55,870 to 68,534 acres. In Upper Burma sales of the right of occupation of State land fell in the year under review. Statistics of tenancies in the Upper Province are as yet meagre. At the close of the year 16,971 acres were held by tenants in Mandalay district. In Kyauksè the area let rose to 13,335 acres.

Land revenue, Lower Burma.

33. In Lower Burma the collections under land revenue proper, fisheries and capitation-tax were Rs. 1,39,27,325, Rs. 20,23,185 and Rs. 43,87,519 against Rs. 1,29,92,244, Rs. 18,79,268 and Rs. 43,00,815 in the preceding year. Remissions of land revenue on account of disastrous floods were higher than in 1898-99. The advance in collections of land revenue proper followed on the introduction of revision settlement rates into two districts and of intermediate rates prior to resettlement in three districts. The total demand from fisheries rose by 8 per cent. The revenue was collected without difficulty and on the whole coercive processes were seldom resorted to.

Land revenue, Upper Burma.

34. The collection of revenue from State land rose from Rs. 15,57,554 to Rs. 19,70,235 or an increase of Rs. 4,12,681, which was due to the assessment to land revenue for the first time of non-State lands in the Minbu and Kyauksè districts, and in the Mandalay division. The number of households assessed to *thathameda* rose from 606,306 to 631,244. Collections fell slightly, from Rs. 58,36,092 to Rs.

58,28,994, owing to the imposition of a lower rate of *thathameda* concurrently with the introduction of the assessment to revenue of non-State lands. The demand of miscellaneous land revenue rose by over one and-a-half lakhs, the greater part of the increase falling under *fisheries* and *petroleum*. In Shwebo, which enjoyed an exceptionally good rainfall, the collection from water-rate rose by Rs. 90,815. Petroleum supplied an increase to the State revenue of more than a lakh of rupees. The revenue under all heads was collected easily and coercive processes were not numerous when it is considered that non-State lands came under assessment for the first time in the year.

Separate revenue.

35. The total revenue from salt amounted in 1899 to Rs. 14,46,209 or Rs. 16,949 less than in the previous year. The gross revenue demand on home-made salt rose by Rs. 13,367 to Rs. 2,38,242, whilst the duty realized on foreign salt fell by Rs. 30,316 to Rs. 12,07,967. The total quantity of salt put on the market rose to 1,840,618 maunds, an increase of 6 per cent. on the figures of 1898. The increase was due, in some measure, to a more liberal and undoubtedly more accurate estimate of the outturn of local salt. The rise in the revenue demand on home-made salt was due to a large increase in the number of earthen pots licensed in Kyaukpyu and Sandoway districts. The importations of foreign salt were larger, but 30,316 maunds less than in 1898 were taken out of bond. It is said that overproduction (apparently of local salt) accompanied by low prices restricted the trade in foreign salt. The prices of foreign salt fell in sympathy with the local article. It is calculated that the composition rate on home-made salt gives an incidence of 6 annas per maund, against one rupee per maund paid on importations. In order to equalize the incidence of taxation on the imported and home-made salt the composition rates have, since the Salt Administration Report was written, been raised by 25 per cent. There was a steady but not extraordinary rise in receipts from stamps in the year under review. The gross stamp revenue amounted to Rs. 19,37,405 being Rs. 1,71,132 or 9·69 per cent. greater than it was in 1898-99. Out of the total increase Rangoon contributed no less than Rs. 1,04,153 or an increase of nearly 19 per cent. The Akyab district shows, on the other hand, a shrinkage of Rs. 17,267. In the Sagaing division also there was a slight falling off. The total expenditure amounted to Rs. 60,187, a slight advance on the figures of 1898-99. The expenditure thus amounted to about 3 per cent. of the gross revenue. The gross revenue of the Excise department rose by Rs. 5,28,154 to Rs. 53,10,221. Of the gross revenue liquor contributed 49·14 per cent. and opium with other drugs 50·86 per cent. The addition of 24 more shops for the manufacture and sale of country fermented liquor swelled the revenue by Rs. 94,599. The average price paid for licenses for the sale of foreign liquor, for the manufacture of country spirit and for the sale of *tari* rose considerably. The gross revenue from opium rose by more than 3½ lakhs, almost the whole of the increase of 15·59 per cent. being referable to better prices realized from license fees. The maximum quantity of opium permitted over the whole province rose from 867¼ maunds to 905 maunds, 276 maunds being allowed for the Upper province. In spite of the efforts of special excise establishments there can be little doubt that the smuggling of opium is rife and the re-opening of the lists of consumers in Lower Burma will doubtless show that much illicit consumption has been going on. Nevertheless fewer offences against the Excise and Opium Acts were detected than in the preceding year.

The total collections under the Income-tax Act rose by Rs. 37,437 to Rs. 10,50,469. "Profits of companies" contributed a little more and "Other sources" a little less than one-third of the net increase. Rangoon Town, Amherst (Moulmein), and Mandalay continued to be the chief centres of collection. The year was one of general prosperity, and it is not clear that the shrinkage in collections in the Thôngwa and Myaungmya districts can be rightly attributed to bad trade. The total cost of collection rose by rather less then 3 per cent. from Rs. 34,508 to Rs. 35,429, whilst the total collections advanced by nearly 4 per cent.

Finance.

36. The gross receipts under all heads in 1899-1900 amounted to Rs. 7,85,24,281 against Rs. 7,81,93,692 in the previous year, showing an increase of Rs. 4,30,589. The expenditure was Rs. 5,13,06,105 in 1899-1900 as compared with Rs. 4,87,97,099 in 1898-99, showing an increase of Rs. 25,09,006. The improvement in the receipts has occurred chiefly under *Land Revenue*, *Stamps*, *Excise*, *Provincial rates*, and *State Railways (gross earnings)*, but the increases under these heads have been to a great extent counterbalanced by the falling off under *Customs*, *Forest*, *Tributes from Native States*, *Police* and *Miscellaneous*. On the expenditure side, the increases in comparison with the previous year occur chiefly under *Land Revenue*, *Forest*, *Law and Justice—Courts of Law*, *Marine*, *Education*, *Medical*, *Political*, *Stationery and Printimg*, *Miscellaneous*, *State Railways (working expenses)*, *Minor Works and Navigation* and *Civil Works*, while there are decreases under *Refunds and Drawbacks*, *Excise*, *Jails*, *Police* and *Military Works*.

Sanitary and Medical Administration.

37. Registration of births and deaths continued to be in force throughout Lower Burma. The registration of deaths was introduced in certain selected districts of Upper Burma during the year. In Lower Burma the birth-rate per mille was 37·04, and the death-rate 27·30 as compared with 34·11 and 26·13 respectively in 1898. The general death-rate for Upper Burma was 21·03, but these figures cannot be relied upon. Fevers continue to constitute the principal cause of death. The question of arrangements for the distribution of quinine continues to receive attention. Two isolated cases of plague were removed from vessels arriving in Rangoon, but the province has so far escaped a visitation in an epidemic form. The number of dispensaries rose from 105 to 110, five new dispensaries being opened. The aggregate number of patients treated was 818,039, of whom 34,749 were in-patients. The corresponding figures for last year were 799,521 and 34,091. The number of beds increased from 2,515 in 1898 to 2,597, of these 56 per cent. were occupied daily on an average. There were 1,800 cases of small-pox treated as compared with 651 in 1898. The increase was due to a serious epidemic which visited Rangoon and the surrounding delta districts at the end of 1898 and the beginning of 1899. There were a number of cases of beri-beri. There was a considerable increase in the total income and expenditure of dispensaries. The total number of railway dispensaries at the end of the year was 14, Mogaung dispensary having been closed during the year. The number of in-patients fell from 201 to 31. The number of police hospitals remained the same. The number of admissions rose from 15,555 to 16,273, while the death rate rose from 10·84 to 17·42. The number of persons vaccinated rose from 466,308 to 490,887. Owing to the inaccuracy of the returns it is unsafe to attempt to form conclusions as to the degree

of protection afforded. In many instances inspection revealed that returns sent in by vaccinators were falsified. The number of vaccinations performed in Rangoon decreased considerably. During the year the Burma Vaccination Law Amendment Act was passed. It is hoped that the provisions of the new Act will result in checking to some extent outbreaks of the disease in Rangoon. Inspection work on the part of native Superintendents was less effective than last year. On the part of Civil Surgeons inspection work was more thoroughly carried out.

Education.

38. The total number of schools in the province rose from 16,331 to 17,050, and the number of pupils under instruction from 270,257 to 287,987, but the number of institutions on the register decreased by 204. Primary schools, Vernacular and Anglo-Vernacular, showed a decrease of 233. The total attendance of all public primary schools increased by 5,191. The number of schools for girls remained nearly stationary, but there was a substantial increase in the number of pupils. Middle Vernacular schools increased from 211 to 235. Collegiate students, High schools pupils, and Middle English scholars remained nearly stationary. The total expenditure on education rose from Rs. 14,54,433 to Rs. 16,07,948, the nett Government expenditure being Rs. 10,83,851 as compared with Rs. 9,68,680 in the previous year. The Educational Syndicate held one general meeting in March 1900. The Executive Committee met on nine occasions. School and college fees amounted to Rs. 43,607-6-0. Burma has as yet no University of its own. There are two colleges, the Rangoon College and the Baptist College. There was a substantial increase in the number of secondary boys' schools, and in the number of pupils. The number of pupils attending girls' schools remained almost the same as in the previous year. The number of pupils attending Primary schools, including pupils in the Primary Departments of Middle and High schools, increased from 136,751 to 143,780. One new Normal school for teachers was opened and the aggregate number of students increased by 44. The number of pupil-teachers employed showed a slight increase. At the Dufferin Hospital 15 pupils completed their course of training in sick nursing and midwifery and passed the required examinations. The attendance of female pupils showed an increase of 4,407. The number of schools attended by European pupils only remained the same as in the previous year, and there was almost no change in the attendance of pupils.

REPORT

ON

THE ADMINISTRATION OF BURMA

FOR THE YEAR 1899-1900.

[*Note.*—In the Burma Administration Report for 1892-93 the following subjects have been treated in permanent form for reference:—

	Pages.
Physical features of the country, area, climate, and chief staples ...	3—6
Historical summary	7—10
Form of administration	10—12
Character of land tenures, system of survey and settlement ...	13—20
Civil divisions of British territory	20—22
Details of last census, tribes and languages	22—25
Legislative authority	43
General system of public instruction	120—125
Literary societies	129
Ecclesiastical jurisdiction	132

In accordance with the orders of the Government of India these chapters are not reproduced in this report.]

I.—PHYSICAL AND POLITICAL GEOGRAPHY.

Changes in the Administration.

THE HON'BLE SIR FREDERIC FRYER, K.C.S.I., held charge of the administration throughout the period under review.

The number of divisions and districts remained the same as last year.

Owing to changes in the current of the deep water channel of the Irrawaddy river it was found necessary to alter the riverine boundaries of the Myaungmya, Thôngwa, Bassein, Henzada, Prome, Tharrawaddy, Myingyan, and Minbu districts. The boundary between the Shwebo and Ruby Mines districts was shifted from the Irrawaddy river to the crest of the Minwun range of hills to the west of the river, thus transferring a strip of country lying between the hills and the river from the Shwebo to the Ruby Mines district. Changes were made in the subdivisional jurisdictions of the Magwe and Meiktila districts without affecting the number or the boundaries of the subdivisions concerned, though the names of the Northern and Southern subdivisions, Meiktila district, were altered to Meiktila and Thazi respectively. In the Mergui district the Ye-E circle was transferred from the Lenya to the Mergui township and at the same time a re-distribution of subdivisional jurisdictions was effected. In the Katha district the tract of country through which the Indaw-Banmauk road runs was transferred from the Mawlu to the Manle township; the headquarters of the latter township were transferred to Indaw, and the name of the township was altered to Indaw. The Magyigôn revenue circle was transferred from the headquarters township of the Meiktila district to the Meiktila township. The villages of Sabè-ashe and Sabè Zaungyangôn were transferred from the Seikpyu to the Pakôkku township of the Pakôkku district. The Bônmadi circle was transferred from the Kyaukkyi to the Tantabin township, Toungoo district. In the Kyauksè district the Paunglaung revenue circle was transferred from the Myittha to the Kyauksè township and a number of circles were transferred from the Singaing to the Kyauksè township. In Yamèthin the Kyidaunggan township was amalgamated with the Pyinmana township and in the Ruby Mines district the Mönglang township was amalgamated with the Möng Mit township. The Nyaunglebin township of the Pegu district owing to its

rapid development was divided into two townships called the Nyaunglebin and Pyuntaza townships. The names of the Paukmyaing and Minzu townships were altered to Dayègaung and Kyauksè respectively. The headquarters of the Hmawbi township in the Hanthawaddy district were transferred from Hmawbi to Insein, and the name of the township was changed to Insein.

Relations with Tributary States and Frontier Affairs.

Southern Shan States.

2. The year under review was barren of incident in the Southern Shan States. The people were prosperous, crime was light, and crops were good. Inter-State relations between the different Shan Chiefs were friendly, and good relations were also maintained between Kēngtūng and the French and Siamese territories which lie along its border. Friendly relations were established between the Political Officer, Kēngtūng, and the French officials on the Mèkong. Some friction took place on the Kēngtūng-Kēnghūng frontier in consequence of the Kēnghūng officials expelling a Kēngtūng village from territory assigned to Kēnghūng by the Boundary Commission. The *Sawbwas* of two important States, Lawksawk and Mawkmai, died during the year. A very satisfactory item of the year's history was the abolition of slavery in Kēngtūng, a step taken by the *Sawbwa* on his own motion on his return from a visit to Burma and Ceylon.

Crime and criminal justice, Southern Shan States.

3. The number of violent crimes reported was 48 against 49 in the previous year. There was a considerable decrease in the Myelat and the Central division. In Kēngtūng 11 crimes were reported against only one last year. The increase indicates that violent crimes are beginning to be reported with some regularity from Kēngtūng. There were no cases of dacoity throughout the cis-Salween States. The administration of criminal justice was very satisfactory in the Myelat. Cattle-theft, which was becoming very frequent, was in great measure suppressed, detection was very good, and the track law was enforced with vigour. The number of cases coming before the Headquarters Magistrate, Taunggyi, decreased by nearly one half. The police force was increased by 12 in order to provide sufficient men for escorts. The conduct of the force was good.

Revenue and General, Southern Shan States.

4. There was no change in the assessment of tribute during the year. Satisfactory progress was made in the direction of bringing the revenue system of Kēngtūng, the most backward of the States, into line with the system of the Southern Shan States generally. In these States the year was one of progress and improvement from a revenue point of view. In the Myelat exemptions were reduced by 1,344 houses, and now amount to a little more than 20 per cent of the total number of houses. In the other divisions the percentage is higher. Almost the whole of the tribute due for the year was collected within the year. The public health was good save for an epidemic of small-pox which ravaged parts of the States. It is reported that the people are in favour of vaccination in the parts in which it is practised. The agricultural season was good. The rice crop was above the average and there was little cattle disease. The attendance of patients increased largely at the dispensaries of Hsamönkhan, Bampôn, and Kēngtūng, but fell off at Taunggyi and Loikaw. Changes and imperfect qualifications in the *personnel* appear to be causes of the diminished popularity of the last-mentioned dispensaries. The four vaccinators employed in the States performed 4,644 operations against 3,750 in the previous year. The percentage of successful cases fell from 86·80 to 75·81. A large amount of useful work was done during the year in the improvement of old and opening of new roads, and in the construction of bridges, bazaars, and other works of public utility. A good beginning was made with the construction of roads in Kēngtūng.

Northern Shan States.

5. Except on the border near Möngmau, and in the neighbourhood of the Wa State of Sônmu, tranquillity was maintained in the Northern Shan States during the year. The disturbances which occurred on the border of Sônmu were a consequence of the operations of the Burma-China Boundary Commission. The Commission reached Sônmu territory during the year of report, and as Sônmu is the British frontier

State in these parts, it was necessary to ascertain its eastern boundary. The action taken with this object aroused the hostility of the *Wang*, or chief, of Sônmu and led to attacks on a Railway survey party and on the camp of the Reserve escort of the Burma-China Boundary Commission. The disturbances near Möngmau consisted of cattle raids by Chinese Kachins on the British circle of Selan. On two occasions the raiders were resisted by force and a few lives were lost.

Hsipaw.

6. The State of Hsipaw continued to flourish. The administration was in the hands of Saw Hkè for the greater part of the year, the *Sawbwa* being absent in Rangoon or Mandalay from August to March. The administration of Saw Hkè was energetic and on the whole efficient, his zeal in road-making being especially commendable. The revenue of the year was about Rs. 3,02,000 against Rs. 2,43,000 in the previous year. Of the increase Rs. 24,000 is nominal. The balance, Rs. 35,000, was contributed by most sources of revenue, and indicates the rapid growth of wealth and population. The expenditure of the year amounted to Rs. 3,17,091 against Rs. 2,64,374 in the previous year, and thus more than kept pace with the increase of revenue. The increase was contributed mainly by salaries and pensions (about Rs. 9,000), the *Sawbwa's* privy purse (about Rs. 11,000), and public works (about Rs. 31,000). The year was remarkably free from crime. No dacoities occurred and only four murders and three robberies. The sub-States were well administered and were almost free from crime.

Other States in the Northern Shan States.

7. The State of Tawngpeng was remarkably free from crime during the year. The increase in population, the settlement of Chinese in the State, and the extensive construction of monasteries are all indications of growing prosperity. In Hsenwi also population is growing rapidly owing to the return of old inhabitants and the immigration of new settlers from China. The State was almost free from crime but little progress was made in the improvement of the Revenue Administration. A step was taken towards the restoration of the *Sawbwa's* authority over the Kachin circles by the arrangement that certain circles should pay their tribute to a State official. A British officer toured through the Kachin circles during the year collecting tribute and settling cases. The condition of the circles is on the whole satisfactory, but, in some of those bordering on China, frontier-raids and cattle-thefts are frequent. Practically the whole of the tribute due from the Kachin circles was collected during the year. The year was uneventful in South Hsenwi. There is little crime and the State is prosperous. The *Sawbwa* deserves credit for his exertions to carry out public works. East Manglün was undisturbed during the year, and it is satisfactory to learn that there is some prospect of peaceful relations being established between the *Sawbwa* and his Wa neighbours. The tribute of West Manglün was fixed at the nominal sum of Rs. 500 for the quinquennial period 1898—1902.

General, Northern Shan States.

8. No durbar was held in the Northern Shan States during the year. The rainfall was unusually heavy, with the result that extensive floods occurred in many parts. Nevertheless the rice crop is reported to have been one of the best on record. The tea harvest also was good, and the cultivation of wheat is extending. Trade appears to be increasing but was much impeded by the heavy floods which carried bridges away and rendered roads impassable. Progress was made in the construction of roads in Hsipaw and South Hsenwi. The Kainggyi forest reserve, the first created in the Northern Shan States, was constituted during the year under report. When the railway reaches Hsipaw, the forests in the State will no doubt be worked extensively and measures for conserving them will become necessary. The number of out-patients treated at the Lashio hospital was 4,871, being a slight increase on the figures of the previous year. The number of in-patients nearly doubled. A new civil dispensary was built at Kutkai by public subscription and 1,317 out-patients were treated in it. Two new dispensaries established at Hsipaw and Pyaunggaung. The number of vaccinations performed was 3,347, or 500 less than last year. The percentage of successful cases was small, a result which is attributed to the inferior quality of the lymph. The States suffered severely from cattle-disease during part of the year.

States under the control of Commissioners.

9. The Shan States of Hsawnghsup and Singkaling Hkamti were free from disturbance during the year. There was a change in the succession in the former State, the *Sawbwa* having died in December 1899. He was succeeded by his brother, the *Kyamaing*, Saw Tun, the late *Sawbwa's* son (since deceased) being debarred by his crimes from succeeding his father. The *Sawbwa* of Singkaling Hkamti was invested with his sanad of appointment during the year. The State of Möng Mit continued to be administered as a subdivision of the Ruby Mines district. The revenue amounted to Rs. 1,03,557 against Rs. 1,21,296 in 1898-99, the expenditure to Rs. 1,24,605 against Rs. 92,524. The apparent reduction in receipts was due to the fact that arrears of tribute were paid in 1898-99. The increase in expenditure was due to an increase in the strength of the civil police and to the employment of military police in the Kodaung throughout the year. The State was prosperous during the year and crime was very light.

The Chin Hills.

10. The principal events of the year in the Chin Hills were the punishment of those concerned in the abortive rising of last year, and the disarmament of the southern hills. In June an attack was made on the village of Rumklao which had taken a principal part in the rising of the previous month. Owing to unavoidable circumstances, the attempt to surprise the village was only partially successful, but it no doubt contributed materially to the surrender of the ringleaders. In July and August all the ringleaders died or surrendered. Ten of them were convicted under section 121 of the Penal Code and were sentenced to death or transportation for life. The sentences of death were commuted by the Lieutenant-Governor in consideration of the fact that the condemned men had surrendered. Suitable fines amounting to Rs. 3,670 in all were imposed on the villages which joined in the rebellion.

In the end of October operations were begun for the disarmament of the southern part of the Chin Hills by parties working in co-operation with parties employed on similar duty in the Lushai Hill Tract. In pursuance of these arrangements, disarmament was carried on in the Haka, Tlantlang, and Yôkwa country. Rumours were current from time to time of intended risings and resistance on the part of the Chins, but no open resistance was shown and 1,362 guns were withdrawn. In the Northern Chin Hills 88 guns were withdrawn in the vicinity of the Manipur frontier. The five extra companies of military police which were employed on disarmament duty returned to Burma in May.

Tribute.

11. Tribute to the amount of Rs. 8,792 was collected against Rs. 17,791 in 1898-99. The large falling off was due to the remission of tribute throughout the Northern Chin Hills. This concession was made as a reward for the readiness shown by the tribes in surrendering guns.

The Upper Chindwin frontier.

12. The year was uneventful in the Chin Hills bordering on the Chindwin. Some petty cattle thefts occurred, the work of Chins from beyond the administrative frontier. Trade continues to increase.

The Pakôkku frontier.

13. The Chin Hills Tract on the Pakôkku frontier was free from disturbance. No raids, no murders, and no serious violent crimes occurred. There was no change in the constitution of the garrison. Mindat Sakan, the headquarters of the Hill Tract, is unhealthy, and there was much sickness in the garrison. Proposals for transferring the headquarters to Mount Victoria were under consideration, and detachments of police were stationed at two sites as an experiment. The experiment was not successful, as the men suffered from fever and had to be withdrawn. The ill-health from which the men suffered was probably due to lack of warm clothing and sufficient shelter rather than to the unhealthiness of the sites. Both the Commissioner and the Superintendent advocate the garrisoning of this tract by Gurkhas, as possessing a constitution well adapted to a cold, damp climate. Sanction was given during the year to the entertainment of a force of 17 Chin Police, who are armed with Sniders and are employed in enforcing the orders of the Superintendent. Rupees 1,462 were collected as tribute, and no arrears were outstanding at the end of the year.

The Arakan Hill Tracts.

14. The Chin Tracts on the Arakan border were free from disturbance during the year. The usual durbar was held.

The Kachin Hills.

15. The year under review was free from disturbance within administered territory. In Bhamo, Myitkyina, and Katha touring on the usual lines was carried out by Civil Officers with satisfactory results. Progress was made during the year with the erection of permanent boundary pillars along a part of the lately demarcated frontier with China.

The most important event in the history of the year was the despatch of an exploring column into unadministered territory and its conflict with Chinese forces at Hparé. The column was sent out in order to collect materials for the demarcation of the Burma-China frontier in the extreme north.

Six violent crimes, of which four were unimportant, occurred in the Bhamo district. The two remaining crimes were raids. In one the guilty have been punished; in the other they have not yet been brought to justice. In the Myitkyina district 13 violent crimes occurred. Seven were the work of transfrontier criminals whom it was impossible for our officers to arrest. Of the other cases the most important was the outcome of superstition. A family of one tribe was suspected of causing death among another tribe by sorcery. Branches of the family were therefore attacked in four villages, four persons were killed, and eight were carried off as slaves. The locality was visited by the Deputy Commissioner in January and suitable punishment was inflicted. No violent crimes occurred in the Katha Hill Tracts.

The number of criminal cases instituted rose from 222 to 343, and of cases disposed of from 218 to 333. The increase was due to the fact that more villages were visited than in the previous year. The cases were for the most part disputes arising out of feuds. Section 13 of the Kachin Hill Tribes Regulation, which provides for fining villages which assist criminals, was enforced in 18 cases against 11 in 1898-99.

The tribute collected during the year amounted to Rs. 27,729 against Rs. 26,369 in the previous year. The increase was contributed by all three districts. No difficulty was experienced in collecting tribute. Satisfactory progress was made with the registration of guns in the Myitkyina district and a few guns were withdrawn. The progress made in the construction of roads in hill tracts is very satisfactory and is creditable to the officers concerned.

The general condition of the frontier tracts is satisfactory.

II.—ADMINISTRATION OF THE LAND.

Surveys, Settlements, and Waste-lands (Lower Burma).

Surveys.

16. The town and civil station of Toungoo were demarcated in preparation for survey. The municipal lands of Ngathainggyaung were similarly dealt with, and the Bawni circle of Pegu district, comprising an area of 152 square miles, was demarcated afresh, the original demarcation having proved defective. A detachment of No. 7 Party of the Survey of India Department revised the cadastral survey of 185 square miles in this circle, and also completed the survey of Toungoo town and civil station. Special staffs were employed in the survey of *potta* grant-lands in the following districts:—Hanthawaddy, Pegu, Tharrawaddy, Thôngwa, Myaungmya, Amherst, and Mergui; 25,331 acres were dealt with in Hanthawaddy, 14,174 in Thôngwa, and 13,048 in Pegu. Much of the large area dealt with by this agency in Pegu consisted of accretions along the Sittang estuary. In most cases the survey fees credited paid for the establishments entertained. Special staffs were engaged in Pegu, Thatôn, Thayetmyo, Myaungmya and Tavoy on extension surveys, undertaken in areas beyond those already under supplementary survey. The area surveyed in Thatôn was 45 square miles, of which more than one-third was under cultivation. In Myaungmya 118 square miles were cadastrally surveyed; 36 per cent. of the area was under cultivation. The remaining area of 68 square miles will be dealt with in 1901-02. Ngathainggyaung, Zalun, and Lemyethna towns were surveyed on a large scale. Sixty-five of the 176 leased fisheries of Tharrawaddy district were demarcated and 32 re-surveyed. Forty-two fisheries were surveyed in Hanthawaddy. One hundred and ten square miles of the Yitkangyi and Kamasè fuel reserves were surveyed during the year, and 123 square miles of forest land in Pegu district. Final orders have not yet been passed in respect of these areas. Revision surveys within areas under supplementary survey are assuming large proportions and add very considerably to the cost of the operations. Although 896 square miles were re-surveyed during the year there remain 2,572 square miles (10·78 per cent. of the total area under supplementary survey) which are said to require re-survey. The area shown last year was only 1,362 square miles, but this year Thôngwa appears as a new entry with 1,589 square miles against it. Most of this consists of land newly brought under cultivation, where only the exterior boundaries of holdings were plotted and interior field details have never been attempted. Floods are also said to be responsible for many changes requiring resurvey. There remains, however, a considerable area in several districts where slackness of the Land Records staff has allowed work to get into such arrears that a special staff has now to be employed to bring the survey up to date. Survey of town lands was continued in Rangoon, Bassein, and Prome, and in Moulmein the tenure enquiries are approaching completion.

Settlements.

17. Six hundred and seventy-nine square miles in the Toungoo district were brought under regular settlement for the first time. The new rates were notified in June 1900 and will, it is expected, give an increase in revenue of Rs. 1,80,945. Revision settlement operations continued in the Hanthawaddy, Henzada, and Pegu districts. Six hundred and thirty-six square miles were dealt with in Hanthawaddy, 937 square miles in Henzada, and in Pegu the area contained in the original programme was completed. Reports on the field operations of 1898-99 were received from Pegu and Henzada, while from Hanthawaddy was received the report of 1897-98.

Soil classification was revised in Kyaukpyu with a resulting small increase of revenue.

Supplementary survey.

18. Supplementary survey operations were carried on in the year of review over an area of 23,860 square miles, or an increase over the previous year's revised figures of 867 square miles. The greater part of the increase is due to the introduction of the survey for the first time in 744 square miles of the Nyaunglebin subdivision of Pegu district. The total cost of supplementary survey, including charges for supervision, amounted to Rs. 5,77,404, as against Rs. 5,50,334 (revised figures) in the previous year. This does not include the cost of special revision surveys. Each district now has a Superintendent of Land Records, and the total number of Inspectors has risen to 72. Inspectors checked 51 per cent. of the total of 14,209 *kwins* falling within the tracts under supplementary survey.

Survey schools.

19. The number of Government Survey schools remained 13. The average daily attendance and the average time spent by each pupil under tuition rose. The survey teachers are well reported on. The results of the Syndicate examination were not, however, so successful as might have been expected from this, and the percentage of passes fell from 83 in 1898-99 to 71. The nett average cost of the schools was Rs. 1,589 each, against Rs. 1,798 in the previous year. One hundred and twenty-five qualified students obtained appointments during the year, and the extension of survey will make it easy for passed students to obtain suitable employment for several years to come.

Transfer of land.

20. The number of holdings and the area sold decreased, whilst the average price per acre rose from Rs. 20·9 to Rs. 23·5. On the other hand, the area mortgaged rose by as much as 35 per cent. The average mortgage rate fell from Rs. 24 to Rs. 21. Redemptions increased by 7 per cent. In Hanthawaddy the area of land sold diminished by 14,877 acres, and the price per acre rose from Rs. 25 to Rs. 29. The same tendency is noticed in Pegu and in almost every other district. It is attributed to the good harvests which have raised the value of agricultural land and thus rendered it more easy to effect mortgages.

Tenancies.

21. The area rented during the year was 1,560,942 acres, or nearly 21 per cent. of the total occupied area, against 20 per cent. in 1898-99. The average tenant-holding is 15 acres; the average rent per acre has fallen slightly to Rs. 8·15. Suits for ejection fell from 180 to 53. The Deputy Commissioner of Tharrawaddy writes that in spite of the checks imposed the land is steadily coming into the hands of non-agriculturists. The number of long-term tenancies is generally increasing. An experimental Tenancy Bill, drafted with a view to checking abuses of their rights by landlords, is under consideration. Cash rents are not yet looked upon with favour, the proportion of the area cash-rented being 3 per cent. only of the whole area rented.

Grants of land.

22. The area granted for purposes of cultivation under the Land and Revenue Rules rose by 22 per cent., from 55,870 to 68,534 acres. Pending cases were fewer than at the close of 1898-99. In Hanthawaddy this result was brought about by employing a larger number of surveyors: surveys took less time and the cases were more quickly disposed of. The area granted in Hanthawaddy is still large, and in Pegu it has risen from 7,100 to 11,581 acres, mainly on account of the accretions in the Kamasè circle. A special grant Myoôk was appointed in Thôngwa, and similar appôintments will be made in Pegu and Myaungmya.

Surveys, Settlements, and Waste-Lands (Upper Burma).

Demarcation and survey.

23. Five hundred and sixty-six square miles of culturable land were demarcated in Lower Chindwin district, and 570 square miles re-demarcated, owing to unsatisfactory demarcation in the preceding year. No. 7 Party of the Survey of India traversed 800 square miles in Lower Chindwin district, and surveyed cadastrally 828 square miles. The cost was Rs. 187 per square mile.

Settlement.

24. Outdoor settlement work was continued in Magwe during the year, and in Sagaing the operations were concluded. The report, which is of unusual length, is now passing through the press. The settlement staff has subsequently moved on to Shwebo. Orders have been passed on the Meiktila Settlement Report. The anticipated increase in the revenue is 20 per cent., but this will be reduced for the present by imposing a lower rate of *thathameda*. The additional tenure enquiry was continued in this district. This work has been unusually protracted. The settlement operations in Yamèthin were continued and inspection showed that much useful work had been done. Summary settlements were begun in the unsettled part of Minbu district and in Myingyan district. The work in the first case has now been completed and rates have been sanctioned since the close of the financial year. In Myingyan very satisfactory progress was made under the supervision of the Deputy Commissioner. Summary settlements have also been ordered in the Pakôkku, Thayetmyo, and Chindwin districts, where regular settlements cannot be introduced for some time to come. Local revision surveys were carried out in Pakôkku, Magwe, and Myingyan districts by district surveyors over a total area of 71,331 acres.

Supplementary survey.

25. The total area under supplementary survey in Upper Burma is 11,079 square miles, or 4,052 square miles more than the area returned for last year. This includes the area under settlement or summary settlement in Magwe, Sagaing, and Myingyan. There were noticeable increases in Katha of 73 square miles and in Shwebo of 95 square miles. Of the total cultivated area, 1,006,856 acres are under paddy and 667,450 under miscellaneous crops. The total cost of supplementary survey operations has risen proportionately. The cost per square mile (excluding the districts of Magwe, Sagaing, and Myingyan, which had not at the close of the year come under supplementary survey proper) was Rs 26-11-7. In the preceding year the cost per mile was Rs. 23-11-8. Five officers were added to the supervising staff, which now numbers 10 Superintendents and probationers. The number of revenue surveyors rose to 380. There were several removals and dismissals. The Inspectors' work was well done. Inspection by District Officers compares unfavourably with the quality of the work done by them in Lower Burma. Their inspection was found to be worthless in 109 *kwins* in Upper Burma against four only in Lower Burma. The greater difficulty and intricacy of the work in Upper Burma has, however, to be taken into consideration.

Survey schools.

26. There continued to be seven survey schools, largely recruited, as in former years, from the families of village headmen. The final number of pupils on the roll was 206, or 29 more than at the close of 1898-99. The average daily attendance, however, fell. The survey teachers did good work. The examination is annual and the percentages of passes rose slightly. On the whole the results were rather better than the results of survey education in Lower Burma.

Transfers and partitions.

27. Sales of the right of occupation of State land are not frequent, and fell in the year under review, owing to the restrictions applied to this form of transfer of interest. The price of State paddy land has risen: in Mandalay it was—

	State.	Non-State.
Irrigated	16·53	85·24
Non-irrigated	8·66	33·22

Mortgages of State land are not readily effected.

Tenancies.

28. Statistics of tenancies are as yet meagre, and in most districts figures are not available. The whole area let to rent-paying tenants in Mandalay amounted at the close of the year to 16,971 acres. In Katha 1,403 acres were let during the year. In Kyauksè the area let to tenants rose to 13,335 acres. Cash-rents are not in favour, except in Mandalay, where 4,620 acres are let on this system. Rents of State and non-State land do not appear to vary much, the higher rent being paid

for the former. Non-agriculturists are not a numerous class, except in Minbu, where they hold an area of 51,890 acres against 79,268 acres held by cultivators.

Grants and leases of land.

29. The area leased for cultivation again fell off, the figures for this year and for 1898-99 being 9,761 and 11,236 acres. Pakôkku, Sagaing, Upper Chindwin, and Myitkyina show notable decreases, whilst in Shwebo and Kyauksè the area leased rose.

III.—PROTECTION.

Legislation.

30. Four Acts passed by the Council of the Lieutenant-Governor of Burma became law during the year 1899, namely, Act I (The Burma Gambling Act, 1899); Act II (An Act to amend the Burma Ferries Act, 1898); Act III (An Act to amend the Burma Military Police Act, 1887); and Act IV (The Rangoon Police Act, 1899). These Acts have been described in the Administration Report of the preceding year during which they had been introduced before the Council.

During the year 1899 several other Bills were under the consideration of the Local Government; of these two were introduced during the year 1900 and have since become law, namely,—

I.—The Burma Vaccination Law Amendment Bill; and

II.—The Rangoon Water-works Act Amendment Bill.

The Burma Vaccination Law Amendment Bill.

31. The reasons for the introduction of the Bill to make further provision for compulsory vaccination in Burma are explained in the following extract from the Statement of Objects and Reasons of the Bill:—

"The attention of the Local Government has been drawn to the public danger arising from the dissemination of small-pox by migratory coolies, who, it is alleged, catch the disease in Burman villages and bring it to Burman towns. These coolies furnish a large percentage of the cases in Rangoon, where the disease is always more or less prevalent, and periodically approaches an epidemic stage. The Vaccination Act, 1880, which authorizes the compulsory vaccination of children in Municipalities and Cantonments, contains no similar provision in respect of adults, and the Local Government has been urged by the Rangoon Municipal Committee and other public bodies in that town to obtain the necessary powers to check the evil.

"2. It is proposed by the present Bill to supplement the powers held under that Act by giving to the Health Officers of the Municipality and Port of Rangoon, and of such other municipalities and ports as it may seem advisable to the Local Government, power—

(*a*) to vaccinate forthwith any unprotected person who comes in a vessel on which small-pox has occurred;

(*b*) to vaccinate forthwith any unprotected inmate of a lodging-house or coolie-barrack; and

(*c*) to serve notice on any unprotected person to be vaccinated within seven days.

"3. The special provision against the inmates of lodging-houses and coolie-barracks is rendered necessary by the migratory habits of such persons which might enable them to elude the provisions requiring vaccination after notice; and seven days is considered a more suitable period, within which to require the submission to vaccination after a notice, than the fifteen days allowed in Calcutta. In other respects the powers given by the Bill are similar to powers exercised in Calcutta under the Bengal Vaccination Act, 1880."

The clauses giving power to vaccinate, on arrival, all unprotected passengers of a vessel on which there was a case of small-pox were struck out in Select Committee, because the power was considered open to the objection which had been successfully urged against the proposal to provide for the vaccination of coolies *en masse* on arrival at a Burma port. It was feared that the vaccination of even a single ship-load of coolies might give rise to absurd rumours on the Madras side, might suddenly arrest immigration, and might in consequence do serious injury to the trade and agriculture of Burma. With these alterations the Bill subsequently became law.

The Rangoon Water-works Act Amendment Bill.

32. The Bill to amend the Rangoon Water-works Act, 1884, was introduced on the representation of the Rangoon Municipal Committee. Its object was to reduce the water-rates and to lighten their incidence on the poorer classes.

The necessity for this alteration of the law is fully explained in the following extract from the Statement of Objects and Reasons:—

"1. The Rangoon Municipal Committee have represented to the Local Government that they have not freely exercised the power, under sub-sections (*2*) and (*3*) of section 8 of the Rangoon Water-works Act, 1884, to provide meters and charge occupiers of houses for water consumed in excess of the quantities allowed under sub-section (*1*), because the quantity allowed free of further charge is so small as to make a rigid enforcement of the section unjust to the poorer tax-payers except in flagrant cases of waste. The water-rate is 4 per cent. on the rental value of a house, and under the section as it now stands a house would require a rental of Rs. 25 per mensem to enable it to receive free of further charge 1,500 gallons a month or 50 gallons a day, which is considered the minimum quantity required for domestic purposes for an average family of five persons, whilst as a matter of fact more than half the houses in Rangoon are assessed at a lower rental.

"2. The Committee consider that the quantity allowed free of further charge should be 3,000 gallons for each rupee paid for water-tax, instead of the 1,500 gallons now allowed, so as to allow the full 50 gallons a day to a house rented at Rs. 12-8-0 a month, and that a like quantity of water or its equivalent, 4,550 gallons a quarter, should be allowed free of further charge to occupiers of houses paying a lower rental than Rs. 12-8-0 a month, on whom the payment of further charges to obtain an adequate supply would be a heavy burden. They also consider that the further charge, under sub-section (*3*) of section 8, for water consumed *for domestic purposes* in excess of the quantity allowed, should be, as in Calcutta under section 155 of the Calcutta Municipal Consolidation Act, 1888, one rupee for 3,000 gallons instead of the one rupee for 1,500 gallons now chargeable under the Rangoon section.

"3. The Committee have further stated that large quantities of water are wasted every day in Rangoon, especially in the hot season when water famine threatens, and that it has now been decided to use the above power more freely in order to check this waste and to obtain an anticipated large increase to the meagre revenue heretofore collected for the consumption of excessive quantities of water."

33. The following Acts affecting Burma were passed by the Governor-General in Council during the year:—

I.—An Act to amend the Indian Marine Act, 1887.
[The Indian Marine Act (1887) Amendment Act, 1899.]

II.—An Act to consolidate and amend the law relating to Stamps.
[The Indian Stamp Act, 1899.]

IV.—An Act to provide for the exemption from the operation of municipal building laws certain buildings and lands which are the property, or in the occupation, of the Government and situate within the limits of a municipality.
[The Government Buildings Act, 1899.]

V.—An Act to further amend the Indian Evidence Act, 1872.
[The Indian Evidence Act, 1899.]

VI.—An Act to amend the Indian Contract Act, 1872.
[The Indian Contract Act Amendment Act, 1899.]

VII.—An Act to further amend the Inland Steam-vessels Act, 1884.
[The Inland Steam-vessels Act (1884) Amendment Act, 1899.]

VIII.—An Act to consolidate and amend the law relating to the importation, possession, and transport of petroleum and other substances.
[The Indian Petroleum Act, 1899.]

IX.—An Act to amend the law relating to Arbitration.
[The Indian Arbitration Act, 1899.]

X.—An Act to amend the law relating to Carriers.
[The Carriers Act, 1899.]

XI.—An Act to further amend the Court Fees Act, 1870.
[The Court Fees Amendment Act, 1899.]

XII.—An Act to amend the law relating to the forgery of currency-notes and bank-notes.
[The Currency-Notes Forgery Act, 1899.]

XIII.—An Act to consolidate and amend the law relating to Glanders and Farcy.
[The Glanders and Farcy Act, 1899.]

XIV.—An Act to further amend the Indian Tariff Act, 1894.
[The Indian Tariff Amendment Act, 1899.]

XVII.—An Act to further amend the Indian Registration Act, 1877.
[The Indian Registration (Amendment) Act, 1899.]

XVIII.—An Act to amend the Land Improvement Loans Act, 1883.
[The Land Improvement Loans (Amendment) Act, 1899.]

XIX.—An Act to provide for the conversion into British Indian currency of sums expressed in British currency in the Army Act.
[The Currency Conversion (Army Annual) Act, 1899.]

XX.—An Act to further amend the Presidency Banks Act, 1876.
[The Presidency Banks Act, 1899.]

XXII.—An Act to further amend the Indian Coinage Act, 1870, and the Indian Paper Currency Act, 1882.
[The Indian Coinage and Paper Currency Act, 1899.]

XXIII.—An Act to provide for the Incorporation of Kirk Sessions of the Church of Scotland in British India.
[The Church of Scotland Kirk Sessions Act, 1899.]

34. The following regulation applying to Upper Burma was enacted during the year:—

II.—A Regulation to further amend the Upper Burma Towns Regulation, 1891.
[The Upper Burma Towns Regulation, 1899.]

Act extended to Upper Burma.

35. The Caste Disabilities Removal Act, 1850 (XXI of 1850), was extended to the whole of Upper Burma, except the Shan States, under section 5 of the Scheduled Districts Act, 1874 (XIV of 1874).

Enactments extended to Chins and Kachins.

36. The General Clauses Act (X of 1897) and the Upper Burma Forest Regulation (V of 1898) were declared applicable to members of a hill tribe in hill tract under the proviso to section 3, sub-section (*2*), of the Kachin Hill Tribes Regulation (I of 1895) and to Chins in the Chin Hills under the proviso to section 3, sub-section (*2*), of the Chin Hills Regulation (V of 1896). And under the same provision of the latter regulation, section 31 of the Upper Burma Land and Revenue Regulation (III of 1889) as amended by the amending regulation (III of 1898) was declared applicable to Chins in the Chin Hills.

Police.

General observations.

37. The most noticeable features of the year were the general increase of cognizable crime and the falling off in the number of dacoities and robberies. The forms of crime which most largely engaged the attention of the police were cattle thefts and serious hurt cases. The efficiency of the police was maintained, and they were assisted in a most satisfactory manner by headmen and villagers. A new edition of the Police Manual was completed during the year, and a Military Police Manual was in course of compilation. A new family pension scheme for gazetted officers of the civil police was brought into force.

Constitution and cost of the force.

38. There was a slight increase of 88 officers and men to the civil police force during the year of report. Considerable additions were made to the Hanthawaddy, Tharrawaddy and Amherst district forces, while a reduction of 74 constables was effected in Pakôkku. The strength of the force was maintained more nearly at the sanctioned figure than in the previous year, and the total cost of the regular force was higher by nearly Rs. 70,000 than in 1898, while local and private forces cost somewhat less than in that year, and there was a large decrease in the cost of the railway police.

Recruiting and conduct of men.

39. The total number of dismissals, removals, and departmental fines and punishments during 1899 was 2,314 as compared with 2,184 in the previous year; but the conduct of the police is reported to have been generally good and the number of rewards, departmental and magisterial, shows a most satisfactory increase. A comparison of rewards with punishments is most favourable to the conduct of the men in Thatôn and Amherst, and least favourable to the Tharrawaddy and Yamèthin forces. No

rewards were given in Thôngwa or Mergui, while in Bhamo 93 per cent. of the force were rewarded either departmentally or by Magistrates. Desertions were most numerous in Amherst, and nearly 20 per cent. of the actual force resigned without pension or gratuity in the Salween, Mergui and Pakôkku districts. On the 1st January 1900 the actual police force of the province was 4·3 per cent. below the sanctioned strength. In Mandalay (96), Pakôkku (61), and Amherst (56) the deficiency was considerable.

Training and education of the force.

40. The percentage of illiterate men in the civil police force was 18·17. The figure for the preceding year was 20·98. Six thousand seven hundred and forty-seven old constables were trained during the year, and 4,824 or 71 per cent. passed the qualifying test. The requisite number of men were trained in most districts; but in Amherst, owing to the difficulty of bringing men in from distant frontier posts, this was found impossible. The results of the training were on the whole very satisfactory, but in Minbu more than 90 per cent., and in the Ruby Mines more than 70 per cent. of the men trained failed to qualify. A larger number of recruits were trained and a larger proportion (67 per cent.) passed from the depôt than in the previous year, but an unduly large proportion were again untrained. The results of the quarterly examinations of constables and of the musketry course were satisfactory, and it may be said that there was a general improvement in the training of the force.

Buildings.

41. Except in Kyaukpyu and Magwe, police buildings are reported to be in a satisfactory condition. During the year under report a general scheme for the disarmament of police-stations was decided upon, under which none but thoroughly defensible stations will be supplied with firearms, and the risk of arms being stolen will be much reduced.

Cognizable crime.

42. The total number of true cognizable cases disposed of during the year is returned as 39,593, and that of the previous year as 37,786. During the year 1899 crime increased under each class heading, the most serious increases being those under Classes II and III. In Class II there is no sign of abatement in the number of stabbing cases. In many districts this form of crime, which was commented on at length in the Resolution on the Report of 1898, has attained very serious proportions. The Deputy Commissioner, Tharrawaddy, reports that clasp-knives were used in nine murder cases, 12 theft and robbery cases, and 41 cases of hurt; and under the head "Hurt by dangerous weapon" there were large increases in the Prome, Mergui, Thayetmyo, Sagaing, Pakôkku, and Henzada districts. There was a satisfactory improvement in the Bassein, Thôngwa and Myaungmya districts, which from the district reports appears to be due to the infliction of severer sentences in the Court of Sessions. The most noteworthy point in connection with Class III is the increase in the various forms of house-trespass and serious mischief. Henzada shows a large increase of 93 cases under these two heads. There was an increase of 488 in the number of ordinary thefts, but the value of the property stolen was considerably lower than in the previous year. The largest number of cases during the year occurred in Tharrawaddy, and the most considerable increase in Henzada. On the average detection was equally successful as in 1898. Of the districts with a heavy tale of crime, Mandalay, Thôngwa, Myaungmya, Prome and Bassein did well, Tharrawaddy improved, but in Hanthawaddy and Pegu the results of the working of the police were unsatisfactory.

Dacoities and robberies.

43. The decrease in violent crime is one of the most satisfactory features of the report of 1899. There were 33 fewer dacoities and 38 fewer robberies than in the previous year. A larger proportion of the cases brought to trial ended in conviction, and the number of cases in which firearms were used fell from 81 to 34. In only five districts were there more than five dacoities, and on the whole the crime was not of such a serious character as in the previous year. The only organized gang of dacoits, which troubled the Bassein and Myaungmya districts, was broken up and a revolver recovered. Many instances of gallant action on the part of villagers are recorded, and the detection of violent crime shows a considerable improvement, especially in the Myaungmya and Thôngwa districts. The pacification of the Pa-an subdivision

of the Thatôn district since the death of the notorious Mutupa, and the good work of the police elsewhere, have effected a great improvement in that district. Petty highway robberies were still numerous in Lower Burma. In many districts constant patrolling has had a good effect in checking this form of crime.

Cattle-thefts.

44. There were 3,442 cattle-thefts in 1899 as compared with 3,300 in 1898. Tharrawaddy, which was already far the worst district in this respect, shows a further increase of 155 cases, but the total number of cattle stolen was less than in 1898. There were nearly 100 more cases in Prome and Henzada than in the previous year. Magwe, also a notorious district for cattle-thieves, shows an increase of 31 cases, while Hanthawaddy, Thayetmyo and Shwebo improved. The percentage of convictions to true cases dealt with was one per cent. higher than in 1898, and the number of cattle recovered was considerably larger than the number recovered in that year. Detection was bad in Tharrawaddy and Magwe and in several other districts, but good in Minbu, Thôngwa and Myaungmya.

The preventive provisions of the law.

45. There were 4,703 prosecutions under the preventive sections of the Criminal Procedure Code, or 566 more than in the previous year, and 3,863 persons were ordered to furnish security as against 3,280 in 1898, the percentage rising from 79 to 82. In view of the general increase of crime (other than crime of the most serious kind) there can be no doubt that this increase was justified. These provisions of the law were vigorously worked in the criminal districts of Tharrawaddy and Henzada, where the high proportion of persons placed on security appears to show that the powers were not abused. In Akyab, Bassein, Thayetmyo, the Lower Chindwin, and Myingyan there were considerably fewer proceedings than in the previous year.

The number of registered criminals and pardoned offenders under police surveillance at the end of 1899 was 18,642 as against 17,725 at the end of the previous year. In several districts nearly half the total number of registered criminals were in jail at the end of the year. The supervision of criminals appears on the whole to have been thorough. There were fewer absconding offenders during 1899 and a larger proportion were arrested than in the previous year. The police were again very successful in the identification of old offenders.

Beat patrols.

46. The system of beat patrols appears on the whole to have been successful, though fewer cases were brought to light by their agency than in the previous year.

Relations between the police and village headmen.

47. Headmen of villages are reported generally to have given every assistance to the police, and it is a safe inference from this fact that the relations between police and villagers are satisfactory. Their co-operation in the Thatôn district is reported to have been of great assistance in preventing cattle theft. A large number of rewards were given to individual headmen and villagers who on several occasions displayed conspicuous gallantry.

Railway police.

48. The strength of the Railway police was reduced by 50 men and the force was redistributed during the year under report. Its efficiency remained unimpaired, and in spite of the extension of the railway line under supervision, there was a decrease of cognizable crime and a most satisfactory improvement in its detection. The Railway police were particularly successful in dealing with thefts. There were no murders and only three robberies during the year, and the most important crime committed on the railway, a case of *datura* poisoning, was well detected. The offender was ultimately convicted and executed on a similar, but more serious charge, in Rangoon.

Strength and constitution of the military police.

49. The total sanctioned strength of the military police force was nearly the same as in the previous year. The reduction of the Lower Chindwin (subsequently the Karen) Battalion by two companies was balanced by additions to the Toungoo and Mandalay Battalions. The Upper Chindwin Battalion, having suffered severely from sickness, was almost entirely replaced by companies transferred from Mônywa, whither the Karen Battalion was transferred from Toungoo and the

Ruby Mines. Several other alterations were made in the caste composition of various battalions. The number of British officers serving with the military police remained unaltered. The actual strength of the military police was less than 300 below the sanctioned strength on 1st January 1900, and there was no difficulty in obtaining recruits of all classes. Sanction was given to the enlistment of a second company of Kachins for the Bhamo Battalion. The purchase of 50 mules as permanent transport for the Chin Hills Battalion was sanctioned during the year, as an experiment, the hire system having proved costly and unsatisfactory.

Health and conduct of the men.

50. The total number of casualties in the military police was 480, or nearly 100 more than in the previous year, the percentage rising from 2·56 to 3·27. Thirty more men were invalided and nearly 80 more died in Burma than in 1898. The Karens suffered severely from cholera both in Toungoo and the Chindwin, and the first effect of the climate of Lower Burma on the debilitated men transferred from the Upper Chindwin was disastrous. There was much sickness amongst the men serving in Katha and on the Mandalay-Kunlôn Railway. The percentage of men admitted to hospital was slightly lower than in the previous year. It was highest in the Northern Shan States and Ruby Mines Battalion. Double furlough was sanctioned for the latter battalion during the year.

Conduct of the force.

51. The number of resignations and desertions shows a satisfactory decrease. It was still high in the Bhamo, Toungoo and Myitkyina Battalions. The transfer of the Karen Battalion to Upper Burma appears to have reduced the tendency or opportunity to desert. The conduct of this battalion at Mônywa was a blot on the record of the year. Six men were convicted of a disgraceful mutiny and riot in which British officers were wounded, and as a result of the trial and of a departmental enquiry, a large number (including three Native officers) were dismissed from the force. The battalion has been broken up and the companies composing it have been distributed over other battalions.

A very successful punitive expedition across the administrative border was carried out at the end of the open season of 1898-99 by a column selected from the Myitkyina Battalion, which also provided the force required to accompany Mr. H. F. Hertz, C.I.E., on an expedition despatched to explore the northern watershed of the Salween and the 'Nmaikha. The Reserve escort of the Burma-China Boundary Commission during the season 1899-1900 was provided by the Bhamo and Myitkyina Battalions. The escorts of Civil officers on tour in the Kachin Hills were as usual supplied by the military police, and in the Chin Hills the disarmament operations kept the greater part of the battalion in the field throughout the open season.

The Bhamo Battalion was inspected both by the Lieutenant-General Commanding the Forces, Madras, and by Major-General Sir E. H. Collen, K.C.I.E., C.B. The latter also inspected the Myitkyina, Mandalay and Rangoon Battalions, and the Major-General Commanding Burma District inspected the Myitkyina Battalion.

Rangoon Town Police.

Rangoon Town Police.

52. The Rangoon Police Act came into force on the 15th June 1899. The percentage of men punished departmentally was high (36 per cent.) in comparison with the provincial figures of 1898 (20 per cent.). This is no doubt due to the closer supervision exercised over the Town Police. Nearly one-third of the departmental rewards fell to officers. The Commissioner of Police has now at his disposal a Reward fund, into which all fines are paid. The high percentage of illiteracy it attributed by the Commissioner to the enlistment of a poorly educated class of natives of India.

The return of cognizable crime shows a very large increase under Class VI and a considerable increase in Class V. There was a general improvement in detection. The increase of thefts is probably not susceptible of any particular explanation, and it is observed that detection in crimes of this class has more than kept pace with the growth in the number of offences. The decline in the number

of house-breaking cases is a matter for congratulation, especially as very few of the cases that did occur were real burglaries. The rise in the number of cases under sections 406—409 is attributed by the Commissioner to the reluctance of complainants to carry the prosecution to a conviction when there is a chance of recovering the money said to have been embezzled. Violent crime was normal. No firearms were used in robberies and there were no dacoities The petty robberies were well dealt with, and two dangerous criminals habitually concerned in this form of crime were disposed of, but the most important robbery was undetected. Three out of four murder cases ended in conviction, and the execution of the three principals in the *thuggi* case will, it is hoped, put an end to a species of crime hitherto unknown in Burma. The number of excise prosecutions declined, but opium-smuggling increased, and, though detection in this direction improved, it is doubtless the case that the principals often escape. The new Gambling Act was found to be useful in Rangoon. There were eleven seizures of unlicensed revolvers. The licensing and registration of firearms are now in the hands of the Commissioner of Police.

There was one important prosecution under section 121-A which ended in acquittal, and a large increase in Classes IV and VI. The increase in the former class is not explained. The complaints appear to have mainly related to petty cases under sections 352, 355, and 358 of the Penal Code, and from the fact that 154 cases of this kind were compounded it may be inferred that the figures do not represent any increase in serious crime.

The preventive sections of the Criminal Procedure Code and of the Rangoon Police Act appear to have been carefully worked. The co-operation of ward headmen and the efficiency of beat patrols are closely connected with each other. Both seem to have been secured to a satisfactory degree. The river police have done much useful work during the year, though the Commissioner complains that they are not sufficiently mobile.

Criminal Justice.

Offences reported.

53. The total number of cases instituted during the year was 77,856 as compared with 70,571 cases in 1898. Of this large increase the Magistrates' Courts in Rangoon contributed some 6,200 cases; the figures for Lower Burma outside Rangoon remained almost stationary, while in Upper Burma there was an increase of 1,007 cases. The increase in Rangoon was almost entirely due to an increase in the number of petty cases instituted under the Police and Municipal Acts and under special or local laws. There was also an increase of 239 in cases affecting the human body. These cases increased by 134 in Upper Burma, while offences against property decreased by 322. In Lower Burma, on the contrary, the former class of offence decreased by 153, while the latter increased by 658. This increase was most noticeable in the Irrawaddy and Tenasserim divisions. A marked rise of 1,120 occurred in the number of offences under the municipal laws and section 34 of the Police Act in Upper Burma, for which Mandalay was chiefly responsible. In the previous year there was a similar rise of 1,280. In Lower Burma there was a considerable diminution in the number of offences against public officers, including false evidence.

True and false cases.

54. Seventy-two thousand nine hundred and seventy-five cases were returned as true compared with 65,539 cases in 1898. The percentage of true cases to the total number instituted rose in Upper Burma and fell very slightly in Lower Burma outside of Rangoon. Excluding Arakan, where the cases reported were too few to enable any reliable conclusion to be formed, the percentage was highest in Mergui, Thatôn, and Pegu and lowest in Toungoo and Meiktila.

Disposal of cases.

55. There were four more stipendiary Magistrates in Lower Burma than in 1898, and one more in Upper Burma. The number of cases tried by Magistrates of all classes fell in Lower Burma from 38,555 to 38,131, and rose in Upper Burma from 16,399 to 17,297. The number of cases tried by District Magistrates fell by 71 in Upper Burma and 31 in Lower Burma.

In Lower Burma the number of cases tried by District Magistrates under their special powers declined from 705 to 650. There were fewer sentences reversed or modified by the Judicial Commissioner, while the number of convictions was considerably larger. In Upper Burma District Magistrates tried rather fewer cases than in 1898; convictions were more numerous, but the number of cases in which sentences were modified or reversed rose from 17 to 28.

The work done by Honorary Magistrates, including Benches and Special Magistrates in Lower Burma, was less than last year. In Upper Burma the volume of their work increased considerably, especially in Mandalay, where they disposed of no less than 4,007 cases. All the authorities concurred in commending their usefulness and the care which they bestowed on their duties.

The average duration of cases in Lower Burma was 12 days as compared with 11 days in 1898. It was highest in Mergui and Myaungmya and lowest (Northern Arakan excepted) in Pegu and Thôngwa. In Upper Burma the average duration was six days against seven days in 1898. In Meiktila, Magwe, and Pakôkku it was 11 days, while in Mandalay the average duration remained, as in the previous year, as low as three days.

Proportion of convictions.

56. The percentage of convictions was 60·60 in Lower Burma and 69·94 in Upper Burma as compared with 60·92 and 67·40 respectively in 1898. Attention was drawn to the necessity for more careful examination of complainants under section 200, Criminal Procedure Code, which would probably result in a considerable raising of the percentage of convictions by the elimination of frivolous or vexatious charges where no offence has been committed.

The preventive sections.

57. There was a slight increase in the number of persons proceeded against under Chapter VIII of the Criminal Procedure Code in Lower Burma, and a considerable decrease in Upper Burma. The percentage of convictions was 80·18 in Lower Burma and 74·46 in Upper Burma. The Judicial Commissioner considered that sufficient care was not exercised by the subordinate Magistracy in granting sanction to prosecutions for bad livelihood.

Punishments.

58. Nineteen thousand three hundred and forty persons were convicted in Upper Burma against 17,139 in 1898. The number of sentences of whipping fell from 867 to 746. Fewer sentences of simple imprisonment were inflicted, while fines without imprisonment were more frequently imposed than in 1898; the percentage of such punishments was necessarily greatest in Mandalay. Some use was made of the provisions of section 562, Criminal Procedure Code.

In Lower Burma, outside Rangoon, the number of punishments fell from 35,808 to 35,173. There was a slight increase in the number of sentences of whipping. Solitary confinement was ordered in 23 more cases than in the previous year.

One thousand two hundred and thirty-nine habitual offenders were reconvicted in Lower Burma and 321 in Upper Burma. There was a considerable decrease in the amount of fines imposed in Lower Burma and an increase in Upper Burma. The percentage of realizations was 86 in Lower Burma and 81 in Upper Burma. There was a satisfactory increase in the amount of compensation awarded in Upper Burma. The punishments inflicted by the Courts of Sessions call for no special comment.

In the Rangoon Courts the total number of persons punished rose from 13,289 to 16,425. The increase was wholly due to the greater amount of work done by the Honorary Magistrates, who convicted 12,455 persons, all but one of whom were sentenced to fine without imprisonment. The work of the Cantonment Magistrate declined considerably.

Sessions Courts.

59. Thirty-one cases were committed to the Court of the Recorder of Rangoon, sitting as a Court of Sessions, compared with 17 cases in 1898. Two cases were struck off, five persons were sentenced to death, 16 to rigorous imprisonment, and 11 were acquitted.

In the other Sessions Courts of Lower Burma 413 cases were committed for trial as against 370 in 1898. There were 718 persons involved as against 662 in the previous year. The percentage of convictions dropped from 73·49 to 68·94, while the average duration of cases rose from 38 days to 42. The percentage of convictions was lowest in the Minbu division (*i.e.*, cases from Thayetmyo district) and highest in the Irrawaddy division.

In Upper Burma the number of committals decreased from 77 to 73, though the number of persons committed rose from 110 to 120. The percentage of convictions was much lower than in the previous year, the figures being 65·71 and 78·13 respectively. The average duration of cases rose from 32 to 42, chiefly on account of the high average of duration in the Minbu division.

Appeals.

60. Four thousand nine hundred and sixteen appeals were preferred to Courts in Lower Burma as compared with 4,643 in 1898. The increase was most marked in the Pegu division, where the Additional Sessions Judge disposed of 1,247 appeals as against 963 the previous year. There was a satisfactory improvement in the percentage of sentences left untouched, which rose from 71·42 to 75·26. The duration of cases averaged 14 days compared with 16 days in 1898.

In Upper Burma 1,330 appeals were preferred, being 13 more than in the previous year. District Magistrates heard fewer appeals and Sessions Courts more. The average duration of cases was the same as in the previous year, 12 days. The percentage of sentences left untouched fell from 68·17 to 64·74. As in the previous year the Court of the District Magistrate, Bhamo, had the lowest percentage, 14·29, but only 7 appeals were presented to this Court. In Magwe the sentences were reversed in 48 cases out of the 60 disposed of. The average duration of cases was 12 days as in 1898.

Revisions.

61. Forty-four cases came before the Recorder on revision. The sentences inflicted on 15 persons were reversed, and in 6 cases they were modified. Six cases were referred under section 438, Criminal Procedure Code. The Court of the Judicial Commissioner, Lower Burma, had 292 cases so referred as compared with 285 in 1898. Of the 541 persons concerned in the latter cases sentences were reversed in 237 cases and reduced in 97 cases, while 22 had their sentences enhanced. Cases referred by the District Magistrate, Prome, and the Additional Sessions Judge, Pegu, were more frequently interfered with than those of other Courts. Rather more cases were called for by the Judicial Commissioner, Lower Burma, on his own motion and a larger number were left pending than in 1898. In Upper Burma the number of cases referred under section 438 remained the same as in 1898. One hundred and eighty-nine persons out of 422 had their sentences reversed and 42 reduced. The number of cases called for by the Judicial Commissioner was 302 more than in the previous year. In more than 90 per cent. of the cases the orders were not interfered with. The Judicial Commissioner considered that the work of Magistrates of all classes was very fairly well done, and that few unjust, illegal, or disproportionate sentences escaped correction.

Miscellaneous.

62. Six juvenile offenders were sent to the Reformatory School from Upper Burma during the year; of these 3 were sent from Mandalay. The number of processes issued in Lower Burma declined very slightly. In Upper Burma there was an increase of 6,501. The number of witnesses examined in Lower Burma rose by 13,941, while in Upper Burma there was a decline of about 2,000.

Jails.

General statistics.

63. The jail population at the commencement of the year (12,100, of whom 12,072 were males and 118 females) was somewhat less than at the beginning of 1898 (12,886, of whom 12,750 were males and 136 females). The year's admissions (27,989, of whom 27,023 were males and 966 females) were greater than in 1898 (26,789, of whom 25,832 were males and 957 females); the aggregate number increased slightly from 39,675 (of whom 38,582 were males and 1,093 females) to 40,179 (of whom 39,095 were males and 1,084 females). The daily average number of all classes decreas-

ed from 12,672 (of whom 12,539 were males and 133 females) to 12,547 (of whom 12,416 were males and 131 females), and was smaller during 1899 than in any of the four preceding years. The number discharged (27,219, of whom 26,264 were males and 955 females) was also less than in 1898 (27,485,of whom 26,510 were males and 975 females). The year closed with a larger jail population (12,960, of whom 12,831 were males and 129 females) than that with which it opened. The number of direct commitments has increased from 16,312 in 1898 to 16,917, and the number admitted by transfer from jails in the province has also risen. The returns of transfers to other jails or transportations beyond seas were also slightly more numerous than in 1898, though the figures for both years are much less than for previous years. The large number of literate prisoners is as usual remarkable.

Accommodation.

64. No new jails were opened and none were closed during the year, but by stricter measurement and re-classification the accommodation of some jails has been increased, while that of others has been decreased. The figures are shown in the margin. The net result is a decrease of 229 in the total accommodation compared with the previous year. As noted above the daily average strength of all classes was 12,416 males and 131 females, while the capacity of all the jails of the province was 13,913 for males and 375 for females. Overcrowding was therefore only local and occasional, and was easily relieved.

	+ 77	Net decrease	229

The system of separation of prisoners at night by the use of Donaldson's cubicles was tried in the Rangoon Jail. The experiment was not considered satisfactory.

It was decided in September last that the extension of the Ma-ubin Jail should be held over for the present, while the work of increasing the jail at Myaungmya, so as to accommodate 500 prisoners, was pushed on. It is intended eventually to extend the latter jail so as to provide accommodation for 1,000 prisoners. The jail which has been sanctioned for Pegu has not yet been begun, nor has the work of converting the Paungdè Reformatory into a jail been completed. The extension of the Bassein Jail was almost finished at the close of the year.

Judicial.

65. Of the 16,917 convicts committed during the year, 3,895 or 23·02 per cent. had previous convictions, 1,372 of these having been previously convicted more than once. The percentage of previous convictions last year was 24·50. The percentage varied from 38·46 in the Toungoo Jail to 5·93 at Bhamo. The number of prisoners committed to jail under the preventive sections of the Criminal Procedure Code (2,836) showed an increase as compared with the numbers of the previous year (2,711), but was practically the same as the number committed to jail under these sections in 1897. The number of youthful offenders under 15 years of age admitted during the year was 110, of whom 21 had previous convictions; the corresponding figures in 1898 were 68 and 17 respectively. The number of admissions to the Insein Reformatory School was 35 compared with 27 in 1898.

Habitual offenders numbered 3,459 compared with 3,181 the previous year. Of these all but 27 were identified before conviction, and of these four confessed themselves to be habituals. It has been decided for the present to leave the work of identifying criminals by means of finger impressions entirely in the hands of the police, to whom the duty primarily belongs.

Discipline.

66. Four prisoners escaped from the Mônywa Jail in April; otherwise there were no escapes. None of these four men were recaptured. Forty-one thousand seven hundred and seventy-five offences were dealt with by Jail Superintendents and 71 by Criminal Courts compared with 45,353 and 58 respectively the previous year: 91·64 of the

* The status of the Moulmein Jail was lowered from that of a Central to that of a District Jail.

offences dealt with by Superintendents were classed as minor. Major punishments decreased from 4,638 in 1898 to 3,424 in the year under review.

Financial.

67. The gross cost of up-keep of the jails amounted to Rs. 7,87,598 against Rs. 8,24,871 in the previous year, the cost per head of average strength being Rs. 62-12-4 against Rs. 65-1-6 in 1898. The decrease is due to the reduction in the cost of dieting, which was nearly Rs. 40,000 less than in the previous year; the cost per head was Rs. 27-14-2 compared with Rs. 30-11-10 in 1898. Part of this decrease is accounted for by the fact that large stocks of cereals purchased in 1898 were consumed in 1899; another reason for the variation being the increasing productiveness of jail land and gardens.

A new method of calculation was adopted in calculating the earnings of the Jail Press. No comparison can therefore be made with the earning of the Press in previous years. It appears, however, that the amount of work done was the largest in the history of the Press. If the Jail Press earnings are excluded, the cash earnings of convicts sentenced to labour have sunk from Rs. 2,18,884 in 1898 to Rs. 1,93,745. If the earnings of convicts employed in the Jail Press are included, the net earnings were Rs. 3,33,093, the average earnings per head working out to Rs. 67-7-6. The average cost of maintenance was Rs. 62-12-4 per head and the net cost to Government, taking into account the Jail Press earnings, Rs. 4,54,505, or an average of Rs. 36-3-7 per head.

The average number of convicts sentenced to labour daily was 10,620 as against 10,870 in the previous year. Of these, 46·49 per cent. were employed industrially, a slightly higher percentage than in 1898. Gardening operations continued to give most excellent results; the vegetables raised by convict labour supplied all that was required by the jails, except a very small amount, while surplus produce to the value over Rs. 8,000 was sold to the public.

Health statistics.

68. The ratios of admissions to hospital and of deaths per mille of population were 583·65 and 18·73 in 1899 compared with 619·48 and 20·60 in 1898. The decrease is satisfactory. There were 42 cases of cholera, of which 24 were fatal. Moulmein, as usual, was responsible for the greater number. That jail still maintains its unenviable pre-eminence in unhealthiness, the number of admissions to hospital for dysentery alone being 269 out of a total for the whole province of 915. There were even more cases proportionately at Bhamo and the death-rate was higher. The death-rate from all causes was highest at Kindat (153·85 per mille) and Mergui (125·00) while at seven jails there were no deaths during the year.

Juvenile offenders.

69. During the year orders of the Government of India were received on the subject of transferring the management of the Reformatory school at Insein to the Education Department, and the transfer has been carried into effect since the close of the year. There were 90 boys remaining on 31st December 1898: 35 were admitted during the year and 27 discharged. The cost per head of average strength decreased from Rs. 147-0-7 in 1898 to Rs. 136-9-7. The health of the boys was generally good and there were no deaths. A tinsmith instructor was engaged from the 1st April. The question of the most suitable trades to be taught was fully considered by the Reformatory School Committee. It was decided that agriculture and gardening should be the staple industry of the inmates of the Reformatory, and that in view of the small number of boys in the institution it was undesirable to introduce new industries. Of 73 boys discharged during the past three years, only 12, so far as is known, are engaged in the trade which they were taught while in the Reformatory School.

Civil Justice.

Amount and classification of litigates.

70. The number of regular suits instituted in Burma during 1899 was 54,257 as compared with 51,075 in 1898. The increase was common to both Lower and Upper Burma. In the former the total was 40,555 as compared wth 38,157 in the preceding year, while in the latter the figures were 13,702 and 12,918 respectively. In both parts of the province the increase was due entirely to a rise

in the number of suits for money or moveable property. Suits for immoveable property decreased in every important district in Lower Burma except Akyab and Thatôn, and in every district in Upper Burma. Mortgage suits also decreased generally, the only important exception being Hanthawaddy, in which the numbers rose from 60 to 111, being more than one-fourth of the total number of suits of this class in Lower Burma. The total value of suits in Lower Burma rose from Rs. 66,43,460 to Rs. 70,23,224. In Upper Burma the value rose from Rs. 14,40,219 to Rs. 14,74,404. In both cases the increase was due mainly to an increase in the number of suits of small value.

The general increase in the number and value of the suits is no doubt to be attributed to the continued prosperity of the province and to the consequent increasing volume of trade. These causes were, however, counteracted in particular districts by special causes such as partial failure of crops or deaths of cattle, as in Akyab and Tharrawaddy, or outbreaks of epidemics, as in Sandoway and Mergui. The decrease in Bhamo and the corresponding increase in Myitkyina are, no doubt, to be attributed to the fact that the opening of the railway is increasing the trade of Myitkyina to the detriment of the trade of Bhamo. In one or two instances it is to be feared that the general delay in disposing of suits has rendered persons reluctant to bring their claims into Court.

The general decline in the number of suits for immoveable property in Upper Burma was apparently the result of the ruling that Civil Courts have no jurisdiction in cases involving the occupation of State land. In Lower Burma the figures, although they show a considerable decrease from the figures of the previous year, approximate closely to the figures of 1897, and it may, therefore, be inferred that the figures of 1898 were swelled by abnormal causes. In Rangoon the number and value of suits in the Small Cause Court showed a considerable increase over the figures of the previous year.

Disposal of cases.

71. Out of 54,185 disposed of in Burma during the year 10,828 were decided without trial and 25,309 without contest. As regards contested cases judgment was given for the plaintiff in whole or in part in 12,336 or 69 per cent., the corresponding percentage for 1898 being 68.

There was no change in the average duration of suits in Lower Burma, excluding Rangoon. In Upper Burma there was an increase in the average duration of both contested and uncontested suits. There was a marked increase in the duration of suits in the Moulmein court, except on the Small Cause side. The average duration of suits in this court, which was 46 and 20 for contested and uncontested suits respectively in 1896, has been steadily increasing year by year and in 1899 was 123 for contested suits and 82 for uncontested suits, and was with one exception more than double that of any other district in Burma. There was a slight increase in Lower Burma in the number of plaints rejected or returned. In Upper Burma there was a further decline under this head.

To a total of 50 cases referred to arbitration in Upper Burma the Shwebo district contributed 15. The number of compromised cases (210) in this district was also higher than in any district in Burma outside Rangoon, except Thôngwa (313). Three thousand six hundred and thirty-four cases were pending at the close of the year, of which 732 had been pending for more than three months.

Execution of decrees.

72. There were 19,397 applications for execution of decrees before the Courts in Lower Burma, of which 4,770 were in Rangoon. In Upper Burma the number was 5,245. The percentage which proved wholly infructuous was 45 in Lower Burma and 32 in Upper Burma; while the percentage in which full satisfaction was obtained was 37 in Lower Burma and 52 in Upper Burma. The number of attachments and sales of both moveable and immoveable property increased in Lower Burma. In Upper Burma, while attachments of moveable property increased slightly, sales of moveable property and attachments and sales of immoveable property decreased. The number of cases in which the debtors were imprisoned rose slightly in Lower Burma and considerably in Upper Burma.

Insolvency proceedings.

73. In Lower Burma, outside Rangoon, 87 persons applied to be declared insolvent as compared with 95 in 1898, and 42 in Upper Burma as against 27 in that year. Relief was

granted in 39 per cent. of cases in Lower Burma and in 40 per cent. in Upper Burma. In the Court of the Judge of Moulmein petitions under the Indian Insolvency Act increased from four to seven, while in Rangoon the number of applications increased from 86 to 94.

Appeals.

74. The number of regular appeals in the province rose from 4,614 to 4,689, of which 3,016 were in Lower Burma and 1,673 in Upper Burma. Second appeals to the Judicial Commissioners decreased from 438 to 363 in Lower Burma and increased from 287 to 301 in Upper Burma. In Lower Burma outside Rangoon appeals from the decrees of Subordinate Courts to Courts of District Judges and Civil Appellate Judges decreased slightly from 2,042 in 1898 to 1,953 during the year of report. The decrease was common to nearly all districts except Pegu and Thôngwa. In Upper Burma the number of appeals to District Courts was 1,119 as compared with 1,106 in the previous year. There was a considerable increase in the number of appeals in the Lower Chindwin district. The percentage of confirmation increased in Lower Burma from 61·82 to 63·31 and in Upper Burma from 58·7 to 61·6 per cent. In second appeals the percentage of confirmation was 61·1 in Lower Burma and 58 in Upper Burma as compared with 58·9 and 63 respectively in the previous year. The percentage of interference was somewhat high in the case of appeals from some of the Civil Appellate Judges, but on the whole the figures show an improvement over the results of previous years.

There were seven appeals preferred to the Calcutta High Court from the Recorder's decisions in regular cases. Of the appeals pending before the High Court at the beginning of the year one was compromised, five were dismissed, while in two cases the judgment decrees of the Original Court were reversed. Revisions increased from 56 to 71 and the number of reversals was small.

Cost of litigation.

75. The percentage of total costs to total value of original suits was nearly stationary in both Upper and Lower Burma. It was highest in Tharrawaddy (30·75) and Sandoway (30·55) in Lower Burma and in the Lower Chindwin (26·18) in Upper Burma. The average percentage of cost to value in the case of appeals rose from 18 to 20 in Lower Burma and from 21 to 24 per cent. in Upper Burma.

Processes.

76. The aggregate number of *civil* processes issued in Lower Burma exclusive of Rangoon increased from 178,811 to 185,394 and in Upper Burma from 51,996 to 61,037. There was a considerable surplus of receipts over expenditure on the service of civil, criminal, and revenue processes by the combined establishment.

Inspections.

77. There were 235 court inspections in Lower Burma and 288 in Upper Burma compared with 264 and 279 in the previous year. Inclusive of District Courts 141 courts were inspected by Deputy Commissioners in Lower Burma. Commissioners inspected 47 courts and the Judicial Commissioner 19. The amount of inspection work performed by District Judges was fair, but several failed to inspect the courts at their headquarters. Subdivisional Officers appear to have neglected this portion of their duties in many districts. The number of courts which were left without inspection during the year was large. In Upper Burma District Judges inspected 154 courts, Commissioners 51, and Subdivisional Officers 47. The Judicial Commissioner inspected 36 courts.

Miscellaneous.

78. District libraries appear to be generally in good order. Considerable progress was made with the translation of the Burmese Digest of Buddhist Law and portions of it are already passing through the press. An Upper Burma Courts Manual was prepared by the Judicial Commissioner and will be ready for issue by the beginning of next year.

Registration.

79. No change took place in the number of Registration offices in Upper Burma since the close of the previous year. One new office was opened in Lower Burma at Pyuntaza in the Pegu district.

Lower Burma.

The number of documents registered in Lower Burma increased by 1,306, while the value rose by Rs. 58,71,076. Rangoon Town was chiefly responsible for this. The most

important decrease occurred in the number of optional registrations of immoveable property in the Arakan division, which fell from 339 to 287. Sub-Registrars in the Thayetmyo district are reported to neglect their duties. The average value of documents registered rose from Rs. 1,231 to Rs. 1,451. The main increase occurred under the heads of instruments of sale and mortgage, the value of which in Rangoon alone rose from 61 lakhs to 111 lakhs, while some deeds of very large value registered during the year materially contributed to the rise in the average value.

Receipts and expenditure both rose, the increase in the net surplus amounting to Rs. 3,745. In two Sub-Registrars' offices special clerks on fixed salaries were appointed. In each case the amount of work justified the abandonment of the system of payment by fees.

There was a slight improvement in inspection, for the most part in the Pegu and Tenasserim divisions. Several offices were found to be in indifferent order.

Upper Burma.

80. In Upper Burma the number of registrations affecting immoveable property decreasd by 194, while those affecting moveable property rose by 187. There was an increase in the value under both heads of over 4½ lakhs. The principal decrease in the number of documents relating to immoveable property occurred in Kyauksè and Yamèthin districts. There were no optional registrations except in the Meiktila division.

The average value of the property affected by deeds rose from Rs. 546 to Rs. 631, but under most heads it showed a considerable decline.

Total receipts rose from Rs. 14,771 to Rs. 14,929, while expenditure rose from Rs. 8,867 to Rs. 9,322. Almost all offices were inspected during the year; more inspections were performed by Commissioners than by Deputy Commissioners. On the whole, offices were found in good order.

Municipal Administration.

Rangoon.

81. There was no general election during the year, but several changes took place on the Committee owing to resignations of members. The number of members was increased to 25, the additional member being appointed to represent the Rangoon Trades Association. The Municipal Committee met 14 times, and the various sub-committees on 77 occasions during the year. The opening balance of the Municipal fund on the 1st April 1899 was Rs. 5,33,025. The aggregate receipts for the year amounted to Rs. 30,25,977, and the total expenditure was Rs. 30,68,386. The year closed with a credit balance of Rs. 4,90,616. Both receipts and expenditure were in excess of the estimate. The ordinary receipts amounted to Rs. 20,05,993 as against an estimated revenue of Rs. 18,85,600. The excess was chiefly due to an increase under the head of Assessed Taxes, to a larger yield of Miscellaneous Receipts, and to a considerable increase under the Scavenging-tax Fund, owing to increased assessments within the conserved area. Rules rendering licenses necessary for pawn-brokers came into force during the year. The sale of these licenses realized Rs. 11,675. There was a considerable increase under the head of Law and Justice. The receipts from fines under municipal bye-laws rose from Rs. 4,652 to Rs. 10,430, a larger proportion of municipal prosecutions having been dealt with by the stipendiary Magistrates, who are no doubt less inclined to undue leniency in such cases than are the honorary Benches. Receipts from Lighting-tax and Water-tax also show some increase over the actuals for 1898-99. The extraordinary revenue exceeded the estimate by more than 2½ lakhs. Of this, more than one lakh was due to sale-proceeds of lands for reclamation works; and over a lakh under the head of Sale of Block J was not allowed for in the budget estimate. At the time of framing the budget it was not known that the sales of those lands would be resumed during the year. Ordinary expenditure rose from Rs. 14,82,828 to Rs. 16,89,101, exceeding the estimate by Rs. 1,17,079. "Miscellaneous," "Civil Works," and "Water-tax Fund" were the heads under which the estimate was most largely exceeded. Extraordinary expenditure amounted to Rs. 13,79,285, representing an increase of Rs. 10,305 over the amount of the previous year. Charges under the head of Water-tax Fund Loan show a large increase of Rs. 1,74,490, due to the repayment during the year of Rs. 1,75,000, being

the last instalment of the 7 lakhs loan of 1881. More was spent in refunds of security deposits, and there was also the payment of Rs. 30,000 to Mr. Swetenham on account of injuries sustained by him through the negligence of certain Municipal employés. In spite of this, however, the total extraordinary expenditure was below the estimate by Rs. 7,320. The total estimate of ordinary and extraordinary expenditure was exceeded by Rs. 1,09,759. The incidence of municipal taxes rose during the year to Rs. 5-1-8, as compared with Rs 4-15-10 in the previous year. The receipts from *ad valorem* taxes on lands and buildings increased by Rs. 61,144. The Municipality is not now indebted to Government. The loan account shows an indebtedness to the public of Rs. 40,82,500 on the 31st March 1900, as compared with Rs. 43,15,000 at the commencement of the year, Rs. 2,32,500 having been repaid during the year. The interest paid on the outstanding loans amounted to Rs. 2,32,193-12-0 during the year. The amount paid by Government on behalf of the Municipality for schools in Rangoon during 1899-1900 was Rs. 70,500. The total expenditure on education, including the amount of taxes remitted to schools, was Rs. 82,651, as compared with Rs. 74,288 during the previous year. With the development of education, the expense must necessarily increase, and the contribution of the Committee towards education is not yet excessive. The expenditure in the General Hospital was Rs. 1,49,929, as compared with Rs. 1,60,836 in 1898-99. The re-organization of the nursing staff and the appointment of an additional Assistant Surgeon caused an increase of over Rs. 10,000 in the cost of establishment, and there was also an increase in the cost of the diet of patients. The net decrease in the total cost of the Hospital was due to a smaller expenditure under "Works and Repairs." Revised schemes for (1) increasing the accommodation of the General Hospital, and (2) building a new Contagious Diseases Hospital in Rangoon, are at present under consideration. A proposal has been made that the Municipality should surrender so much of the Kandawglay site as is not required for the wash-house scheme in order to set free the eastern portion of the Agri-Horticultural Gardens as a site for the hospital. The matter is at present under the consideration of the Committee. The increase in numbers and improvement in the quality of the nursing staff has doubtless added materially to the comfort and well-being of the in-patients.

There was a slight increase in the number of births registered during the year, and a somewhat larger increase in the number of deaths. There was no epidemic of cholera in Rangoon during the year. The cost of day and night conservancy during the year was Rs. 1,50,017-10-2 and Rs. 75,298-4-1 respectively.

The East Rangoon Rubbish Removal Scheme, put into operation during the year, proved successful, and it was shown that the rubbish could be usefully disposed of with a minimum of nuisance. The expenditure on ordinary Public Works amounted to Rs. 5,71,901, or an increase of Rs. 80,107 over the amount of the previous year. The experiments made in connection with wood paving continued. The expenditure on reclamation works during the year was Rs. 2,39,163, or Rs. 28,337 below the estimate. The equipment of Block H-2, which was commenced in the previous year at the instance of the Local Government was continued. Rupees 81,100 alloted in the budget for the equipment of Block I-1 was mostly used for work on other blocks.

The Committee's scheme of sinking tube-wells as a means of temporarily augmenting the water-supply until such time as the supply from the proposed Thamaing scheme should become available was sanctioned during the year as a temporary measure only, and on the distinct understanding that the necessary arrangements for proceeding with the Thamaing scheme should not thereby be interfered with in any way.

The Bye-laws relating to the licensing of pawn-shops were brought into operation during the year. A certain amount of opposition on the part of existing Chinese pawnbrokers was experienced, as was natural.

Other municipalities. Number of municipalities.

82. The number of municipalities in the province was reduced by one, owing to the abolition of the Ramree Municipality with effect from the 1st September 1899, under the orders contained in Municipal and Local Department Noti-

fication No. 82, dated the 17th July 1899. The number of municipalities in the province at the close of the year was 40. Of these 25 are in Lower Burma, and 15 in Upper Burma. Of the Upper Burma municipalities, all except Mandalay continued to be administered under the Upper Burma Municipal Regulation, 1887. The extension of the Burma Municipal Act, 1898, to Pyinmana town has been approved by the Local Government, and proposals for the revision of its boundaries were, at the close of the year, awaiting the preparation of maps. All the municipalities in Lower Burma are administered under the Burma Municipal Act, 1898.

Alterations of limits.

83. The proposals for extending the limits of the Henzada Municipality, which were made last year, were sanctioned by the Local Government, and an area of $4\frac{3}{4}$ square miles was added to the municipality. The extension was a very desirable one, for a large number of houses are reported to have already sprung up, and there is every reason to believe that, with the opening of the railway, the number of houses will materially increase. Proposals for the extension of the Zalun boundary were under consideration at the close of the year. Since the close of the year proposals for extending the boundaries of the Myingyan Municipality with a view to including land round the railway station were submitted. A notification defining more exactly the limits of the Mergui Municipality was issued. The Kyaikto Committee submitted proposals for the inclusion of Okpo village within municipal limits. These have since been sanctioned. At Toungoo the southern boundary of the municipal area was so altered as to include the land between the old southern boundary and the railway boundary. The boundaries of the Sagaing Municipality were amended.

Meetings.

84. The number of meetings held was largest at Yandoon (28), Gyobingauk (24) and Pegu, Sandoway, Thatôn, and Ngathaing-gyaung-Daunggyi (22 each). The Bhamo Committee again met less often than once a month. Attendance at the meetings was generally good, though the percentage at both Kyauksè and Shwebo is low. The President of the Myingyan Municipality states that the Commissioners show much interest in the town.

Elections.

85. No elections were held except at Henzada and Yandoon. Apparently great interest was shown in a bye-election which took place at Yandoon, for the defeated candidate appealed against the improper exclusion of voters, and on a re-election being ordered by the Commissioner, succeeded in reversing the result of the first election. At Prome sufficient candidates were not nominated to fill existing vacancies. Interest in Municipal elections appears rare and spasmodic except in the large towns.

Population and rate-payers.

86. The population of the municipalities is shown according to the figures of the last census, as it is impossible to make allowance for the increase of population since the census was taken. The Henzada figures have, however, been altered, and the population of the municipality has increased from 19,762 to 26,845 owing to the alteration in boundaries referred to above. The percentage of rate-payers to population at Henzada shows a decrease (17·40 to 14·51). This is due to the fact that a large number of the houses in the recently included portion are not liable to Frontage-tax. The Committee have now passed a resolution to impose a tax on land covered by buildings. There was a large unexplained decrease in the number of rate-payers at Zalun (2,069 to 828) and in the percentage of tax-payers to population (34·45 to 13·78). In Mandalay there is an increase of nearly 700 rate-payers, but the increase in the percentage is insignificant. In Pegu, the number of rate-payers decreased from 3,720 to 2,438, and the percentage of rate-payers from 34·57 to 22·65. The proportion of tax-payers to population is highest at Thatôn (33·44), Tavoy (25·30) and Mergui (23·83). Of the large towns Mandalay shows a fair percentage, while Moulmein, Bassein and Akyab all show a low one. Gyobingauk shows the lowest percentage of all (9·81).

Incidence of taxation and income.

87. The sum paid as taxes by each resident of a municipality averaged Rs. 1-5-8 in Lower Burma and Rs. 1-0-1 in Upper Burma. The income per head of population averaged Rs. 3-6-2 in Lower Burma and Rs. 2-15-5 in Upper Burma. In Upper Burma the rates of taxation are considerably lower than in Lower Burma. Incidence of taxation was highest at Bassein (Rs. 2-1-5), Moulmein (Rs. 2-4-11), Mergui (Rs. 1-14-0) and Akyab (Rs. 1-12-5) in Lower Burma, and at Mandalay (Rs. 1-3-6), and Salin (Rs. 1-0-8) in Upper Burma. For all other municipalities in Upper Burma the rates are below a rupee. In Lower Burma Myaungmya (Rs. 6-15-9) and Pegu (Rs. 6-1-6) show the highest income, and in Upper Burma, Bhamo, Sagaing, Pyinmana and Mandalay in the order named.

Revision of assessment.

88. Revision of assessments was undertaken in a large number of towns in Lower Burma, and the result of revision was usually to enhance the revenue. This is specially noticeable at Moulmein. In Pegu, Henzada, and Zalun the result was a falling off in revenue.

Fresh imposts.

89. The following fresh imposts were sanctioned :—

A tax on land covered by buildings at Thônze.

A two per cent. lighting-tax at Prome.

A scavenging-tax at Pegu. Street-frontage, area, and scavenging-taxes at Ma-ubin.

A tax on bullock-carts kept within municipal limits, and a toll for loaded and unloaded carts entering municipal limits at Ma-ubin.

Street-frontage and area taxes took the place of the old municipal tax at Yandoon. Street-frontage-tax was imposed at Ngathainggyaung instead of the old house-post tax. A lighting-tax was imposed at Henzada. A frontage-tax was sanctioned at Kyangin. At Myaungmya a tax and toll on carts was levied for the first time. Frontage and area taxes were sanctioned at Shwegyin. A scavenging-tax at Akyab was sanctioned. In Kyaukpyu and Sandoway an area tax was substituted for the old housepost-tax. At Minbu the levy of a fee of 8 annas per month on owners of certain animals kept was sanctioned. The imposition of a lighting-tax at Mandalay was sanctioned.

Demands and collections.

90. The total of outstanding balances (excluding Moulmein) was considerably lower than in the preceding year. But at Moulmein, Akyab and Zalun the outstanding balances were far too high. At Moulmein the sum of Rs. 8,814-4-0 remained outstanding owing to a question having been raised in Committee as to the legality or otherwise of collecting the revised assessment for municipal tax with retrospective effect. Outstandings at other places are not large, but if it is possible to secure payment of the whole amount of tax by the due date in a place like Mandalay with a tax revenue of over two lakhs it is not obvious why there should be outstandings in any municipality.

Income and expenditure.

91. The following table shows the opening balance, income, expenditure, and closing balance of the municipalities in each division during the year as compared with the corresponding figures for 1898-99. The figures are inclusive of debt accounts :—

1	2		3		4		5		6	
Division.	Opening balance.		Income during the year.		Total fund available for expenditure.		Total expenditure.		Closing balance.	
	1898-99.	1899-00.	1898-99.	1899-00.	1898-99.	1899-00.	1898-99.	1899-00.	1898-99.	1899-00.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Arakan	18,909	19,524	1,38,063	1,36,123	1,56,972	1,55,647	1,37,3[illegible]	1,[illegible]5 2	19,524	17,065
Pegu	1,16,445	1,47,726	3,01,416	2,93,510	4,17,[illegible]61	4,41,236	2,7[illegible], 54	3,[illegible], 6	1,4[illegible],07	1,11,410

Tenasserim	91,460	75,690	4,32,204	3,74,639	5,23,[illegible]64	4,5[illegible],329	4,47,[illegible]74	3,[illegible],[illegible]16	75,69[illegible]	00,163
Minbu	32,485	23,192	1,17,47[illegible]	1,[illegible],030	1,49,[illegible]5[illegible]	1,[illegible]3,[illegible]22	1,[illegible],762	1,[illegible],[illegible]4[illegible]	2,[illegible]3	31,887
Mandalay	67,188	35,378	6,88,485	5,73,771	7,55,67[illegible]	6,0[illegible],149	7,[illegible],204	[illegible],[illegible]66	[illegible],[illegible]7[illegible]	9,283
Sagaing	13,944	13,026	69,471	[illegible]3,2[illegible]7	[illegible]3,415	96,2[illegible]3	7[illegible]3[illegible]	75,[illegible]72	13,[illegible]16	2[illegible],411
Meiktila	38,547	41,389	1,16,274	1,27,[illegible]38	1,54,821	1,69,227	1,13,432	1,2[illegible],[illegible]49	41,[illegible]	49,218
Total ...	5,37,762	4,91,508	22,28,597	20,78,106	27,66,359	25,69,614	22,75,429	21,21,[illegible]84	4,[illegible]0,930	4,47,730

Excluding extraordinary debts and credits and debt accounts the aggregate income amounted to Rs. 20,15,019 as compared with Rs. 19,33,284 last year. Ordinary expenditure amounted to Rs. 19,95,531 as compared with Rs. 21,74,518 last year. Bassein shows a large closing balance of Rs. 54,644. Last year Bassein had a closing balance of Rs. 47,571. It is stated the money was set aside towards meeting the expense of a water-works scheme, which was not, however, sanctioned by the Local Government. The closing balance at Ngathainggyaung (Rs. 13,057) would appear to indicate that sufficient money is not being spent on important public works. Myanaung also had a large closing balance in comparison to its total expenditure. The closing balances of the municipalities in the Pegu division appear high when contrasted with their total expenditure. In Upper Burma closing balances are high at Salin, Sagaing and in nearly all the municipalities in the Meiktila division.

Municipal rates and taxes.

92. The total receipts from taxation showed a satisfactory increase from Rs. 7,55,804 to Rs. 7,74,553. Taxes on houses and lands increased from Rs. 4,59,100 to 4,73,869. The increase is particularly noticeable in Akyab and Kyaukpyu, in the Arakan division, and in Myanaung, Myaungmya, and Kyaikto. In Myanaung and Kyaikto the receipts under this head were considerably more than doubled. Taxes on animals and vehicles decreased from Rs. 66,119 to Rs. 37,598. There was a small decrease in Lower Burma (Rs. 40,622 to Rs. 33,523), for which the municipalities in the Irrawaddy and Tenasserim divisions are mainly responsible and a very large decrease in Upper Burma from Rs. 25,497 to Rs. 4,075. This is due entirely to the disappearance of a sum of Rs. 21,046 which was shown in the Mandalay statement last year under this head. This sum is now shown under the heading "Revenue derived from Municipal Property and Powers apart from Taxation." There was, as a matter-of-fact, an increase of Rs. 2,122 in the receipts for hack-cart licenses in Mandalay. Tolls on roads and ferries increased considerably. The sum realised under this head was Rs. 1,16,792 as compared with Rs. 1,05,764 last year. Municipalities in the Irrawaddy and Minbu divisions were responsible for most of the increase. Prome is the only town in which water-rate is collected. The receipts decreased slightly, a fact which was due to a revision of assessment on Government and Railway buildings. Lighting-tax rose from Rs. 42,774 to Rs. 51,485. This was mainly due to extensions of the tax. The Conservancy-tax brought in Rs. 80,303 as compared with Rs. 67,059 last year. The largest increases were in Akyab, Prome, Henzada, and Moulmein. At Prome the increase was due to a four per cent. scavenging-tax being imposed instead of the night conservancy charge on Government buildings; at Akyab and Henzada to an extension of the area within which the tax is levied.

Realizations under Special Acts.

93. Realizations under Special Acts increased from Rs. 35,698 to Rs. 35,753. Mandalay showed a considerable increase, mainly from hackney carriages. This was due to an increase in the number of licenses issued. In Lower Burma the receipts from pounds and hackney carriages both decreased about 10 per cent.

Other sources of revenue.

94. Under the head 'Rents of lands, houses, &c.' there was a considerable decrease in Mandalay (Rs. 3,381 to Rs. 566). This is explained as being due to the fact that the figures of last year include proceeds from sale of municipal property and from rent of Government land, while the revenue derived this year was merely for lease of land vested in the Committee. In Bhamo there was a large increase which is not explained in the report. In Lower Burma there was a considerable increase, chiefly at Bassein. Sale-proceeds of lands decreased both in Upper and Lower Burma. The revenue of municipalities from markets and slaughter-houses in Lower Burma increased from Rs. 5,31,689 to Rs. 5,40,608, and in Upper Burma from Rs. 3,91,594 to Rs. 4,24,401, an extremely satisfactory increment. The most notable increases were at Pakôkku, Mandalay, Shwebo, Sagaing, Pyinmana and Myingyan. The increase at Mandalay was largely due to rent of godowns in the Zegyo bazaar, and to an increase in the monthly rent from the Zegyo bazaar.

Fines under Municipal and other Acts aggregated Rs. 35,272 compared with Rs. 28,740 last year.

Fines appear to fluctuate in some municipalities to an extraordinary extent. The largest variations between the figures for the year under report and those of the preceding year occurred in the following municipalities: Sandoway (Rs. 9 to Rs. 106); Yandoon (Rs. 1,510 to Rs. 477); Kyaikto (Rs. 5 to Rs. 1,280); Salin (Rs. 137 to Rs. 576); Taungdwingyi (Rs. 133 to Rs. 539); Mandalay (Rs. 8,146 to Rs. 14,156); Shwebo (Rs. 208 to Rs. 25); and Pagan (Rs. 614 to Rs. 58).

Grants and contributions.

95. Grants and contributions from provincial and local funds amounted to Rs. 57,910 compared with Rs. 72,654 last year.

Expenditure on public safety.

96. Expenditure on public safety in Lower Burma decreased from Rs. 1,52,850 to Rs. 75,199, or practically one-half. This decrease was entirely due to the payment made by the Moulmein Committee last year for their oil gas installation. Apart from this disturbing element, the figures remain much the same as they were last year. The Kyaikto Municipality purchased a manual fire engine, which accounts for most of the increase under the head of Fire establishment, &c. In Upper Burma expenditure under the head of public safety decreased from Rs. 2,06,819 to Rs. 98,467. In Mandalay alone there was a decrease from Rs. 1,66,024 to Rs. 52,295. The difference was due to the fact that the burden of paying the police force in Mandalay town was no longer thrown on Municipal Funds. With effect from the 1st April 1899 the cost of police in Mandalay has been met from Provincial Funds.

General administration and collection charges.

97. Office charges and the cost of collecting taxes rose from Rs. 2,32,382 in 1898-99 to Rs. 2,47,857. In Lower Burma the most notable increases were at Ngathainggyaung and Moulmein, where expenditure increased from Rs. 1,976 to Rs. 4,248, and from Rs. 20,105 to Rs. 30,454 respectively. The increase at Ngathainggyaung is due to the survey of the town; at Moulmein to the payment of commission for collection of increased taxes due to revision of assessment. In Upper Burma there were large increases at Mandalay (Rs. 58,845 to Rs. 65,146), and Bhamo (Rs. 3,685 to Rs. 6,339). In Mandalay the increase was due to survey charges.

Water-supply.

98. Prome is still the only municipality which possesses a regular scheme of water-supply in working order. At Mandalay experiments were tried with tube wells which are being sunk north of the town and close to the bank of the Irrawaddy. It is anticipated that good water will be obtained. A supply of good water will be a great boon to Mandalay, as the present supply is by no means secure from external contamination. The Bassein water-works scheme has not yet been sanctioned. It was suggested to the Bassein Committee that they should raise a loan to finance their water-works scheme in the open market. Proposals for raising a loan to float the Moulmein scheme were submitted to the Lieutenant-Governor after the close of the year under report. The scheme has not yet been sanctioned. The preliminary report and estimate for a water-supply were sent to the Akyab Committee shortly after the close of the year. No definite action has been decided upon as yet. At Pegu and Letpadan no further action towards sinking tube-wells had been decided upon up to the close of the year. At Paungdè it was proposed to sink a tube-well, but the work was not carried out. However, an estimate amounting to Rs. 3,500 has now been sanctioned by the Local Government, a site has been selected, and the work was about to be put in hand at the close of the year. The well is to be a 6-inch artesian tube-well.

Sanitation.

99. The expenditure on sanitation is at present small, though Prome spent Rs. 15,533 as compared with Rs. 6,453 last year. A new scheme for improving the subsidiary drainage was put in hand during the year, and a total length of 9,245 feet of drains, disposing of the drainage of nine blocks of houses, was completed at an average cost for all sizes of 12 annas per running foot. At Yandoon drainage works for expediting the flow of the water in the road-side drains were carried out. The reclamation of the foreshore at Bassein was proceeded with. The second section of the Talainggyaung foreshore was constructed, and a small area reclaimed at a cost of

Rs. 1,537. At Moulmein the services of a sanitary surveyor were obtained, and the work of taking the levels of the streets and drains commenced in May 1899. At the close of the year all the plans and sections were ready; but certain important notifications were considered necessary, and it was decided that the scheme should provide for the introduction of the water-closet system. Special cleansing operations were again undertaken at Akyab as a precaution against plague.

Conservancy.

100. The total sum expended on conservancy rose from Rs. 3,60,480 to Rs. 3,80,181. In Lower Burma the increase was most noticeable at Gyobingauk and Moulmein. At Gyobingauk the increase is not explained: at Moulmein it is apparently due to an extension of street watering. In Upper Burma there was a considerable increase at Mandalay (Rs. 71,885 to Rs. 84,332). The original scheme for conservancy was abandoned owing to its great cost, and to the opposition with which the system of public latrines was met. A modified scheme was submitted to Government in January 1900. The system proposed is merely that of carts removing the soil by visiting the latrines of houses within a fixed area. It is a somewhat primitive system for a town of the size and importance of Mandalay. But it is a matter of the first importance that a conservancy scheme of some sort should be introduced in Mandalay, for the condition of the town at present can scarcely be considered sanitary. The increase in the expenditure this year was due to an increase under day conservancy and street watering. A new scheme of conservancy was introduced at Ma-ubin.

Hospitals and dispensaries.

101. The total expenditure on hospitals and dispensaries increased from Rs. 2,56,989 to Rs. 2,61,146. At Ma-ubin a new ward under the hospital was provided for moribund patients, and the ground floor of the hospital was cemented. At Bassein, among other improvements, the female ward was extended, and the cholera hospital was rebuilt.

At Henzada, where expenditure rose from Rs. 15,829 to Rs. 21,033, a new hospital was completed during the year. The increase in expenditure at Gyobingauk is said to be due to the construction of three public wells. Apparently this expenditure should have been shown under "Water-supply." A cholera shed was constructed at Letpadan. At Myingyan estimates for a new hospital amounting to Rs. 17,340 were sanctioned. At Pakôkku several necessary improvements to the hospital were undertaken. At Taungdwingyi structural improvements to the hospital were carried out. The hospital continues to absorb a large portion of the annual income.

At Mandalay the nursing establishment of the Hospital was increased from two to four Roman Catholic Sisters. These Sisters, who are untrained, are now to be replaced by trained nurses. The staff has been increased by one Native Assistant Surgeon.

Vaccination.

102. A sum of Rs. 14,877 was spent on vaccination as compared with Rs. 15,361 last year. The figures show no important variations from those given last year.

Markets and slaughter-houses.

103. A sum of Rs. 2,45,313 was spent on markets and slaughter-houses as compared with Rs. 2,56,722 last year. At Kyaikto Rs. 3,386 were spent on the construction of a vegetable bazaar, and at Thatôn new stalls in the bazaar were erected. At Mandalay a sum of Rs. 1,06,292 was expended; most of this sum went towards constructing godowns in the Zegyo bazaar, and smaller sums towards the completion of fish and meat markets. The expenditure at Pyinmana was due chiefly to the construction of a new *ngapi* bazaar. As matters stand at present, money spent on the construction of markets is invested in the most profitable manner possible. Plans and estimates for building a large bazaar to replace the old Zegyo bazaar, which was destroyed by fire, are at present under the consideration of the Mandalay Committee.

Registration of vital statistics.

104. Expenditure on registration increased from Rs. 9,730 to Rs. 10,270. The sums spent are small throughout and require no comment. From the various reports it would appear that prosecutions for failing to register births and deaths are rare.

Pubic works.

105. Hospitals, markets, slaughter-houses and other works which have already been dealt with are not included under this head. Practically the only items of expenditure are the cost of establishments and the maintenance and construction of roads. The expenditure amounted to Rs. 3,90,726, of which roads were responsible for Rs. 2,90,463. This is much less than the sum spent last year. Establishment cost more, but the sum spent on roads was less by about Rs. 90,000 than that spent last year. In Lower Burma the decrease was inconsiderable. In Upper Burma, at Mandalay alone, there was a decrease of about Rs. 88,000. The sum spent in 1898-99 was abnormal, and was due to the fact that a larger sum was available, the cost of construction of godowns having been met from special funds derived from the sale of Government securities. At Bassein a considerable sum was expended in paying for the services of the Sanitary Engineer in connection with surveys and plans for the Kanthônzin water works scheme. The increase at Akyab was due to more extensive repairs to roads, bridges, and culverts. The same remark applies to Toungoo. At Pegu over eight miles of road were renewed and repaired; the smaller municipalities in Upper Burma spent on the whole rather less on roads than they did last year. Minbu, Sagaing, and Pyinmana were exceptions.

Public instruction.

106. Expenditure on education increased from Rs. 84,812 to Rs. 1,61,200. In Upper Burma the responsibility for supporting education does not rest with municipalities, as they have to bear police charges. As stated above Mandalay is an exception, police charges having been met from Provincial Funds since the beginning of the year. In Lower Burma Municipal Committees meet the cost of education in Municipal Towns. At Prome the contribution towards Public instruction increased from Rs. 10,000 to Rs. 45,000. Of this sum Rs. 32,901 were spent in erecting a new school house and quarters for the Headmaster. At Paungdè the increase was due to enhanced Municipal Assignment for a new school house. At Ma-ubin the municipal school was burnt down at the end of March 1900. The fire was suspected to be the work of an incendiary. The municipality do not propose to re-build the school. The only municipality in Upper Burma (except Mandalay) which spends any but a trifling sum on education is Sagaing. From the 1st April 1899 all charges on account of education within the limits of the Mandalay Municipality were paid for out of the Municipal Fund. The total expenditure was Rs. 40,208. This sum and the large increase at Prome already referred to account for the variation from the totals of last year's figures. Prome, Paungdè, Kyangin and Shwegyin contributed the largest percentage towards educational charges.

Loans.

107. No loans from Government were sanctioned during the year. Municipalities in Burma are apparently averse from borrowing, and the balance of outstanding loans at the close of the year only amounted to Rs. 2,29,405, an altogether inconsiderable sum when compared with the total income of municipalities. The only loans of any importance now outstanding are those at Moulmein, Prome and Yandoon. Several schemes of importance are now in contemplation for which large loans will be required. Among these may be mentioned the water-works scheme at Mandalay; the scheme for rebuilding the Zegyo bazaar at Mandalay; the Moulmein water-works scheme, and the Moulmein drainage scheme. All these are necessary works.

Audit and defalcations.

108. Much useful work was done by the Inspector of Local Fund Accounts and his Assistants. A defalcation amounting to Rs. 88-1-0 was discovered at Paungdè. The money was embezzled by an *Ayatok* who died in 1897. At Kyangin the President neglected to pay attention to the audit-notes. He was removed to another township where there is no municipality. In most municipalities it is reported that the errors pointed out by the Auditor were numerous but not serious.

Town Funds.

109. The receipts of Town Funds were larger than last year (Rs. 89,984 compared with Rs. 67,209), and it is satisfactory to notice that expenditure has increased from Rs. 99,999 to Rs. 1,03,365. The closing balance of Rs. 48,572 is still too high, however, and such a large sum of money ought not to be allowed to lie idle. All Town

Funds, except Danubyu, reduced their closing balances. The following towns were declared notified areas under the Burma Municipal Act:—Danubyu, Pyapôn, Lemyethna, Kyaiklat and Magwe.

Military.

110. Major-General M. Protheroe, C.B., C.S.I., held command of the Burma district throughout the year. The total strength of the troops in Burma at the beginning of the year was 12,309, of whom 4,656 were Europeans and 7,653 were natives, the number at the close of the year being 10,324 of whom 2,811 were Europeans and 7,513 were natives. They were distributed as follows:—

	1st April 1899.		1st April 1900.	
	Europeans.	Natives.	Europeans.	Natives.
Rangoon district	2,315	2,297	974	2,727
Mandalay district	2,317	3,745	1,837	3,941
Southern Shan States Command	24	1,611	...	845
Total ...	4,656	7,653	2,811	7,513

A detachment known as the Burma Contingent consisting of 300 men selected from the Regiments in Burma and mounted on Burma ponies took part in the operations in South Africa.

111. There was no change in the constitution of the Volunteer Forces during the year under review. They consist of the Rangoon Port Defence Volunteers (comprising Artillery, Naval, and Engineer Corps), the Moulmein Artillery, the Moulmein Rifles, the Rangoon Rifles, the Burma Railway Rifles, and the Upper Burma Rifles. The aggregate enrolled strength of the combined force on the 21st March 1899 and 1900 compares as follows:—

	1899.	1900.
Adults	2,164	2,170
Cadets	366	368
Total ...	2,530	2,538
Efficients	2,349	2,467
Reservists	127	136

The amount of capitation grant earned was Rs. 75,577 in 1899-1900 as compared with Rs. 67,677 in 1898-99.

The rifle-range at Thamaing was completed and used during the season 1899-1900.

Marine.

112. No man-of-war visited Rangoon during the year.

The R. I. M. steamers *Mayo* and *Dalhousie* visited the light-stations regularly throughout the year.

The R. I. M. steamers *Irrawaddy*, *Sladen* and *Bhamo* were employed in Upper Burma and carried 9,830 tons of stores, and nearly 50 lakhs of specie, as well as troops, cattle, ammunition, &c.

The aggregate earnings of the three vessels amounted to Rs. 2,34,942 against Rs. 2,24,454 in the previous year, showing an increase of Rs. 10,488, due to better transport.

Thirty-one launches were employed in Lower Burma as compared with 28 last year. The *Mary*, which had been employed in Upper Burma during 1898-99, was returned to Lower Burma. The *Chin* was also returned from Upper to Lower Burma. She sank at Kyabin in June 1899, but was subsequently floated and sent to Rangoon for repairs. The *Scout* is a new vessel, and only arrived in

webruary. She is for the use of the District Superintendent of Police, Hantha-Faddy, and replaced the *Asp*. In Upper Burma, the number of steam-launches and vessels under employ were 28, including the three Royal Indian Marine vessels, as compared with 30 last year. The *Northern Ranger* is a new vessel, and only arrived a little more than a month before the close of the year. She was employed at Kindat under the orders of the Deputy Conservator of Forests.

The average number of days on which each vessel was employed, and the number of hours under steam, decreased from 180 days and 2,223 hours to 167 days and 2,168 hours. The average is higher for Upper Burma vessels. In Lower Burma the launches *Cameo*, *Constance* and *No Name*, and in Upper Burma the *Môgok*, *Mogaung*, *Ôktaung* and *Thoomallah* were most employed.

The total outlay including maintenance, fuel, stores, and interest for the year was Rs. 1,60,242 in Lower Burma against Rs. 1,48,485 in 1898-99. In Upper Burma the total amounted to Rs. 2,41,309 compared with Rs. 2,45,163 in the previous year. There was a large increase in the earnings of the vessels employed in Lower Burma from Rs. 88,580 to Rs. 1,25,352. The earnings of the Upper Burma vessels also increased from Rs. 2,09,537 to Rs. 2,20,681.

In Lower Burma 10 vessels showed a net profit on their working, amounting to Rs. 20,161, and the rest of the launches showing losses aggregating Rs. 55,051. These figures compare very favourably with last year's. In Upper Burma there was a total net profit of Rs. 8,044 on the working of all the vessels, as compared with a net loss of Rs. 5,261 last year. The *McIvor* is responsible for a large portion of the net profit. Of the six new vessels for the construction of which provision was made in the budget of 1899-1900, three—the *Northern Ranger*, *Scout* and *Hlaing* have already arrived. The construction of two new vessels was also sanctioned by the Government of India during the year. One of these vessels is a steam-launch for the use of the Public Works Department on the Pegu-Sittang canal; the other is a small stern-wheeler steamer for the navigation of the Mogaung river and the Indawgyi stream. The estimated cost of both vessels is Rs. 31,500.

The outturn of work in the Marine workshop, Mandalay, for the Public Works Department increased in value by Rs. 7,180-12-6. The value of articles turned out for the store godown has increased considerably.

The construction of the patent slip at Mandalay had to be abandoned owing to the site chosen being required by the railway. The selection of another site is under consideration.

IV.—PRODUCTION AND DISTRIBUTION.

Agriculture (Lower Burma.)

The season.

113. The rainfall was favourable, and the paddy crop was heavy, except in Prome and in the southern districts of Tavoy and Mergui, where the fall was scanty. Outbreaks of small-pox in Kyaukpyu and of cholera in Thayetmyo district did not materially affect the harvesting of the crop, nor was there any cattle-disease of significance. The rise in the Irrawaddy river was, however, exceptionally high and prolonged, and 72,600 acres of cultivation were flooded in the river districts of Hanthawaddy, Thôngwa, Tharrawaddy, and Henzada.

Area of cultivation.

114. The total area under cultivation was 6,857,898 acres: the increase over the figures of 1898-99 was 192,842 acres, or 2·89 per cent., whilst if the paddy crop alone is taken into account, the increase was 2·93 per cent. The same causes as in previous years led to the expansion: high prices ruled throughout the year: applications for *pottas* were again numerous, and the margin of cultivation has not nearly been reached. The districts which showed the largest increase in the area under crop were—

	Acres.
Pegu	46,465
Bassein	31,072
Toungoo	21,428
Thatôn	17,826
Thôngwa	17,520
Hanthawaddy	14,501

In Pegu the enormous increase was due in great measure to the cultivation of accretions on the bank of the Sittang river in the Kamasè circle. The increase in the cropped area in Thatôn is remarkable when it is considered that there were extensive erosions in that district along the estuary of this river. The area under field crops other than paddy is comparatively insignificant, except in Thayetmyo, where the conditions approach the conditions of Upper Burma. The tobacco crop in Akyab is not large, but brings in considerable profits and is growing yearly. In other districts, too, this crop is being raised over larger areas, noticeably in Tharrawaddy and Thayetmyo. Orchards and gardens are also increasing. Miscellaneous crops are discontinued in favour of paddy when the fertility of the cultivated area allows this substitution.

Prices.

115. Prices fell from Rs. 95 the 100 baskets of paddy at Rangoon in April to Rs. 79 at the end of June 1899. Demand from India to meet famine requirements raised them to Rs. 112 in October. The prospects of a good crop, and, later, the new season's supplies, brought the price down to Rs. 89 in March of 1900. These prices were on the whole higher than in 1898-99, and cultivators are said to have maintained the strong position they held in that year. In Akyab prices fluctuated between Rs. 82 and 88, ruling somewhat lower than in the previous year. The small cotton crop fetched higher prices.

Grazing.

116. The area reserved for grazing rose from 720,031 acres to 752,537. The increase of 32,506 acres is smaller than the reservation of 57,629 acres in the preceding year, but is satisfactory in view of the growth of stock mentioned below. Prosecutions for encroachment were frequent and were usually followed by conviction. Often the conviction was followed by a substantial punishment, and future reports should

show a smaller list of offenders. In Henzada no special mention is made of the prevalence of encroachments in the year under review, so that the 546 prosecutions of 1898-09 have no doubt had the anticipated deterrent effect. In Hanthawaddy, on the other hand, 111 cases were detected in the year under review against 38 in the preceding year. The number of cases was doubtless in part due to the increase of 4,070 acres in the area of grazing-grounds reserved in this district. In Myaungmya sufficient notice seems to have been taken of encroachments. In Tharrawaddy the area of grazing-ground is still insufficient: in this district the many convictions of 1898-99 led to a diminution in the number of encroachments. In Toungoo 15,262 acres are in process of reservation and in Amherst 7,224.

Cattle.

117. Except for local outbreaks in Pegu, Tharrawaddy, and Henzada, the year was free from epidemic disease, and cattle-breeding was accordingly successful. The returns of stock can only be considered approximately accurate, so that the numerical increase of 66,308 heads of all kinds cannot be accepted without reservation. The system of cattle-markets has not yet become popular, and the figures of selling price given in the statement of cattle-markets * hardly afford safe ground for comparison with prices of previous years. Prices seem to be rising, and stock is freely imported for sale from Upper Burma.

Agriculture (Upper Burma.)

Rainfall.

118. In most districts the rainfall was heavy and the harvest was regarded as a bumper one. The year was probably the most prosperous that Upper Burma has had since the Annexation. In the Meiktila division and in Mandalay district crops were damaged by flood, but prices ruled high and the season was on the whole good.

Cattle.

119. Cattle-disease was again prevalent. Rinderpest caused many deaths in Magwe and Bhamo, and there was much mortality in the Madaya subdivision of Mandalay district. Anthrax and foot-and-mouth disease also claimed a number of victims. The instructions for the segregation of infected animals are understood, but headmen are careless and will not, as a rule, act on them until too late. Veterinary assistants worked well. The supply of cattle is generally sufficient, and export to Lower Burma, where high prices rule, continued.

Prices.

120. Communications are not yet so perfect as to make free export follow demand, and the inadequacy of the rolling-stock of the Burma Railways Company, in Upper as in Lower Burma, makes it impossible to put much of the grain on the market. The markets are therefore in most districts local, and prices vary considerably from district to district. The low price of paddy in Upper Chindwin district, where there is considerable surplus production, has been noticed in former Revenue Administration reports and is again noticed in the report for the year under review. Compared with the normal, the year's figures were low, but too much reliance cannot be put on the tables supplied by District Officers. There was a satisfactory rise in the price of cotton, and the dry zone districts of Burma should find this a paying crop. The cotton has been said to be too short in the staple for the European markets; the report, however, says that the large export to Japan is due to the length of the staple.

Experimental Cultivation.

121. The orchard at Sinlum Kaba, in Bhamo district, did well, and the gardens at Sadôn and Sima are being planted with English fruit-trees. The experiments in the Chin Hills were not so successful. Wheat cultivation has passed the experimental stage in the western portions of the Southern Shan States. Experiments have therefore been discontinued the Shans being able to grow wheat without further instruction or encouragement. The fruit-garden at Taunggyi did fairly well. Experimental wheat growing East of the Salween at Kēng Tūng was continued, and the results were good. Experience should make wheat-growing in the State a remunerative occupation.

* Statement L. B. III, Revenue Administration Report.

Veterinary.

Veterinary work.

122. The work of the Veterinary Department has been almost entirely confined to the prevention and cure of disease amongst cattle, and practically nothing was done in the direction of pony-breeding. Only four stallions were on the books during the year. Of these, one Shan and two Sumatran stallions were brought over from 1898-99, while the fourth was a half-breed purchased during the year of report. The services of the Shan stallion were not successful, and the two Sumatran stallions were too young for employment. It is understood that the people do not like these animals, which they say are too small; and it is extremely doubtful whether anything will be gained by introducing this Sumatran blood into the country. It will probably be better to turn again to Burma and make another effort to secure efficient, if not first class Burman sires. It is doubtful whether the ponies brought in for sale from the Shan States are improving, but apart from this source of supply, there are good reasons for believing that the stock of Burman ponies, with the heavy calls made upon it from time to time, cannot be kept up without further action on the part of Government. Steps are being taken in this direction.

The year was not an unhealthy one in Lower Burma as far as cattle-disease was concerned. The deaths under each of the three principal diseases, rinderpest, anthrax, and foot-and-mouth disease, were less in the year of report than in the two previous years. The mortality in both years rose to its highest at the commencement of the rains and the ploughing season, and fell to its lowest in January and February after the harvest. In Upper Burma mortality statistics are not recorded, but it is believed that there was rather more disease than usual. The number of Veterinary Assistants on the active list at the commencement of the year of report was 64, but there were four casualties during the 12 months. There are 15 students in training. Of the students, only two are Karens, although efforts were made to get more men of this race. Five Shan Assistants were sent from the school to the Shan States early in the year. In the case of the Shan Assistants it is yet far too early to criticise results, but from the fact that the Political Officers are interesting themselves in these men and their work, there is every hope that the results will eventually be beneficial. The appointment of an Assistant Superintendent has been sanctioned, but it is not likely that the services of an officer will be available for some time to come.

Rice-trade Statistics.

123. The following table shows the quantity of rice exported from Lower Burma in each of the past ten years:—

Year.	Exports of rice from Lower Burma to			Total.
	Europe and America.	India, China, and Straits.	Upper Burma.	
	Tons.	Tons.	Tons.	Tons.
1890	740,564	430,079	53,838	1,233,481
1891	852,799	303,423	77,840	1,234,062
1892	824,151	242,367	152,804	1,219,322
1893	778,223	523,453	116,678	1,418,354
1894	729,965	594,504	36,531	1,361,000
1895	801,450	450,999	25,447	1,277,896

Horticulture.

125. There was no addition to the two existing Horticultural Societies. The Agri-Horticultural Society of Burma has its headquarters in Rangoon. As in previous years it received grants-in-aid of Rs. 2,400 from Government, and Rs. 1,200 from the Rangoon Municipality, besides an additional grant of Rs. 514 from the Municipality for the upkeep of roadside trees. It closed the year with a credit balance of Rs. 8,742. The receipts from the sale of plants rose. Excluding opening and closing balances the receipts and expenditure amounted to Rs. 15,524 and Rs. 13,949 respectively. There are no indications of increased interest taken in the objects of the Society by the native community.

Horticulture.

The Tenasserim Agri-Horticultural Society has its headquarters at Moulmein. The position of the Society continues to be financially sound. The receipts are made up for the most part of voluntary subscriptions, and the Moulmein Municipality made a small grant of Rs. 50. Excluding opening and closing balances, the receipts and expenditure were Rs. 721 and Rs. 683 respectively. The annual show was again successful. The experiments with Havana tobacco-seed were discontinued.

Forests.

126. At the beginning of the year the area of reserved forest in Burma was 15,669 square miles. One thousand four hundred and eighty-five square miles were added during the year. The area excluded was insignificant. In the Tenasserim circle the net increase to reserved areas was only 91·5 square miles. The area reserved in this circle now aggregates 4,236 square miles, or 12 per cent. of the total forest area:

Forest reservation.

* Rangoon is situated in the centre of the Hanthawaddy district.

700 square miles of additional area are proposed for reservation. Eight hundred and ninety-two miles of forest were reserved, mostly for fuel, in the Pegu circle during the year. Of the forests thus dealt with the two largest comprise 504 square miles. They lie in the extreme south of the Bassein-Myaungmya division, near the sea. The rectification of a defective boundary in this circle accounts for 64 square miles of the apparent increase. The original proceedings were found to be defective in nine reserves (formed prior to 1878), and these areas, aggregating 175 square miles, are now awaiting reservation. The total area of the reservations in the Pegu circle now amounts to 4,499 square miles, which represent 27 per cent. of the total area under forests. Proposals for reserving a further area of 722 square miles have been formulated. In the Southern circle 196 square miles of reserve were added, making 4,134 square miles or 22 per cent. of the estimated area under forest. Large areas have also been explored and examined with a view to possible reservation. The Northern circle shows 4,284 square miles, of which 232 square miles were added during the year. The reserves of this circle now represent about 22 per cent. of the total estimated forest area. Of the total area of State forest in the Northern circle 81 square miles were burdened with *taungya* privileges against 154 square miles at the close of the preceding year.

Forest survey.

127. No. 20, Burma Forest Survey Party, was at work in the year in the Tenasserim circle, and completed 353 square miles on the 4-inch scale. Of this area, 207 square miles fell within the West Salween and 69 square miles in the Ataran division. The party traversed 173 and 269 square miles, and triangulated 300 and 500 square miles in these divisions, respectively. In addition, it surveyed 161 square miles, besides completing the linear traverse of 87 miles on the same scale in the Pegu division. In the Southern circle the same party completed 106 square miles in the Pyinmana division and 88 square miles in the Ruby Mines division. One hundred and one miles were traversed in Pyinmana and 327 miles in the Ruby Mines, where also the triangulation of 200 square miles was carried out. Two thousand one hundred and seventy-two square miles of reserved forest remain to be surveyed in the Pegu circle. Of this area, 2,056 square miles fall within the Thayetmyo, Bassein, and Henzada districts. Surveys by local agencies were conducted in the Northern circle over 130 miles of boundary. One hundred and thirty-five miles of forest, either reserved or proposed to be reserved, were also surveyed locally in this circle. Considerable areas were treated similarly in the Southern circle and a smaller area in the Pegu circle of Lower Burma. At the close of the year approximately 4,000 square miles of reserved forest were awaiting survey, exclusive of reserves in the Northern circle.

Working plans.

128. A Working Plans party continued to be employed in the Toungoo division on the Pyukun and Pyuchaung reserves, with an area of 420 square miles. No Working Plans officer was appointed in the Pegu circle, where no progress has been made with the preparation of working plans for seven years. Working plans are required in this circle for 3,746 square miles. Two Working plans parties were employed in the Southern circle. The plan for the Myinbyin Working circle was submitted and received sanction after the close of the year. The report for the Yônbin Working circle was submitted by the officer in charge of the first party at the close of the year. The second party completed a working plan for the Yenaungmyin, Kaung, and Palwè Working circles; the report was submitted after the close of the year. Rough plans for controlling the exploitation of teak in some of the Southern Shan States were drawn up in the year and sanctioned by the Local Government, and conditions of offer for the working, under a five-years' agreement, of the teak forests of the Kēngtūng, Keng Hkam and Mawk Mai States were offered to the *Sawbwas* concerned. The contracts will provide for the payment of a small royalty, in addition to the import duty paid when the timber reaches Kado. The renewal of the contract held by the Hsipaw *Sawbwa* to work the Kainggyi teak forests in his State at the old rates of royalty was sanctioned. Elaborate working plans in the most important teak-bearing forests in the Northern circle will remain in abeyance, as these areas will be covered by the proposed purchase contracts.

Their annual outturn has been calculated from rough valuation surveys, and for each of the five divisions a programme of fellings, covering the period in which the contractors will be permitted to fell, has been drawn up.

Forest offences.

129. The following statement shows the number and class of cases of breach of the forest law which occurred during the year and the way in which they were disposed of:—

Circle.	Cases taken into Court.				Cases compounded.				Cases undetected.				Total.				Total of cases.
	Injuries to forests by fire.	Unauthorized fellings or appropriations of wood and minor forest produce.	Grazing without permission or in tracts in which grazing is prohibited.	Other offences.	Injuries to forests by fire.	Unauthorized fellings or appropriations of wood and minor forest produce.	Grazing without permission or in tracts in which grazing is prohibited.	Other offences.	Injuries to forests by fire.	Unauthorized fellings or appropriations of wood and minor forest produce.	Grazing without permission or in tracts in which grazing is prohibited.	Other offences.	Injuries to forests by fire.	Unauthorized fellings or appropriations of wood and minor forest produce.	Grazing without permission or in tracts in which grazing is prohibited.	Other offences.	
Tenasserim ...	3	146	...	20	2	162	5	378	3	...	...	...	8	308	5	398	719
Pegu ...	6	257	4	42	...	477	9	101	...	101	...	2	6	835	13	145	999
Northern ...	...	16	...	4	1	131	4	37	11	2	...	4	12	149	4	45	210
Southern ...	4	123	14	22	2	184	5	62	19	16	3	1	25	323	22	85	455

	661				1,560				162								

The total number of cases has fallen from 2,806 to 2,383. The diminution is spread over every circle. Of this number 1,718 occurred in Lower and 665 in Upper Burma. In the preceding year there were 1,989 cases in Lower and 817 in Upper Burma. Six hundred and sixty-one cases were brought into Court, 1,560 were compounded, and 162 were not detected. In the previous year 1,973 offences were compounded.

Fire-protection.

130. Operations of fire-protection were on the whole successful in every circle. In the Tenasserim circle the area over which protection was attempted rose from 645 to 1,182 square miles.; the area secured rose from 630 to 1,170 and the cost per square mile secured fell from Rs. 42 to Rs. 25. In the Pegu circle the area protected increased from 512 to 838 square miles, and the area secured from 392 to 667 square miles, or an increase of 70 per cent. on the figures of 1898-99. The average cost rate fell from Rs. 50 to Rs. 42. In the Southern circle the area attempted rose from 555 to 584 square miles, whilst the area successfully controlled increased from 367 to 500 square miles. In the Northern circle operations for protection were attempted over 1,205 and were successful over 1,136 square miles; the cost per mile was Rs. 17. The area attempted in 1898-99 was 1,444 square miles, and the area actually protected was 1,058 square miles.

Reproduction and improvement of forest growth.

131. No addition was made to the area of regular plantations in the Lower Burma circles. Four hundred and twenty-three acres of *taungya* plantation were laid down in the Tenasserim circle at a cost of Rs. 11 per acre, and 717 acres in the Pegu circle, the area comprising 437 acres of teak and 280 acres of cutch. Other sowings increased the whole area in which artificial reproduction was attempted in this circle to 861

acres. Improvement fellings in the interest of teak were carried out in fire-protected tracts over an area of 3,308 acres in Prome and 2,102 acres in Tharrawaddy. Eighty-four acres of *taungya* teak plantations and 59 acres of other plantations were added to the existing assisted area in the Southern circle. Improvement fellings over 1,122 acres were carried on at a cost of Rs. 2,335. No new plantation was made in the Northern circle; 40 acres of *taungya* were, however, taken over for future operations, making the total area 347 acres. In this circle, as in the Pegu circle, the small cost of improvement-felling and creeper-cutting operations suggests a lack of thoroughness.

Experimental cultivation.

132. The experiments with Hevea rubber in Mergui were continued with a fair measure of success. Experiments with other *latex*-yielding creepers were made in the Kimpadi plantation, and samples of the yield are now being reported on. The experiment with *ficus elastica* in Katha has not proved successful, and only 82 out of 370 seedlings were alive at the close of the year. The fruit garden at Maymyo did well, and the planting of roadside trees continued. Pine-tapping experiments were made at Sawbwataung near Maymyo and in the Tawngpeng State north of Thibaw; no success was attained. The distance from a market and the great difficulty found in procuring labour, added to the scanty yield of turpentine, do not justify an expectation that the industry will establish itself, and the experiments have been suspended. The establishment of a Hevea rubber plantation in the South Tenasserim division has been sanctioned at a total cost of Rs. 2,10,000. The site had not been selected at the close of the year, and final proposals for the management of the scheme are under consideration.

Teak girdlings.

133. In the Tenasserim circle 6,126 teak trees were girdled inside reserved forests and 2,280 outside the limits of reservations. The total girdlings of 1898-99 amounted to 11,836. In Pegu 12,702 girdlings were effected, five-sixths of them being within reserves. Girdlings continued in the Ruby Mines division of the Southern circle, where 2,781 teak trees were girdled, and in Pyinmana, where 1,886 trees were girdled at a cost of Rs. 678. Girdlings in the Northern circle were confined to the Katha and Bhamo divisions: in Katha 2,488 trees were girdled and in Bhamo 1,007.

Extraction of teak timber.

134. The extraction of teak by Government agency in the Tenasserim circle fell from 10,773 to 8,886 tons. The diminution occurred in the Shwegyin and Toungoo divisions, and was for the most part due to Messrs. Macgregor and Company working most of the forests in the Toungoo division under leases. The increase under *purchase contractors and lessees* more than counterbalanced the decrease in departmental extractions. In the Pegu circle 28,954 tons of teak were extracted. The corresponding figure for last year was 33,652: there was a large decrease of 5,265 tons in the yield from the Tharrawaddy division. Nearly the whole extraction was effected by Government agency, which removed 24,827 tons in the year under review, or 5,414 tons less than in 1898-99. Mortality among the dragging elephants accompanying an outbreak of anthrax led to the falling off. The cost of extraction per log of 60 cubic feet was low. In the Northern circle 56,574 tons of teak were brought out by purchasers, or 7,414 tons more than the quantity brought out in 1898-99. The result is referable to increased activity in floating operations on the part of the Bombay-Burma Trading Corporation, Limited, as the season was favourable. The total extraction by purchasers as well as by Government agency rose from 75,664 to 88,495 tons. In the Southern circle the tonnage of teak extracted from reserved forests by Government agency or by purchasers in the Pyinmana division fell from 85,713 tons to 48,004. The restricted operations of the Bombay-Burma Trading Corporation account for the decrease. The Conservator remarks that the forests have been worked exhaustively, and that as they are now swept fairly clear of dead timber, the outturn for many years must be comparatively small. The total extraction under purchase contracts in this circle fell from 140,632 tons to 108,273. The estimated outturn of teak from the Southern Shan States fell from 7,610 tons to 6,511 tons: the decrease is ascribed in part to mortality among the dragging elephants. The following statement shows the quan-

tity of teak extracted by the chief timber-contracting firms for the year compared with 1898-99.

Extraction of timber other than teak.

135. In the Tenasserim circle the quantity of unreserved timber other than teak and the amount of unreserved kinds of timber brought out by departmental agency was small. Under both heads the amounts extracted by purchasers, though large, were less than in the previous year. In the Pegu circle extractions show an increase. Extractions in the Southern circle were little in advance of those of the year before. *Pyingado* of marketable size is reported to be getting scarce in unreserved forests of this circle. Fifteen thousand nine hundred and ninety-one *pyingado* trees were marked for felling in unreserved forests in the Pyinmana and Ruby Mines divisions, while in the Northern circle there was a marked decrease, which the Conservator contributes in great part to the stoppage of *pyingado* fellings in the Mu division, where damage was being done to the forests by contractors cutting sleepers for the railway. There is danger that many unreserved forests in the Upper province, especially the forests which skirt the railway in the Meiktila and Myingyan districts, and in the Thibaw State, will be entirely denuded. Proposals have been made to regulate fuel-cutting in these places, as the constant demand for fuel for railway use calls for immediate restrictive measures.

Minor forest produce.

136. The revenue derived from minor forest produce in the Tenasserim circle fell by an inconsiderable amount. Cutch was dealt with as in former years under the license system. The policy of reserving cutch-bearing arears was continued. In the Pegu circle the outturn of cutch again rose: the extractions, which were 20 tons in 1897-98 and

5,776 tons in 1898-99, rose to 9,116 tons in the year under review. In the Southern circle, on the other hand, the extraction of cutch fell from 1,003 to 560 tons. The decline in extraction is not explained. There was a large increase in the amount of rubber extracted in the Northern circle, where there was also an increase in the outturn of cutch. Fifty-five licenses were given and 15,270 cutch trees removed under them. The Yünnan Company, Limited, applied for a license to exploit bamboos in the forests of the Myitngè river for the manufacture of paper pulp. It is not yet known whether the condition laid down will be accepted. A similar concession was given, but remained unutilized, in 1893 and again in 1897.

Financial results.

137. The financial results of the year are shown in the following statement:—

Year.	Circle.	Receipts.	Charges.	Surplus.	Proportion of surplus to gross revenue.

	Average for the past five years ending 1898-99.	66,15,541	20,96,816	45,18,724	8·30

The increase of revenue in the Tenasserim circle was due to larger extractions of teak in the Toungoo division and to increased receipts on drift at Kado. There is again a deficit on the South Tenasserim division, where cost of settlement was high. The surplus of the Pegu circle was only a little less than in 1898-99, whilst the revenue was higher than in any previous year. The revenue in the Southern circle fell by Rs. 8,91,963. Of this amount Rs. 2,02,000 was erroneously credited in 1898-99, and smaller extraction by the Bombay-Burma Trading Corporation, Limited, reduced the revenue on timber as compared with the figures of 1898-99 by Rs. 5,89,756. Deducting a sum of Rs. 2,02,000 erroneously credited in the Mandalay division in the previous year, there is a slight increase in the surplus on the year's working in the Northern circle.

The revenue was contributed under the following heads:—

Particulars.	1898-99.	1899-00.	Increase or decrease.
	Rs.	Rs	Rs.
(*a*) From timber and other produce removed from the forests by Government agency.	29,07,396	31,39,532	+ 2,32,136
From timber and other produce removed from forests by lessees, consumers and purchasers. (*b*) Timber	40,39,703	36,72,787	— 3,66,916
(*c*) Firewood and charcoal ...	1,12,141	1,12,031	— 110
(*d*) Bamboos and canes ...	1,91,109	1,55,449	— 35,660
(*e*) Grazing and fodder grass	2,098	1,696	— 402
(*f*) Other minor produce ...	2,40,262	2,85,742	+ 45,480
(*g*) Confiscated drift and waif wood	2,66,251	2,17,006	— 49,245
(*h*) Duty on foreign timber and other produce ...	3,13,754	3,12,883	— 871
(*i*) Miscellaneous	2,19,213	90,172	— 1,29,041
Total ...	82,91,927	79,87,298	— 3,04,629

The quantity of teak timber received at Kado was 78,192 tons against 88,830 tons in the previous year. Frequent complaints were made that timber from the Siamese forests on the Salween was improperly dealt with on reaching Kado. The matter is under enquiry. Much of the difficulty would, however, be removed if the Siamese Government could ensure that the proper dues were paid on timber before leaving the forests.

The following statement gives the figures of the exports of teak since 1895-96:—

Year.	From Moulmein.		From Rangoon.		Total.		Average value per ton.
	Tons.	Value.	Tons.	Value.	Tons.	Value.	
		Rs.		Rs.		Rs.	Rs.
1895-96 ...	84,363	58,44,214	120,494	94,03,044	204,857	1,52,47,258	74·43
1896-97 ...	75,298	60,98,816	115,854	98,50,012	191,152	1,59,48,828	83·44
1897-98 ...	65,986	54,21,499	207,405	1,84,37,474	273,391	2,38,58,973	87·27
1898-99 ...	66,002	56,04,701	202,281	1,71,44,554	268,283	2,27,49,255	84·78
1899-00 ...	62,983	54,84,419	209,303	1,73,87,530	272,286	2,28,71,949	84·00

The demand for Burmese teak has continued and prices remained high throughout the year.

The Burma Forest School.

138. The Burma Forest School was opened in August 1899. The experience of one year's working has shown that the provisional rules which were sanctioned when the school was started will need considerable modification. It is proposed, among other changes, to extend the course of instruction from eighteen months to two years, and to throw the school open to Burman Rangers and Deputy Rangers instead of limiting the training to Foresters and Forest guards of the Subordinate Executive Forest service as at present. The matter is now under the consideration of the Government of India.

General.

139. A draft Forest Bill, which will consolidate the existing legislation of the Upper and Lower Provinces, is now under the consideration of the Government of India. The Upper Burma circles were rearranged at the close of 1899 and the new circles were renamed Northern and Southern in place of Eastern and Western.

Mines and Quarries.

Jade.

140. The amount of jade extracted from the jade mines in the Myitkyina district in 1899 was 1,111 cwts. valued at Rs. 42,048, against 1,938 cwts. valued at Rs. 2,17,884 in 1898. The decrease is ascribed to heavy falls of rain curtailing the open season and flooding the mines. The right to levy the royalty on jade at 33⅓ per cent. of the value was leased to a Chinaman for three years for Rs. 60,350. Some exploring for jade was also done in Katha district, but no stones of value were found.

Rubies.

141. The most important ruby tract is the Mogôk stone tract. The Burma Ruby Mines Company, Limited, continued to work part of the tract under the terms of their lease, dating from 1st November 1896, and enjoyed, as in 1898, the right to levy royalties from persons working by native methods. The fees thus realized rose from Rs. 2,14,384 to Rs. 2,73,971. The improvement is ascribed to increased activity in the ruby market. The value of the stones won by the Company rose considerably reaching Rs. 13,62,722 against Rs. 8,69,252 in 1898. Three very valuable stones were found, one of 77 carats being valued at four lakhs. A dividend of 12½ per cent. was paid by the Company as the result of the year's working. An electric motor for pumping work was installed in the Kyauklôngyi mine.

The Nanyaseik tract does not seem to be a productive field, and the small output fell off, although the fees for working were reduced by half; the value of the rubies found during the year being estimated at Rs. 1,250. No stones of value were found in the Sagyin stone tract, where the number of licenses fell, though there was a small increase in the fees realized. One license to explore for rubies in the Mohlaing township of the Möng Mit State lapsed and was not renewed. A license to prospect for rubies was granted in Katha, where the occurrence of gems was for the first time noticed. The stones obtained were not valuable.

The tourmaline mining industry at Maingnin in Möng Mit State has practically disappeared. It is suggested that the unrest in China, which is the only market for the output of this tract, may have led to this.

Gold.

142. The Kyaukpazat gold mine continued working during the year and turned out 1,196 ounces or a little more than in 1898. The cyanide process has been introduced and a larger outturn is anticipated. Several exploring and prospecting licenses for gold were issued, and four syndicates, with a capital in each case of £5,000, have been formed and the prospecting of the tracts covered has commenced. In the Singu township of Mandalay district and in the Ruby Mines district prospecting licenses were issued. There is an insignificant industry of gold-washing in certain streams of the Salween and Sagaing districts.

Coal.

143. The Letkôkpin colliery was worked during the year by the Burma Coal Company, which extracted 8,105½ tons against 6,975 tons in 1898. The average daily number of hands declined to 230.

Amber.

144. The early rains curtailed the working of the amber mines, which lie beyond the administrative frontier of the Myitkyina district. The production was estimated to have fallen from 114 cwts. to 20 cwts. and the value from Rs. 15,915 to Rs. 2,270. The working is erratic and variations from year to year are frequent.

Tin.

145. Tin is mined in the Tavoy and Mergui districts. No mining was carried out by Europeans or by European methods in the year under review, but a lease of 400 acres was given to Messrs. Hein and Money, who propose to introduce hydraulic appliances. The quantity of tin won by native methods in Mergui was 967 cwts. valued at Rs. 71,438, against 780 cwts. in 1898. The production in Tavoy was 14 cwts. valued at Rs. 511.

Petroleum.

146. The chief oil-fields are at Yenangyaung and Yenangyat on the Irrawaddy. The yield from the Yenangyat wells rose from 6,036,088 gallons in 1898 to 10,030,790 gallons in 1899. The greater part of the yield came from four blocks only, in which three companies, the Burma Oil Company, the Minbu Oil Company, and the Burma Petro-

leum-Producing Company hold interests. Three new blocks were leased during the year. One hundred and forty-two new blocks were demarcated by the Survey of India Department.

The Yenangyaung fields yielded 22,111,514 gallons against 15,484,301 gallons in the previous year.

The borings in the Minbu oil-field proved unsuccessful and the field has been abandoned.

The crude oil obtained from the Akyab fields amounted to 50,559 gallons valued at Rs. 13,730. The yield from Kyaukpyu was 116,668 gallons.

Three oil-blocks were leased to the Minbu Oil Company in Myingyan, but work was not commenced during the year.

147. A lease to mine for plumbago in the Mandalay district was given out, but work had not commenced at the close of the year.

Other minerals.

Prospecting licenses for mica were given at Kamaing near Mogaung, and to the Burma Ruby Mines Company in the Ruby Mines district. Two licenses to prospect for plumbago were also given to this Company. Two tons of antimony were extracted from the area covered by a prospecting license in Amherst district. The result of the experiment was not known.

The steatite quarries in the Chin Hills Tract yielded nine tons, which were valued at Rs. 2,200. No figures of output from the Minbu steatite quarries are available though mining continued throughout the year.

Prospecting operations for copper in the Letpadaung Hills of Lower Chindwin district were carried out by a private firm but were not successful.

Manufactures.

148. The principal manufactures of Burma were specified in the report of 1889-90. The number of factories in the province continues to increase steadily. The figures for the past three years have been 125, 136, and 141 respectively. Seven new rice-mills were brought under the Factories Act during the year in the Hanthawaddy district. Three saw-mills were struck off the list in Rangoon Town district and one new mill was added: two saw-mills were brought on to the list in Toungoo. One cotton-press in Rangoon was closed during the year. The average daily number of operatives employed rose from 16,181 in 1898 to 19,138 in the year under review. Rangoon Town, Hanthawaddy, and Bassein were responsible for increases in the number of operatives of 1,346, 1,014, and 608 respectively. There is a noticeable increase in the number of children employed in factories in Rangoon, the figures being 105 compared with 54 in 1898.

The result of the inspections was on the whole good. In spite of the severe epidemic of small-pox which visited Lower Burma at the end of 1898 and the beginning of 1899, the general health of operatives has been good and their condition is prosperous.

There was a large increase in the number of accidents reported during the year, which totalled 151 as against 121 in 1898 and 60 in 1897. Of the number, 7 were fatal, and 102 serious: the largest increase occurred in Rangoon and Moulmein. The number of accidents is to be attributed rather to the carelessness of the operatives than to any want of proper precaution on the part of the employers. A boiler explosion at Messrs. Knight and Christison's mill in Rangoon caused 7 deaths, besides several serious scalds.

Only one prosecution was instituted during the year, at Moulmein, and resulted in an acquittal. The alleged breach of the law was of a trivial nature.

Commercial—Marine.

149. The number of vessels and the aggregate tonnage engaged in the seaborne trade of the province in each of the past three years were as follows:—

	Vessels.	*Tonnage.*
1897-1898	6,653	4,153,883.
1898-1899	6,344	4,133,436.
1899-1900	6,223	4,147,646.

This tonnage was distributed in the following proportions among the four chief ports and the smaller ports:—

Port.	1897-1898.				1898-99.				1899-1900.			
	Entered.		Cleared.		Entered.		Cleared.		Entered.		Cleared.	
	Vessels.	Tonnage.	Vessels.	Tonnage.	Vessels.	Tonnage.	Vessels.	Tonnage.	Vessels.	Tonnage.	Vessels.	Tonnage.
Rangoon ...	1,212	1,380,135	1,204	1,382,178	1,225	1,417,373	1,235	1,431,773	1,214	1,457,380	1,190	1,429,659
Akyab ...	317	140,755	287	140,393	290	167,158	282	166,752	345	184,994	330	182,868
Bassein ...	23	42,243	37	69,709	40	78,123	42	78,058	34	70,170	33	68,414
Moulmein ...	657	271,307	692	270,592	674	263,089	712	270,413	670	260,233	715	262,136
Smaller ports ...	1,107	233 101	1 117	214,200	922	130,477	922	130,220	831	114,132	861	117,660
Total ...	3,316	2,076,721	3,337	2,077,162	3,151	2,056,220	3,193	2,077,216	3,094	2,086,909	3,129	2,060,737

Foreign trade.

150. The aggregate value of the foreign imports of the year was 487 lakhs, or 67 lakhs less than in the preceding year. The falling off was again due to the large unsold stocks on hand at the end of 1898-99, and also to the advance in prices of articles in the home markets, especially raw material. The value of the foreign export trade of the year was 1,018 or 154 lakhs less than that of its predecessor. The decrease was principally in the shipments of rice, exports to Europe having declined in quantity owing to the abnormal demand for India consequent on the famine. The number of vessels which entered at each port of the province from foreign countries remained about the same, their tonnage, however, decreased by 12,910 tons. The vessels that cleared numbered 79 less than in the previous year, and their tonnage showed a decrease of 111,424 tons. In all, the vessels that both entered and cleared decreased by 78 and their tonnage by 124,334. Three hundred and seventy-nine steamers, with tonnage aggregating 638,285 tons, and 128 sailing vessels, with a total tonnage of 72,753, entered the several ports of the province, and the vessels that cleared numbered 387 steamers with a total tonnage of 666,539 tons, and 101 sailing vessels with an aggregate tonnage of 71,985 tons. In 1898-99, the number of steamers and sailing vessels that entered was 376 with tonnage aggregating 625,030 tons, and 130 with a total tonnage of 98,918 tons respectively, whilst 428 steamers of 739,246 tons and 139 sailing vessels of 110,702 tons cleared.

Coasting trade.

151. The aggregate value of the coasting trade increased by about 318 lakhs as compared with the previous year, chiefly due to the heavy shipments of rice to Bombay. The imports, however, declined, the total value showing a decrease of 190 lakhs as compared with the previous year, partly due to the general advance in prices and partly to the smaller outturn by the cotton mills in India. The number of vessels which entered and cleared at the several ports of the province was 3,439 steamers of 2,739,068 tons, and 2,232 sailing vessels of 113,016 tons, a total of 5,671 vessels of 2,852,084 tons. In 1898-99, the number of vessels was 3,493 steamers of 2,617,819 tons, and 2,258 sailing vessels of 90,667 tons, a total of 5,751 vessels of 2,708,486 tons.

Rangoon.

152. In Rangoon there was a small increase in the tonnage of vessels entering the port. The number and tonnage of vessels from Europe *viâ* the Suez Canal increased considerably. This was chiefly due to the establishment of the "Hansa" line of steamers running between Hamburg and Rangoon. One more steamer entered the port than in 1898-99, while in European sailing vessels there was a decrease of 16, and in native craft an increase of 4.

Wrecks and casualties.

153. The number of shipping casualties in Rangoon pilotage waters was 10, one less than in the preceding year. No serious damage was done except in the collision between the steamers *Camorta* and *Newton Hall*. The *Camorta* while proceeding up the river, collided with the S.S. *Newton Hall*. The accident formed the subject of an enquiry and the harbour-master was warned. Two accidents of a minor nature occurred at Bassein. At Moulmein the stranding of the S.S. *Amboina* off Bentinck Island and the grounding of the S.S. *Wraggoe* formed the subjects of enquiry. In the former case the master was found guilty of careless and negligent navigation, which caused the loss of his vessel, and in the latter case the master and pilot were exonerated from blame. No wrecks or casualties are reported to have occurred within the port of Akyab.

Marine surveys and tidal observations.

154. No marine surveys were undertaken at Rangoon by the Marine Survey of India. Periodical surveys were made by the Deputy Conservator of the Port as usual. The tidal observations at Rangoon, under the management of the Port Commissioners, were reported to be very satisfactory. Automatic tidal observations, with self-registering guages, were continued at Rangoon throughout the year, and at Diamond Island up to the 4th December 1899, when the observatory was closed and the removal and erection of the same at Bassein was sanctioned. At Akyab and Moulmein, personal observations were taken daily during daylight on a graduated staff or tide pole, and the actual readings thus obtained are recorded against a table showing predicted heights of high and low water for the year as prepared by the Survey Department.

Light-houses and light-vessels.

155. The R.I.M. ships *Mayo* and *Dalhousie* visited the light stations regularly throughout the year. The state of the lights appeared to be uniformly good. The new apparatus for the Alguada Reef light-house, which was ordered in 1898, has no yet been erected. Some progress was made with the work of erecting new piles for the China Bakir light-house, but owing to the non-receipt of a portion of the materials it was found impossible to complete the work before the break of the monsoon. The tank at Table Island has been completed and is said to be a success. The question of improving the south-west monsoon landing-place is still under consideration. Separate quarters have been erected for the pilots at Amherst Point, their former outlook station having been utilized as a light-house. The advisability has been suggested of adopting Lanthagyaing Bay as a harbour in place of the present anchorage off Zallatong Island, which is dangerous and inconvenient. An effort will be made to have a proper survey made of the Bay early in the next open season. The question of erecting a light on the north-west of Cheduba Island, near Kyaukpyu, is under consideration. All three light-vessels are reported to be in good repair. The health of the light-keepers has been worse than in previous years. There were 21 cases of beri-beri, of which 9 proved fatal: the Krishna Shoal L. V. *Kalagauk* alone had 9 cases and 5 deaths. The Sanitary Commissioner has been asked to obtain an accurate medical history, as far as possible, of each case, and it is hoped that when the identity of the disease has been established beyond a doubt the remedy may not be impossible to discover. At present medical knowledge of this mysterious disease is very slight, its causes and its remedies being alike little understood. The receipts from light dues show a slight decrease compared with the previous year, the figures being Rs. 3,16,311 and Rs. 3,18,589 respectively. The falling off was most marked at Bassein, where it amounted to nearly Rs. 4,000, Akyab on the contrary showing an increase of about Rs. 2,300. The receipts from Calcutta decreased by Rs. 3,500. Current expenditure increased by Rs. 5,000, while the capital expenditure for the year amounted to Rs. 60,000 as compared with Rs. 22,000 in the previous year. The largest item was Rs. 32,000 expended on renewing the piles of the China Bakir light-house, and Oyster Island and Table Island each accounted for about Rs. 7,000.

Pilot service.

156. The Rangoon Pilot Service consisted of fifteen 1st grade pilots and one 4th grade pilot and six special pilots. The receipts of the Pilot fund amounted to Rs. 2,21,094 being a decrease of Rs. 44,551 and the amount paid to the pilots was Rs. 1,45,416 as against Rs. 1,49,283 last year. The Pilot fund closed with a balance of Rs. 84,051. The system of funding the earnings of pilots and distributing them proportionally according to grade, which was introduced in April 1898, appears to give general satisfaction.

The average monthly earnings of the pilots in full work in the several classes contributing to the up-keep of the service were as follows :—

		Rs.
Class I	... Contributing 20 per cent.	923.
Class II	... Contributing 25 per cent.	865.
Class III	... Contributing 30 per cent.	807.
Class IV	... Contributing 40 per cent.	692.
Class VII	... Contributing 70 per cent.	374.

At Moulmein the Pilot service consisted of 7 Europeans and 3 Native pilots and 3 Europeans holding special licenses for the command of local and tug steamers. During the year 2 of the 3 Native pilots were compulsorily retired and the remaining one resigned the service. The highest gross earnings of a 1st grade pilot in full work was Rs. 6,021 and the lowest Rs. 5,126, while the average gross monthly earnings amounted to Rs. 450. The total earnings of the 3 native pilots were Rs. 781. There was no change in the constitution of the Pilot services at Bassein and Akyab. The total amount of pilotage earned at Bassein during the year was Rs. 18,863, against Rs. 22,132 in the previous year. A memorial from the pilots at Bassein praying for increased rate of pilotage was considered and rejected. The establishment of a pilot fund from 1st April 1900 was sanctioned during the year.

Port funds.

157. The receipts of the Rangoon Port Trust Fund increased by Rs. 29,322. There was an increase under most heads of account, the only considerable decrease being under the head of "Sundry receipts." This is due to the fact that the total under "Sundry receipts" reached an abnormal figure last year, owing to the final adjustment of the counterclaims between the Port and Pilot funds. Expenditure decreased by Rs. 1,88,058. This is due to the abnormal expenditure of Rs. 2,29,035 incurred last year to complete the purchase of the "Brooking" buildings for the accommodation of the Port Trust staff and the Port Officer. The closing balance for the year was Rs. 5,15,032 as compared with Rs. 4,54,337 last year. Expenditure on plague-precautionary measures has increased largely. Last year the expenditure under this head amounted to upwards of Rs. 40,000. This year the amount expended was Rs. 86,721. During the year a quarantine camp was established below King's Point. The rules for the prevention of the importation of plague were strictly observed. Four cases of plague were detected, of which three proved fatal.

Lights were erected at Syriam Point, Choki Point, and Deserter's Creek during the year and are said to have facilitated night pilotage on the river.

Minor ports.

158. The total income (excluding debt accounts) of the remaining six Port funds amounted to Rs. 2,29,398 and the total expenditure to Rs. 1,84,381. The Bassein and Mergui funds closed with a smaller balance than in the preceding year. The other funds showed a larger balance.

Seaborne trade.

General statistics.

159. Including Government exports and imports, which accounted for rather more than $1\frac{1}{2}$ crores, the total value of the seaborne trade in 1899-1900 amounted to over $32\frac{4}{5}$ crores. The corresponding figure for 1898-99 was $29\frac{1}{2}$ crores so that there was a substantial advance of about $3\frac{1}{3}$ crores or over 11 per cent. A heavy paddy crop in 1899, which sold at good prices and thus enabled the people of the country to indulge more freely in imported goods, contributed to this improvement of trade. The feature of the year's trade was the diversion to Bombay of a large portion of the rice exports, which in 1898-99, went to European ports.

The following table exhibits the progressive value of the trade of Burma since 1866-67. The figures do not include Government exports and imports.

Year.	Rangoon.			Other ports.			Total for the province.		
	Imports.	Exports.	Total.	Imports.	Exports.	Total.	Imports.	Exports.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1866-67 ...	1,74,95,330	1,18,80,320	2,93,75,650	80,57,520	1,12,60,300	1,93,17,820	2,55,52,850	2,31 40,620	4,86,93,470
1871-72 ...	2,28,11,560	2,29,71,550	4,57,83,110	87,68,300	1.48,30,620	2,35,98,920	3,15,79,860	3,78,02,170	6,93,82,030
1876-77 ...	3,66,21,660	3,39,16,470	7,05,38,130	1,04,72,380	2,12,50,070	3,17,22,450	4,70.94,040	5.51,66,540	10,22,60,580

160. Of the total trade the port of Rangoon absorbed about 78 per cent. Imports at Rangoon showed a small decrease and exports a very large advance on the figures for the previous year. Akyab with about $\frac{1}{10}$ of the trade of Rangoon has increased imports but decreased exports. In Moulmein, where the volume of trade was about $\frac{1}{8}$ of that of Rangoon, imports were about equal to those of the previous year, while in exports there was some falling off. Bassein with a seaborne trade only about $\frac{1}{27}$ of Rangoon shows an increase in imports, which, however, does not balance the much larger decrease in the export trade.

Trade of the several ports.

161. Under merchandise the total imports of the year show a decrease of about $7\frac{1}{2}$ per cent. This result is attributed to over-importations in previous years and to the high prices ruling in European markets. High prices in India and the famine also reduced supplies. At the same time the trade of the year is considered satisfactory as the people showed considerable purchasing power and stocks were largely reduced. The decrease in the value of the import trade was felt both in foreign and coasting imports. In foreign imports the largest decreases were in silk piece-goods, cotton-twist and woollen piece-goods. Imports of salt and raw silk also fell considerably. In coasting imports cotton piece-goods and coal showed the largest decline, but the fall was shared by cotton twist, tilseed oil, betelnuts, dried fish and wheat.

Import trade.

162. Exports showed a substantial advance in value of over 11 per cent. Foreign exports diminished owing to the diversion of a large portion of the rice crop to the famine-stricken provinces of India. The total diminution was 154 lakhs, but this was more than counter-balanced by an increase of 358 lakhs in the value of the coasting exports.

Export trade.

The foreign exports of teak amounted in value to nearly 89 lakhs, which was slightly less than in the two preceding years but exceeded very largely the value of the exports in 1895-96 and 1896-1897. Exports of caoutchouc rose from 4,303 cwt., valued at nine lakhs, in 1898-99 to 5,826 cwt., valued at 12 lakhs, in the year of report.

In coasting exports the abnormal shipments of rice went to Bombay. Exports of teak to Indian ports were valued at 79 lakhs against 93 lakhs in the previous year. The famine was responsible to a great extent for this decrease.

The various kinds of country produce contributed in the following proportions to the total foreign export trade:—

	Per cent.
Rice	76·21
Teak	8·75
Cutch	2·40
Raw hides	1·49
Raw caoutchouc	1·19
Raw cotton	2·07
Jadestone	·84
Rice bran	3·19
Other articles	3·86

Inland trade.

163. Two trade registration stations were closed and one new station was opened during the year, making 19 stations in Upper Burma and nine in Lower Burma registering trade at the end of the year of report.

The total trade registered at these stations had an aggregate value of Rs. 3,07,09,702, being an advance of over 6 per cent. on the trade of the previous year. Imports increased largely but this improvement was to some extent set off by contraction in the export trade. The trade was shared in the following proportions:

	Per cent.
Western China	14
Shan States	58
Siam	17
Karenni	10

164. The trade with Siam as distingnished from the Zimmè trade amounted to only $10\frac{1}{2}$ lakhs against nearly 15 lakhs in the previous year. Both imports and exports fell off. Cattle were not imported in the usual numbers and exports of treasure and silk

Lower Burma.

and cotton goods also decreased. Nearly every head, however, shared in the fall, which is attributed to the lack of good roads across the frontier and to improved administration in Siam. From Zimmè with a trade of 42½ lakhs the decrease in imports, though considerable, was not so noticeable, the fall being principally in timber. Karenni, with a total trade aggregating 31¾ lakhs in value, furnished increased importations of timber but took away less apparel and silk manufactures.

Upper Burma.

165. The trade with Western China had a total value of 43⅓ lakhs, being an increase of over 18 per cent. on the trade of 1898-99. Importations of horses and mules were much larger than usual, but provisions and treasure also contributed to the increase. In raw silk there was a considerable falling off when comparison is made with the figures of 1898-99, but the imports of that year were abnormal. Under exports the large advance of 19 per cent. includes increases under cotton, raw, and cotton piece-goods of European manufacture. In twist and yarn manufacturing in India there was a noticeable decrease, part of which is perhaps only an apparent decrease due to defects of registration. The Northern Shan States trade amounted to 92½ lakhs, showing a fair increase in imports and the very large advance of 52½ per cent. in exports. Under imports live-stock and wet tea are considerable contributors to the increase. Part of the large increase in export can only be regarded as temporary as it includes railway materials to the value of 14 lakhs. During the year the Northern Shan States showed a somewhat lessened demand for cotton and woollen goods. Trade with the Southern Shan States was valued at 86⅓ lakhs, being nearly 9 per cent. less than in 1898-99. Both imports and exports shared in the fall. Under the former head the decrease was to a great extent due to lessened importation of teak *viâ* the Salween, but other heads also contributed to the result. Under exports the greatest falling off was noticeable in silk piece-goods. The export trade of the preceding year had been abnormal and the shrinkage in the trade of 1899-1900 was therefore to be expected.

Public Works.

General.

166. For the administration of Public Works the province is divided into four circles under Superintending Engineers, and there is a special fifth circle for irrigation works in Upper Burma, the whole under the general control of one Chief Engineer. The four territorial circles are named, the North-East, North-West, South-East, and South-West. The first two have their headquarters at Mandalay, as also has the Irrigation circle, the South-East at Toungoo, and the South-West at Rangoon. The four circles are subdivided into 21 divisions under Executive Engineers, namely, five in the North-East, four in the North-West, and six each in the South-East and South-West; the Irrigation circle has two executive divisions.

Expenditure.

167. The total outlay of the year from all sources amounted to Rs. 113,72,670 against a final grant of Rs. 1,15,24,977. The corresponding figures for the previous year were Rs. 92,83,119 and Rs. 99,58,330. The outlay for the year is shown in the following table:—

Expenditure on "44,—Military Works."

168. The total expenditure on military works was Rs. 7,60,145 as shown in the preceding statement.

Military works.

169. The following is a list of major works in hand during the year:—

Bhamo—

Quarters for 30 followers, Native Mountain Battery; commenced.

Mandalay—

Constructing bells-of-arms and two gun-cotton magazines in the Burma Sapper Lines; nearly completed.
Quarters for 41 followers in the North Madras Infantry lines; completed.
Constructing Staff offices; commenced.

Maymyo—

Quarters for British officers of the 1st Gurkha Rifles; nearly completed.
Barrack accommodation for Native regiment; nearly completed.

Shwebo—

Conversion of Native Infantry barracks into barracks for British Infantry; completed.

Meiktila—

Additional barracks for Native Infantry; completed.
Shingle roofing, Native Infantry barracks; completed.
Water-supply for cantonment; one-third completed.
Quarters for Barrack Sergeant; completed.

Southern Shan States—

Commissariat shelter huts on Fort Stedman-Kēngtūng mule-road; about half completed.

Kēngtūng—

Drainage of cantonment; completed.

Loikaw—

Barracks for Native Infantry; half completed.

Thayetmyo—

Improving British Infantry rifle-range; nearly completed.

Rangoon—

Quarters for a Major of the British Infantry; completed.
Armoury and store-shed for arsenal; completed.
Commissariat office; completed.
Artesian well for British Infantry lines; in progress.

Total expenditure on "45,—Civil Works."

170. The expenditure on civil works during the year was Rs. 58,48,758 subdivided as follows:—

	Original works.	Repairs.
	Rs.	Rs.
Civil buildings	25,61,248	5,01,798
Communications	10,78,464	15,21,791
Miscellaneous Public Improvements	1,36,229	49,228
Total ...	37,75,941	20,72,817

Expenditure on Civil buildings.

171. The expenditure on civil buildings is further divided as follows :—

	Original works.	Repairs.
	Rs.	Rs.
1.—Forest	29,268	771
2.—Customs	4,260	3,968
3.—Post office	14,161	13,865

11.—Medical	36,247	7,427
12.—Miscellaneous	4,72,522	1,71,382
13.—Minor departments (museums, monuments and antiquities) ...	99,094	1,874
Total ...	25,61,248	5,01,798

Civil buildings.

172. The following major works, civil buildings were in hand during the year :—

1.—*Forest.*

Salween district—

Forest office at Papun ; completed.

Amherst district—

Forest office at Moulmein ; completed.

Tavoy district—

Forest office at Tavoy ; completed.

Tharrawaddy district—

Vernacular Forest school at Tharrawaddy ; completed.

2.—*Customs.*

None.

3.—*Post Office.*

Katha district—

Combined Post and Telegraph office at Wuntho ; nearly completed.

Thatôn district—

Combined Post and Telegraph office at Thatôn ; commenced.

4.—*Telegraph.*

Mandalay district—

New Telegraph office at Mandalay ; commenced.

Bassein district—

Telegraph master's quarters at Diamond Island ; completed.

Rangoon Town district—

Additions to Telegraph Department store-yard ; completed.

5.—*Administration.*

(1) *Treasure-vaults.*—These vaults are for the temporary storage of revenue collected in outlying townships pending its transfer to district headquarters. They are being built gradually all over the province.

During the year the following were in hand :—

(i) *Katha district*—Banmauk, Tigyaing, Pinlèbu, and Mawlu.

(ii) *Upper Chindwin district*—Paungbyin, Tammu, Kalewa, and Mainkaing.

(iii) *Lower Chindwin district*—Yinmabin.

(iv) *Pakôkku district*—Yesagyo, Myaing, and Tilin.

(v) *Magwe district*—Yenangyaung.

(vi) *Yamèthin district*—Yindaw, Pyawbwè, and Lewè.

(vii) *Tharrawaddy district*—Letpadan, Gyobingauk, Minhla, Paungdè, Shwedaung, and Zigôn.

(viii) *Rangoon district*—Insein, and Taikkyi.

(ix) *Bassein district*—Wakèma, Kyaukpyaw, and Ngaputaw.

(x) *Arakan district*—Rathedaung, Pauktaw, Minbya, and Myohaung.

(2) *Record-rooms and treasury strong-rooms.*—There are three standard types of fire-proof record-rooms to suit requirements of different districts, and these buildings are being gradually provided at headquarters of districts.

The following have been in hand during the year:—

Record-room at Mogôk; completed.
First class record-room at Mandalay; completed.
Second class record-room at Shwebo; in progress.
Two third class record-rooms at Sagaing; in progress.
Intermediate class record-room at Magwe; in progress.
Intermediate class record-room at Pakôkku; in progress.
Second class record-room at Meiktila; in progress.
Second class record-room at Yamèthin; in progress.
Third class record-room at Thayetmyo; in progress.
Second class record-room at Toungoo; nearly completed.
Second class record-room at Thatôn; completed.
Third class record-room at Tavoy; completed.

6.—*Educational.*

The following works have been in hand:—

School for sons of Shan Chiefs at Taunggyi; in progress.
Normal school, Moulmein; completed.
College buildings, Rangoon; in progress.
Government Engineering school, Insein; in progress.

7.—*Ecclesiastical.*

The following works were in hand:—

Memorial church at Mandalay; commenced.
Extension of cemetery at Shwebo; in progress.

8.—*Law and Justice.*

Myitkyina district—
District court-house, Myitkyina; completed.

Katha district—
Subdivisional court-house, Banmauk; in progress.
Myoôk's court-house, Mawlu; nearly completed.

Ruby Mines district—
District court-house, Mogôk; commenced.

Mandalay district—
Police and Land Records office, Mandalay; completed.
Myoôk's court-house, Patheingyi; completed.

Upper Chindwin district—
Court-house combined for Subdivisional Officer and Myoôk at Homalin; completed.
Myoôk's court-house at Kalemyo; commenced.

Lower Chindwin district—
Subdivisional court and rest-house, Yinmabin; in hand.
Myoôk's court-house, Salingyi; completed.

Minbu district.
Court-house for Subdivisional Officer and two Myoôks, Salin; commenced.

Magwe district—
Myoôk's court-house, Myothit; commenced.

Meiktila district—
Court-house for Subdivisional Officer and Myoôk, Meiktila; commenced.

Kyauksè district—
Myoôk's court-house, Myittha; completed.

Southern Shan States—
Office and court for the Assistant Political Officer, Kēngtūng; completed.

Thayetmyo district—
District court-house, Thayetmyo; commenced.

Thatôn district—
District court-house, Thatôn; completed.
Myoôk's court-house, Bilin; completed.

Salween district—
Myoôk's court-house, Papun; completed.

Prome district—
Myoôk's court-house, Paungdè; completed.

Henzada district—
Witness-shed for district court-house, Henzada; completed.
Myoôk's court-house, Kyangin; completed.
District court-house, Henzada; commenced.

Thôngwa district—
Improvements to district court-house, Ma-ubin; completed.

Hanthawaddy district—
Court-house for two Myoôks, Insein; completed.

Bassein district—
Extending Commissioner's court-house, Bassein; completed.
Additions to Treasury office, Bassein; completed.

Myaungmya district—
Subdivisional court-house, Wakèma; commenced.
Myoôk's court-house, Pantanaw; completed.

9.—*Jails.*

Sawbwa's Jail at Thibaw—
The masonry enclosure wall round the existing jail was completed.

Pagan Jail—
Quarters for two Jailors were in hand.

Thayetmyo Jail—
Twenty solitary cells were in hand.
Six new latrines were completed.
Other minor additions and alterations were completed.

Insein Jail—
Six new cells were completed.
Mud wall round jail boundary was practically completed.
Undertrial ward with enclosure wall were in hand.
Erection of a palisading within the jail enclosure was in hand.
Extension of jail store-room was completed.

Insein Reformatory for Juveniles—
Construction of eight feet diameter well; nearing completion.

Rangoon Jail—
Alterations to the workyard; completed.
Extention of Press building; commenced.
Remodelling seven worksheds; completed.
Six-inch artesian well was sunk to a depth of 147 feet.

Bassein Jail—
In connection with the project for the extension of the jail to accommodate 1,300 prisoners, the following works were executed during the year :—

(1) Hospital; completed.
(2) Main entrance; completed.
(3) Compensation for land and houses, raising site, purchase of and repairs to a house for Assistant Jailor's quarters, quarters for 28 single and 20 married warders, and quarters for Hospital Assistant; completed.
(4) Constructing a 14-feet diameter well with pump; in hand.
(5) Undertrial ward; in hand.
(6) Granary; completed.
(7) Filling up low ground for use as a parade ground; in hand.
(8) Wards for civil and simple prisoners; in hand.
(9) Thirty solitary cells; in hand.
(10) Raising work-yard wall and lowering wall between work-yard and main jail; completed.
(11) Twelve solitary cells; in hand.

Toungoo Jail—

The following works were carried out:—

(1) Well with bathing troughs; completed.
(2) Four blocks of six solitary cells each; in hand.
(3) Eight new latrines; completed.

Tavoy Jail—

Quarters for Deputy Jailor and warders; completed.

Mergui Jail—

Enclosure wall and entrance office; practically completed.
Internal buildings; commenced.

Tharrawaddy Jail—

Experimental artesian well; completed.

Paungdè Jail—

Enclosure wall and entrance office; completed.
Conversion of old dormitory into ward for 80 prisoners; completed.
Latrine for ward; completed.
Bathing trough; completed.
Cook-house; completed.
Hospital ward with subsidiary buildings; completed.
Work-shed; completed.

Henzada Jail—

Enclosure walls, &c., raised 4 feet; completed.
New undertrial ward; in hand.
New female ward; in hand.
New civil ward; completed.
Extending four work-sheds; in hand.
Jailor's, Deputy Jailor's and Assistant Jailor's quarters; commenced.

Myaungmya Jail—

Entrance buildings, enclosure and divisional walls; completed.
Main ward; completed.
Compensation for land, levelling site, &c.; completed.
Three work-sheds; completed.
Well and shed for pump; commenced.
Cook-house; completed.
Latrines for main ward; completed.
Civil ward; commenced.
Female ward; commenced.
Undertrial ward; commenced.
Quarters for Assistant Jailor and Hospital Assistant; completed.
Warders' quarters with subsidiary buildings; in hand.
Hospital with subsidiary buildings; commenced.
Twenty separate cells; in hand.
Granary and store-room; commenced.

Palisading round centre of jail; in hand.
Ten solitary cells; in hand.

Kyaukpyu Jail—
Four additional solitary cells; commenced.
Three new work-sheds; completed.

Sandoway Jail—
Undertrial ward; completed.
Enclosure wall and spiral staircase to guard; completed.

(10)—*Police.*

(*a*)—*Civil Police.*

(1) *Cottages* have been built as under—

Kyaukpyu district—
Twenty cottages at Kyaukpyu; in hand.

Amherst district—
No. 3 station, Moulmein; completed.

Henzada district—
Cottages in Myanaung and Henzada subdivisions; in hand.

Akyab district—
Cottages at Myoma police-station, Akyab town; commenced.

(2) *Barrack accommodation* was provided as under—

Bhamo district—
Bhamo, for 7 married and 11 single men; completed.

Katha district—
Katha, for 24 single and 14 married men; completed.

Mandalay district—
Mandalay, for 6 Native Head Constables, 153 married men and 27 single men; nearly completed.

Minbu district—
Minbu, for European Inspector; completed.

Pakôkku district—
Pakôkku, for European Inspector; completed.

Meiktila district—
Meiktila, for European Inspector; completed.

Kyaukse district—
Kyauksè, for European Inspector and 24 single men; completed.

Myingyan district—
Myingyan, for European Inspector; completed.

Pegu district—
Pegu, for European Inspector; completed.

Thatôn district—
Thatôn, for Burman Inspector, 3 Head Constables, 9 Sergeants and 8 constables; completed.

Amherst district—
Moulmein, at No. 2 station; completed.

Tavoy district—
Tavoy, for Head Constable, 4 Sergeants and 26 men; commenced.

Tharrawaddy district—
Tharrawaddy, for European Inspector and 14 married men; in hand.

Prome district—
Prome, for Head Constable, 6 Sergeants, 27 married and 56 single men; completed.

Rangoon Town district—
Magyidan and Myetada guards, additional accommodation; completed.
Kemmendine, European Inspector's quarters; commenced.

Pazundaung, quarters for 10 married and 24 single men; completed.
Mogul Street, for European Constables; commenced.

Hanthawaddy district—

Taikkyi, for 6 married men; commenced.

Bassein district—

Bassein, for European Inspector; in hand.
Athegyi, Bassein town, for 8 married and 28 single men; completed.
Ngathainggyaung; commenced.

Myaungmya district—

Myaungmya, for 15 Head Constables and Sergeants, 25 single and 20 married men; completed.

(3) *Defensible thanas.*—There are four sizes of these buildings on type designs for subdivisional and township headquarters and outposts.

During the year the following were in hand:—

District.		Station.		Remarks.
		CLASS I.		
Lower Chindwin ...	1	Yinmabin ...		In progress.
Tharrawaddy ...	2	Zigôn ...	...	Practically completed.
Thôngwa ...	3	Ma-ubin ...	...	In progress.
Myaungmya ...	4	Wakèma ...	...	Completed.
		CLASS II.		
Upper Chindwin ...	5	Homalin ...	...	In progress.
Upper Chindwin ...	6	Kindat ...	...	Completed.
Magwe ...	7	Myingun ...	...	In progress.
Magwe ...	8	Natmauk ...	...	do.
Pakôkku ...	9	Yesagyo ...	...	Completed.
Myingyan ...	10	Kyaukpadaung	...	Nearly completed.
Tharrawaddy ...	11	Letpadan ...	...	In progress.
Prome ...	12	Paukkaung	...	Completed.
Rangoon Town ...	13	Pazundaung	...	do.
Kyaukpyu ...	14	Myebôn ...	...	In progress.
Amherst ...	15	Amherst ...	...	do.
		CLASS III.		
Hanthawaddy ...	16	Kyaiktaw ...	...	Completed.
Hanthawaddy ...	17	Pyawbwè ...	...	do.
Hanthawaddy ...	18	Thetthit ...	...	In progress.

Thayetmyo ...	34	Ywataung ...	...	Completed.
Toungoo ...	35	Pyu ...	...	do.
Mergui ...	36	Lenye ...	...	do.
Mandalay ...	37	Mandalay (No. 14 outpost).		Building not on type plan. In progress.
Hanthawaddy ...	38	Seikkyi ...	...	ditto.

(4) *Lockups—*

Ruby Mines district—

Mogôk, new lockup; completed.

Tharrawaddy district—
Tharrawaddy, extending old lockup; completed.

(5) *Training Schools—*
Myitkyina district—
New school at Myitkyina; completed.

Ruby Mines district—
New school at Mogôk; practically completed.

Pegu district—
New school at Pegu; completed.

Tharrawddy district—
New school at Tharrawaddy; completed.

Prome district—
New school at Prome; completed.

Bassein district—
New school at Bassein; completed.

(6) *Rifle-ranges—*
Range at Thamaing; nearly completed.

(*b*) *Military police.*

Myitkyina district—
New post at Sima for 180 men; in hand.
New post at Loignu for 75 men; practically completed.
Barracks for 9 officers and 300 men at Myitkyina; in hand.
Barracks for 57 men at Sadôn; completed.

Bhamo district—
Post at Shwegu; completed.
Post at Sinlumkaba; completed.
Armourer's shop at Bhamo; completed.

Ruby Mines district—
New lines for the battalion at Mogôk; completed.

Mandalay district—
Post at Madaya; completed.
Office for the Commandant at Mandalay; completed.

Northern Shan States—
Post at Taungyan; completed.
Armourer's shop at Lashio; completed.

Upper Chindwin district—
Post at Thamánthi; in hand.

Lower Chindwin district—
Cholera camp at Mônywa; completed.

Chin Hills—
Alterations to barracks at Tiddim; completed.

Pakôkku district—
Post at Kampelat; in hand.

Mergui district—
Barracks at Mergui; in hand.

Henzada district—
Native officers' quarters at Henzada; in hand.

Rangoon Town district—
Additional accommodation in lines at Rangoon; completed.
Armourer's shop at Rangoon; completed.
Additional stables at Rangoon; commenced.

Hanthawaddy district—
Additional quarters for 1 native officer and 6 married men at Insein; completed.
Family quarters and barracks at Twante; commenced.

Myaungmya district—
Barracks at Myaungmya ; completed.
Pegu district—
Hospital ward at Pegu ; completed.
Akyab district—
Improving quarter-guard at Akyab ; completed.
Northern Arakan district—
Barracks at Paletwa ; in hand.
Kyaukpyu district—
New police school ; completed.
Sandoway district—
Barracks at Taungup ; nearly completed.

11.—*Medical.*

Northern Shan States—
Civil hospital at Lashio ; in hand.
Upper Chindwin district—
Civil hospital at Paungbyin ; commenced.
Civil hospital at Kalewa ; commenced.
Meiktila district—
Additions and alterations to civil hospital ; completed.
Salween district—
Subsidiary buildings to hospital at Papun ; completed.
Amherst district—
Civil hospital at Amherst ; in hand.
Tharrawaddy district—
Subsidiary buildings to civil hospital at Tapun ; completed.
Henzada district—
Civil dispensary at Henzada ; completed.
Civil dispensary at Ôkpo ; in hand.
Akyab district—
Segregation camp and hospital at Akyab ; completed.
Rangoon Town district—
Additions to Lunatic Asylum at Rangoon ; completed.

12.—*Miscellaneous.*

(i) *Circuit-houses and Rest-houses.*

During the year the following have been built :—
Upper Chindwin district—
Circuit-house at Kindat ; commenced.
Lower Chindwin district—
Circuit-house at Mônywa ; completed.
Shwebo district—
Circuit-house at Shwebo ; commenced.
Thatôn district—
Circuit-house at Thatôn ; nearly completed.
Henzada district—
Inspection bungalow at Henzada ; completed.
Rest-house at Myanaung ; practically completed.
Myaungmya district—
Rest-house at Thayetkôn ; commenced.
Northern Arakan district—
Circuit-house at Paletwa ; nearly completed.

Sandoway district—
Circuit-house at Sandoway; commenced.

Kyaukpyu district—
Public Works Department inspection bungalow at Kyaukpyu; commenced.
Rest-house at Cheduba; commenced.

(ii) *Quarters for officers.*

Myitkyina district—
For the Township Officer at Kamaing; completed.
For the Battalion Commandant at Myitkyina; commenced.
For the Civil Surgeon at Myitkyina; completed.
For two Assistant Commandants at Myitkyina; completed.

Katha district—
For Civil Surgeon at Katha; completed.

Northern Shan States—
For the Assistant Political Officer at Kutkai; completed.
For the Police Subdivisional Officer at Lashio; completed.
For the Assistant Engineer at Maymyo; completed.

Upper Chindwin district—
For the Civil Subdivisional Officer at Kindat; completed.
For the Police Subdivisional Officer at Kalewa; commenced.
For the Police Subdivisional Officer at Mingôn; nearly completed.
For the Civil Surgeon at Kindat; commenced.

Lower Chindwin district—
For the Police Subdivisional Officer at Budalin; completed.
For the Police Subdivisional Officer at Yinmabin; completed.

Shwebo district—
For the Superintendent of Post Offices at Shwebo; nearly completed.

Sagaing district—
For the District Superintendent of Police at Sagaing; completed.

Kyauksè district—
For the Police Subdivisional Officer at Kyauksè; commenced.

Meiktila district—
For the Civil Subdivisional Officer at Meiktila; completed.
For the Police Subdivisional Officer at Meiktila; completed.

Myingyan district—
For the Assistant Commandant at Myingyan; commenced.

Pakôkku district—
For the District Superintendent of Police at Pakôkku; completed.
For the Police Subdivisional Officer at Pakôkku; completed.

Minbu district—
For the Subdivisional Police Officer at Minbu; completed.
For the Deputy Conservator of Forests at Minbu; commenced.
For the Superintendent of Land Records at Minbu; completed.

Southern Shan States—
For the Assistant Superintendent at Bampôn; completed.
For the Public Works Department Subdivisional Officer at Kalaw; commenced.

Toungoo district—
For the Deputy Commissioner at Toungoo; completed.
For the District Superintendent of Police at Toungoo; completed.
For the Deputy Conservator of Forests at Toungoo; commenced.
For the Superintendent of Jail at Shwegyin; completed.

Pegu district—
For an Upper Subordinate of the Public Works Department at Pegu; commenced.

Thayetmyo district—
For the Civil Subdivisional Officer at Allanmyo; commenced.
For the Police Subdivisional Officer at Allanmyo; completed.
For the Deputy Conservator of Forests at Thayetmyo; commenced.
For the Superintendent of Jail at Thayetmyo; commenced.

Thatôn district—
For the Deputy Commissioner at Thatôn; completed.
For the District Superintendent of Police at Thatôn; completed.
For the Police Subdivisional Officer at Pa-an; completed.
For the Public Works Department Subdivisional Officer at Kyaikto; completed.
For the Public Works Department Subdivisional Officer at Pa-an; commenced.

Salween district—
For the Public Works Department Subdivisional Officer at Papun; commenced.
For the Forest Officer at Papun; completed.

Mergui district—
For the Civil Surgeon at Mergui; improvements to the house purchased were completed.

Hanthawaddy district—
For the Police Subdivisional Officer at Kyauktan; completed.
For the Customs Officer at Elephant Point; completed.

Tharrawaddy district—
For the Deputy Commissioner at Tharrawaddy; improvements to quarters were completed.
For the Assistant Commissioner at Tharrawaddy; commenced.
For the Civil Subdivisional Officer at Zigôn; commenced.

Prome district—
For the Superintendent of Land Records at Prome; a house was purchased.

Henzada district—
For the Deputy Commissioner at Henzada; completed.
For the Police Subdivisional Officer at Myanaung; completed.

Bassein district—
For the Commissioner of Irrawaddy Division; completed.

Myaungmya district—
For the Civil Subdivisional Officer at Myaungmya; completed.
For the Civil Subdivisional Officer at Wakèma; completed.
For the Police Subdivisional Officer at Wakèma; completed.

Akyab district—
For the Police Subdivisional Officer at Kyauktaw; completed.
For the Police Subdivisional Officer at Buthidaung; commenced.

(iii) *Quarters for clerks.*

Public Works Department clerks' quarters at Taunggyi, Southern Shan States, were improved.

The construction of a fourth set (one block of four units of quarters) for Secretariat clerks in Rangoon was put in hand.

(iv) *Offices, &c.*

Offices for the Superintending Engineer of the North-Western, North-Eastern, and Irrigation Circles and Conservators of Forests, Northern and Southern Circles, at Myamyo; commenced.

Office for the Executive Engineer, Rangoon Division; completed.
Extending Public Works Department store-yard, Rangoon; in progress.
New office for the Executive Engineer at Akyab; in progress.
Laying out ground for public offices, &c., at Maymyo; completed.
Reclamation of Block H-2 in Rangoon; completed.

Expenditure on communications.

173. The expenditure on communications is subdivided amongst recognized main heads as below:—

	Original works.	Repairs.
	Rs.	Rs.
1.—Metalled roads { A.—Bridged and drained throughout ...	3,68,634	8,47,039
1.—Metalled roads { B.—Partially bridged and drained ...	2,671	33,257
2.—Unmetalled roads { A.—Bridged and drained throughout ...	3,10,284	2,56,976
2.—Unmetalled roads { B.—Partially bridged and drained ...	2,02,155	2,13,080
3.—Roads. Banked and surfaced with *muram* or similar material, but not drained.	8,623	...
4.—Roads. Banked, but not surfaced, partially bridged and drained ...	48,055	66,554
5.—Roads Cleared, partially bridged and drained	69,261	74,524
6.—Roads. Cleared only	37,367	24,676
7.—Boat-bridges and ferries	704	...
8.—Accommodation for travellers	30,710	5,187
9.—Arboriculture...	...	498
Total ...	10,78,464	15,21,791

Communications.

174. The following statement shows the total length of roads in each class maintained by the Public Works Department, including those opened during the year:—

Classification of roads.	Number of miles maintained by the Public Works Department at the end of 1898-99.	Number of miles opened during 1899-1900.	Total length of road maintained at end of 1899-1900.	Remarks.
1.—Metalled roads—				The differences are due to— (i) incorrect mileages given before; (ii) lengths of several roads reduced, due to realignment; (iii) raising in class.
A.—Bridged and drained throughout ...	1,268·30	33·09	1,301·39	
B.—Partially bridged and drained ...	112·50	4·00	116·50	
2.—Unmetalled roads—				
A.—Bridged and drained throughout ...	1,195 51	211·45	1,406·96	
B.—Partially bridged and drained ...	735 24	27·00	762·24	
3.—Roads— Banked and surfaced with *muram* or similar material, but not drained.	*Nil*	*Nil*	*Nil*	
4.—Roads— Banked, but not surfaced, partially bridged and drained.	950·70	*Nil*	950·70	
5.—Roads— Cleared, partially bridged and drained ...	1,124·03	7·51	1,131·54	
6.—Roads— Cleared only	526·15	24·25	550·40	
Total ...	5,912·43	307·30	6,219·73	

(1) *Metalled roads.*—The most important works are the following:—

Ruby Mines road.—A little over eight miles of metal was consolidated during the year; the road is now metalled throughout with the exception of about 6½ miles.

Road from Thazi to Taunggyi.—A large number of bridges and culverts have been renewed and replaced by masonry structures.

Myingyan-Fort Stedman road.—Portions of 16 miles between Thazi and Taunggyi were metalled during the year.

Pyuntaza-Nyaunglebin road; earthwork and bridges in progress.

Moulmein-Kyaikmaraw road.—First section, Nganti to Penwegôn; completed.

Enzouk-Longlôn road, Tavoy district; completed.

Renewing bridges on Henzada-Ngathainggyaung road; completed.

Improvement to Kyangin-Phetyè road, Henzada district; completed.

Masekhu-Kyontani road, Henzada district; in progress.

Rangoon-Prome Road.—Metalled surface on fourth and fifth miles widened to 20 feet; widening 2½ miles between Tharrawaddy and Thônzè in hand, as well as renewing several bridges along the road.

Branch road from Insein to Prome road; re-metalled.

Hlawga-Htaukyan road; bridges renewed.

Kyauklay-Zinchaung road; completed.

Bridges have been in hand as follows:—

The Hlègu bridge on Rangoon-Pegu road; commenced.

Bridge over the Pegu-Sittang canal at Waw; completed.

The Thapanzeik stream bridge on the Ôkpo-Mônthama road, Henzada district; completed.

Bridge on 8th mile of Insein road; completed

Bridge No. 43 on Kabin-Kungyangôn road, Hanthawaddy district; commenced.

Work has been carried out on new or improving station roads at Myitkyina, Bhamo, Lashio Taunggyi, Nyaunglebin, Thatôn, Rangoon, and Myaungmya.

(2) *Unmetalled roads.*—In the Myitkyina district the Waingmaw-Sandôn and the Hopin-Lontôn roads were in hand.

In the Bhamo district the Bhamo-Namkhan and the Bhamo-Sikaw roads were completed.

In the Katha district improvements to the Singôn-Kawlin and Singôn-Wuntho roads were in progress.

In the Lower Chindwin district work on the Mônywa-Yinmabin road was in progress.

In the Shwebo district the bridging of the Ye-u-Nwabetkyi road was completed.

In the Sagaing district improvements to the Ava-Myotha road were in hand.

In the Minbu district improvements to the Sagu-Panhlwa-Aingma road were in hand.

In the Kyauksè district the Minzu-Dayegaung and Singaing-Wuntho road were in hand.

In the Toungoo district the Pyu-Ôkpyat road was raised and improved.

In the Pegu district the Kawa-Ohnè road was completed and the Tôngyi-Intagaw and Ywathit-Kyungyoung roads were in hand.

In the Thatôn district the Pa-an-Nyaunglôn road was practically completed, and the Yenyin-Kyettuywethaung, Pa-an-Hlaingbwè, and Shwegu-Hlaingbwè roads were in hand.

In the Amherst district work has been started on the Kawkareik-Myawaddy road.

In the Henzada district the renewal of bridge No. 26, 100 feet waterway, on the Akauktaung hill road was completed and improvements to the Seiktha road commenced.

(3) *Fair-weather roads.*—In the Myitkyina district the Pongatông-N'Sentaru road was about two-thirds completed; the Mogaung-Nanyaseik road nearly completed; and the Waingmaw-Kazu road commenced.

In the Bhamo district the Momauk-Sinlumkaba road was nearly completed; the Mongwan Valley road about half finished; the Sinkan-Sikaw road commenced; Bhamo-Mansi road bridges lengthened; and the Chinese Frontier road about half completed.

In the Katha district improvements to the Wuntho-Pinlebu road were in hand.

In the Lower Chindwin district the Pa'è-Yinmabin road was commenced.

In the Pakôkku district the Saw-Mount Victoria road was completed.

In the Southern Shan States the Taunggyi-Kēngtūng road was in hand; Fort Stedman-Taunggyi (Fort Stedman-Hopôn) road nearly completed; bridge over the Pun river at Mông Pawn practically completed.

In the Toungoo district the Toungoo-Thandaung road was nearly completed; and the Yedashè-Kyweyaingbyin road completed.

In the Pegu district the bridge over the Pegu-Sittang canal at Thanatpin was completed.

In the Tavoy district the Longlôn-Zalut road was in hand.

In the Tharrawaddy district the Gyobingauk-Myodwin road was completed.

In the Henzada district the Henzada-Ôkpo road was completed.

In the Thôngwa district the bridge at Kyôntanaw on the Danubyu-Kyôntani road was nearly completed.

(4) *Accommodation for travellers.*—In addition to inspection bungalows provided as part of all roads under construction, the following rest-houses have been in hand:—

In the Bhamo district at Sinlumkaba; completed.
In the Pakôkku district at Yenangyat; completed.
In the Chin-Hills at mile 28 of the Indin-Falam road; completed.
In the Thatôn district at Gangaw on the Martaban-Kyaikto road; in hand.
In the Pegu district at Deiku and Dabein; completed and at Pyuntaza; in hand.
In the Kyaukpyu district at Ramree; in hand.

Miscellaneous public improvements.

175. The expenditure on miscellaneous public improvements is subdivided under the following main heads:—

(1) Improvements to towns.
(2) Markets.
(3) Paving and streets.
(4) Water supply.
(5) Sewage and drainage.
(6) Harbours.
(7) Light-houses.
(8) Miscellaneous.

With the exception of light-houses, which are provincial, works under these heads are carried out principally from district funds, and expenditure has been as follows:—

Main heads.	Original works.	Repairs.	Total.
	Rs.	Rs.	Rs.
Light-houses	62,586	23,541	86,127
Other works	73,643	25,687	99,330

Under improvements to towns are included roads and drains. Work of this nature has been done at Maymyo in the Mandalay district; at Meiktila; on Zigôn-Thabyagôn road and Minhla *chaung* road in the Tharrawaddy district; and at Myohaung in the Akyab district.

Under *Markets*, bazaar buildings have been in hand at Oktwin in the Toungoo district; at Deiku, Hlègu, Pyuntaza, Nyaunglèbin, Peinzalôk, Penwègôn, Tawa, and Dabein in the Pegu district; at Neikban in the Henzada district; at Bogalè in the Thôngwa district; at Taikkyi and Kungyangôn in the Hanthawaddy district; at Maulanyaingyan in the Myaungmya district; and at Minbya in the Akyab district.

Under *Paving and Streets* roads were made in the railway town at Kanyutkwin in the Toungoo district; in the village of Thanatpin and in the railway towns at Peinzalôk, Deiku and Nyaunglèbin in the Pegu district.

Under *Water-supply*, a lake was made at Bhamo; pipe water-supply for Maymyo in the Mandalay district was taken in hand; also wells for bathing purposes at Meiktila.

Under *Sewage and Drainage*, the intercepting of the drainage of Meiktila town into the lake was in hand.

Under *Harbours*, the following works were in hand:—

A pontoon at Duyinzeik in the Thatôn district; tide-gauges in the Salween river in the Amherst district; wharves at Victoria Point, Palaw and Mergui, and Western beacon at Mergui in the Mergui district; landing stage at Kungyangôn in the Hanthawaddy district; wharf at Myaungmya, and protecting river bank at Wakèma in the Myaungmya district; renewing flooring of main wharf at Akyab.

Under *Light-houses*, the following works were in hand:—

New light at Alguada Reef; in hand.

Screw-piled beacon on Oyster Reef; in hand.

Improvements to roof of quarters for establishment at Table Island; completed.

Renewing the foundation piles of China Bakir Light-house; in hand.

Mast-head light with quarters for crew, on Zallatong Island, Sandoway anchorage; in hand.

Under *Miscellaneous*, the erection of pillars to mark the Chinese boundary was in hand.

Minor works and navigation.

176. *Canals.*—During the year the following works were in hand in connection with the Pegu and Sittang canal:—

(1) Renewal of gates to Myitkyo lock completed and improvements to lock chamber in hand.

(2) Construction of masonry regulators across Twebat and Singyidaing creeks commenced.

(3) Raising left embankment of the Pegu river where breached in 1899, nearly completed.

On the Sittang-Kyaikto canal—

The approach channel from the Sittang to the Mopalin lock, the junction canal from Mopalin to the Supanu weir, and the Supanu weir were completed.

On the Kyaikto-Bilin canal—

The erosion by the Sittang river continued, hence all work was suspended.

River conservancy.—The usual work of removal of snags, deepening channels, buoying, and cutting trees on the banks where erosion occurs to prevent snags, was carried on in the Chindwin, Myitta, Yu, Uru, and Yunzalin rivers.

A cutting to avoid three bends on the Twante creek was commenced and land acquired along the canal for spoil banks.

Tanks.—In the Shwebo district the replacement of wooden sluices by masonry ones in nine tanks was completed.

Embankments.—The Ma-ubin embankment was raised and widened between miles 51 and 58¾. A preliminary survey for the drainage of Thôngwa island was undertaken.

IRRIGATION WORKS (PROVINCIAL).

A.—*Zawgyi river.*

Nwadet canal system.—The river weir was completed, and about two-thirds of the upper 6 miles regraded. The remodelling of the Kunzè branch and the tail portion of the Nwadet canal were completed.

The head of the Kadu distributary was provided with a regulating bridge, and that of the Ngu distributary strengthened.

Thindwè canal system.—Head weir and regulator for canal and remodelling completed.

Minyè canal.—Remodelling practically completed.

B.—*Panlaung river.*

Kindat canal system.—The race in the weir was provided with automatic falling shutters. The head regulator for the Ngalaingzin canal and Daing branch were completed.

Nathlwè canal.—Head regulator completed.

177. *Meiktila Lake project.*—The works to provide the lake with sufficient escape capacity to obviate risks of a breach occurring were completed. As also improvements to the north sluice distributaries.

Meiktila district.

178. *Bomba weir.*—One wing wall was reconstructed and the crest lowered two feet and provided with automatic falling shutters.

Yamèthin district.

179. *Kanna tank.*—Restoration continued, the embankments were nearly completed, two falls in escape channel finished, and distributaries elaborated.

Myingyan district.

180. *Shwetachaung canal.*—The banks were raised, one escape and a quarter of the permanent outlets completed.

Mandalay district.

181. *Man canal.*—Work was commenced on the weir and falls, and the earthwork in remodelling nearly completed.

Minbu district.

Salin canal.—Surveys for head weir were made.

IRRIGATION WORKS (IMPERIAL).

182. *General.*—The expenditure up to the end of the year under review was Rs. 26,78,462 and the forecast of expenditure to completion showed the total probable cost as Rs. 46,57,880. A revised estimate is under preparation.

Mandalay canal.

Headworks.—The 10 feet under sluices were changed to four openings of 32·5 feet each and nearly completed. The canal head regulator was carried up to road-level and nearly finished.

Thapangaing aqueduct.—This work was carried up to skew-back level; as the torrent is very treacherous it was considered too great a risk to commence arch-work, for which centres and materials are in readiness for next working season.

Drainage crossings.—Most of these were completed.

Earthwork.—Summary—

(1) From 0—6½ miles, three-fifths finished.
From 6½—17 miles, four-fifths finished.
From 17—31 miles, nine-tenths finished.
From 31—39½ miles, half finished.

Railways.

183. The length of line open to traffic on the 31st March 1900 was 993·2 miles as compared with 936·1 miles at the end of the previous year. The extension of the Meiktila branch to Myingyan, 57 miles, was opened for traffic of all descriptions on the 15th November 1899. The Myohaung-Sedaw section, 13 miles, of the Mandalay-Kunlông Railway was open throughout the year for goods traffic only.

Length of line.

184. Bridge No. 273 at mile 92½ on the Prome section, two spans of 20 feet and one span of 40 feet, was badly damaged by logs floated down the stream on August 25th, 1899; it has since been rebuilt as one span of 100 feet.

Works completed and in progress.

Two bridges on the Mu Valley section near Kinu were washed away in May and a bridge near Naba partly destroyed.

The Sagaing-Alôn branch was nearly ready to open by the end of the year.

On the Mandalay-Kunlông railway very serious damage was caused by an abnormally heavy rainfall during July, August, September, and October; the rainfall was said to be quite unprecedented in the district and culminated in a tremendous flood on the 31st October 1899, which breached the line in 41 places between Tônbo and Wetwin. This delayed the opening of the line for traffic by some months, but on the 31st March it was ready for opening up to Nawnghkio, 73 miles from Myohaung. The material for the Gôkteik bridge began to arrive in Rangoon in October, and about four spans were erected by the end of March. Good progress was made on the work up to Lashio, which will be the terminus of the line for the present.

The report and project estimates for the proposed Kinu-Kabwet-Thabeitkyin branch were submitted in September 1899.

Progress was made with the Salween extension surveys, but the survey parties were recalled in February 1900, owing to the disturbed state of the country; the survey camp was attacked by Was on February 8th, two natives of the party being wounded and a considerable quantity of stores and kit lost.

The Bassein-Henzada-Letpadan branch, 119 miles long, was sanctioned by the Government of India in January 1900, and the construction of the line commenced.

Further borings for the Sagaing bridge over the river Irrawaddy were made during the cold weather.

Capital transactions.

185. The capital outlay on the Burma Railways system during 1899-1900 was Rs. 78,14,726. The total capital expenditure since the commencement has been Rs. 10,37,51,501, out of which the outlay by Government from the commencement to end of August 1896 is Rs. 7,69,12,324.

Revenue transactions.

186. The gross earnings of the year compared with those of 1898·99 were :—

	Rs.
During 1899-1900	94,93,925
During 1898-99	86,60,998
or a net increase of Rs. ...	8,32,927

The working expenses compare as under :—

	Rs.
During 1899-1900	55,51,159
During 1898-99	52,81,921
or a net increase of Rs. ...	2,69 238

The net earnings were as under :—

	Rs.
During 1899-1900	39,42,766
During 1898-99	33,79,077
or a net increase of Rs. ...	5,63,689

Traffic and working.

187. There was an increase of 21·47 miles in the mean mileage worked during 1899-1900, due to the opening of the Meiktila-Myingyan section of 57·21 miles from 15th November 1899.

The train-mileage run was 30,22,644 or an increase of 89,860 train-miles in comparison with the figures for 1898-99.

The average earnings per mile per week were Rs. 190·66; the average earnings per train-mile Rs. 3·14; the expenses per train-mile Rs. 1·84; the percentage of expenses to earnings was Rs. 58·47; the capital outlay to end of the year on open line was Rs. 8,70,04,392; and the percentage of net receipts on capital outlay Rs. 4·5.

Telegraphs.

General.

188. A departmental wire was erected from Mandalay to Kalewa, a distance of 190 miles. An extra wire was erected from Prome to Taungup and from Rangoon to Ma-ubin, and a fourth wire was erected on the Akyab-Taungup line, distance 193 miles. Cables were laid across the Irrawaddy and in the Koladyne in connection with the extra wires from Prome and Akyab to Taungup. A new line was constructed along the Railway from Meiktila to Myingyan and a second wire was erected for the Mandalay-Kunlông Railway from Sadaw to Naunghkio and for the Sagaing-Alôn Railway from Sagaing to Alôn. One hundred and thirteen miles of line were dismantled.

Offices and traffic.

189. A new Government office was opened at Masein in the Upper Chindwin district and combined Post and Telegraph offices were opened at Tharrawaddy, Pazundaung, Myawaddy, Thabyegan and Mudôn. The offices at Namkhan and Nanyaseik were closed. The new building for the Telegraph office at Mandalay was completed. The total number of offices opened for paid telegrams increased from 238 in 1898-99 to

262 in 1899-1900. There were at the close of the year a total of 416 offices, of which 154 were not open for paid telegrams. The number of telegrams despatched from Government offices was 665,983 against 621,201 in 1898-99, being an increase of 45,782.

Line and wire mileage.—The total mileage of lines in the Province decreased by 113 and the total mileage of wire increased by 638. Wheatstone's automatic working system has been successfully established between Rangoon and Calcutta at a speed of 100 words a minute and experiments are being made to work Rangoon to Madras and Bombay with Calcutta in translation; so far only about 50 words a minute have been accomplished but better results are expected.

Post Office.

190. The administration of the Post Office in Burma is controlled by a Deputy Postmaster-General, assisted by six Superintendents of Post Offices, one Superintendent of the Railway Mail Service, and three Inspectors in charge of minor divisions.

Administration.

191. During the official year 1899-1900 Mr. W. T. VanSomeren, C.I.E., was in charge of the circle from the 1st April to 27th November 1899, when he was relieved by Mr. F. Whymper.

Charge of circle.

192. The British India Steam Navigation Company continued its various services with efficiency and great punctuality. The English Mails are usually due to be received in Rangoon on Thursdays, but during the year under report they were actually received on—

Mail Service.
British India Steam Navigation Company.

	Occasions.
Wednesdays	13
Thursdays	29
Fridays	6
Saturdays	2
Total ...	50

The outgoing steamer with English mails continued to leave Rangoon at 2 P.M. throughout the year, and there was no unusual delay or accident.

193. The Irrawaddy Flotilla Company also worked its different contract services satisfactorily. There was no very serious delay in departure or arrival of mail steamers.

Irrawaddy Flotilla Company.

194. The Burma Railways Company opened a branch line from Meiktila to Myingyan, 57 miles, on the 15th November 1899. Mails for the districts of Myingyan and Pakôkku hitherto sent *viâ* Mandalay and thence by steamer, are now sent direct by train giving an earlier delivery at Pakôkku and Myingyan of about 24 hours. The running of trains over the Burma lines left much to be desired, as there was much unpunctuality. On 63 occasions mail trains arrived late at terminal stations by two hours or more, namely—

Railways.

	Times.
Rangoon to Prome	21
Mandalay to Rangoon	16
Prome to Rangoon	5
Rangoon to Mandalay	8
Naba to Mandalay	13
Total ...	63

Misconnections at Myohaung (for Mu Valley) and at Thazi (for Myingyan) also occurred on many dates, causing 24 hours' detention to mails.

Owing to floods the railway (Mu Valley) was breached at three points on 23rd May 1899, and a trolly service had to be organized for transit of mails. The resulting detention to mails for districts of Myitkyina, Bhamo, and Katha was about 12 hours. Communication was restored on the 28th May 1899. From the 25th to 28th August 1899 another breach occurred on the Sittang line between Payagyi and Pyinbôngyi, causing delay to mails of three or four hours.

195. The following statement shows the mileage and various modes of conveyances of mails in Burma:—

	Railway lines.	Mail cart or pony lines.	Runners and boat lines.	Steamer lines.	Total.
Imperial	979¾	823½	1,156½	5,895½	8,855
District dâk	...	23	1,555½	223	1,801
Total of 1899-1900 ...	979¾	846½	2,712	6,118½	10,656¾
Total of 1898-99 ...	922¾	825½	2,816	6,054	10,618¼
Increase	57	21	...	64½	38½
Decrease	...	...	104	...	...

The decrease in runners and boat lines is due to closing of lines—

Lashio to Kutkai. | Ava to Tada-u.

Kamaing to Nanyaseik.

Post offices.

196. The following statement shows the total number of post offices of the Imperial and district dâk establishments in existence at the close of the official year 1899-1900:—

	Head office.	Sub-office.	Branch office.	Total.
Imperial	34	86	64	184
District dâk	...	1	102	103
Total of 1899-1900 ...	34	87	166	287
Total of 1898-99 ...	34	89	153	276
Increase	...	...	13	11
Decrease	...	2	...	...

The decrease in the total number of sub-offices by two is due to the conversion of two Imperial sub-offices into branch offices.

During the year under review four Imperial branch post offices were opened and six closed in consequence of the offices not being self-supporting and 17 district dâk offices were opened and four closed.

With a view to develop the postal system in Upper Burma, the district dâk was extended, with effect from the 1st December 1899, to Mandalay, Sagaing, Lower Chindwin, Yamèthin, Meiktila, and Kyauksè districts. The effect as regards the year under review was that 10 post offices, three village postmen, three postmen, and six runners were sanctioned at an annual cost of Rs. 5,796.

Letter-boxes.
Postmen and village postmen.

197. The following statement shows the total number of Imperial and district dâk letter-boxes opened for the convenience of the public in towns and important outlying villages where there are no post offices, and the total number of district dâk and Imperial postmen and village postmen in existence at the close of the year 1899-1900:—

	Letter-boxes.	Postmen.	Village postmen.	Total.
Imperial	412	284	55	758
District dâk	755	11	174	940
Total for 1899-1900 ...	1,174	295	229	1,698
Total for 1898-1899 ...	1,129	262	224	1,615
Increase	45	33	5	83
Decrease	...	...	...	...

The increase under all heads indicates that the advantages of postal communications are gradually being appreciated by the public.

Articles delivered.

198. The following statement shows the number and classes of postal articles delivered in Burma during the year 1899-1900 :—

Year.	Letters and post-cards.	News-papers.	Packets.	Parcels.	Total.
1899-1900	14,456,397	1,289,310	2,282,996	206,094	18,234,797
1898-99	13,755,573	1,721,496	1,720,975	219,626	17,417,670
Increase	700,824	...	562,021	...	817,127
Decrease	...	432,186	...	13,532	...

The increase in number of articles delivered by 4·7 per cent. is due to natural expansion of business.

Out of 14,456,397 letters and post-cards, 3,492,866 were in Burmese and Chinese character, *i.e.*, 24 per cent.

The total number of letters registered by the post office in Burma was 333,557 against 305,323 of last year.

Money-orders.

199. A statement of ordinary, telegraphic, and foreign money-orders issued and paid is given below.

Year.	Money-orders issued.		Money-orders paid.	
	Number.	Amount.	Number.	Amount.
		Rs.		Rs.
1899 1900	708,711	2,62,22,020	203,447	1,09,18,876
1898-1899	660,124	2,46,56,080	188,405	1,01,29,617
Increase	48,587	15,65,940	15,042	7,89,259
Decrease	...	...	...	...

The number of money-orders issued has increased by 7 per cent., and by 6 per cent. in value. The commission realized was Rs. 3,72,258 against 3,52,008 last year, an increase of 5·8 per cent. The number of money-orders paid has increased by 7·9 per cent., and in value 7·8 per cent.

Under the orders of the Government of India, the system of paying money-orders in sovereigns was introduced into Rangoon from 23rd March 1900. So far the scheme has worked smoothly and without complaint from the public. About £830 in gold was paid out daily.

200. The following statement shows the Post Office Savings Bank transactions :—

Year.	Deposits.		Withdrawals.		Accounts open and balances.	
	Number.	Value.	Number.	Value.	Number.	Value.
		Rs.		Rs.		Rs.
1899-1900 ...	61,794	20,18,645	27,597	15,53,055	52,690	82,61,515
1898-99 ...	65,626	21,12,658	26,925	15,41,306	50,304	77,11,239
Increase ...	...	...	672	11,749	2,386	5,50,276
Decrease ...	3,832	94,013	...	...	...	...

The decrease in number of deposits does not call for any special remark. The amount of interest paid on closed accounts during the year under review was Rs. 17,309 against 16,488 in the previous year.

201. The following statement shows insured and value-payable articles and ordinary parcels posted in the Burma circle during the official year ending 31st March 1900:—

Year.	Insured articles.			Value payable articles.			Ordinary parcels.	
	Number.	Value.	Insurance fee.	Number.	Value.	Commission.	Registered	Unregistered.
		Rs.	Rs.		Rs.	Rs.		
1899-1900 ...	12,904	47,32,435	12,684	58,603	12,79 766	17,904	70,877	1,148
1898-99 ...	12,156	40,87,530	11,189	56,514	11,76,940	16,469	66,669	946
Increase ...	748	6,44,905	1,485	2,089	1,02,826	1,435	4,208	202
Decrease ...	...	...	...	...	...	...	...	...

The increase in insured articles is due to the increased business of the Ruby Mines. Insurance at Mogôk alone amounted to Rs. 18 lakhs during the year under review.

Combined offices.

202. The total number of combined post and telegraph offices open at the end of the year was 76 against 71 last year, and during the year under report six combined offices were opened and one closed.

The business and revenue expanded considerably. Messages increased from 285,200 to 312,159, and receipts from Rs. 1,25,845-6-0 to Rs. 1,43,511. The expenditure was Rs. 54,471. Of the 76 offices 40 were authorised to receive foreign messages.

Receiving offices.

203. In addition to the combined post and telegraph offices, there were 109 receiving offices on the 31st March 1900, where telegrams can be posted for despatch to the nearest telegraph office for onward transmission by wire.

Telegrams and revenue of these offices rose from 2,850 for Rs. 2,182-3-0 to 3,103 for Rs.2,687-7-0.

Sale of quinine.

204. Under the orders of the Local Government the price of a dose of powder was increased from 3 to 4 pies. This change had effect from 4th November 1899. The increase in sale was 15·33 per cent. The number of doses sold was 148,384 during the year under review against 128,635 of the previous year.

Theft and robbery.

205. Two cases of highway robbery were reported during the year, but one turned out to be a mere theft. The other case occurred in the Southern Shan States on the 19th June 1899. The runner conveying a mail from Taunggyi to Bampôn was cut down by a Shan, the mail bags were cut open and contents strewn about, but nothing was stolen, the robber probably being disturbed. The man was subsequently arrested and received seven years' rigorous imprisonment.

Employment of women and pensioned soldiers.

206. Two Burmese and eight Eurasian and European women clerks, and seven pensioned soldiers, were on the strength of the post offices at the close of the year 1899-1900.

V.—REVENUE AND FINANCE.

1.—Revenue.

(*a*) *Lower Burma.*

207. The following statement exhibits the collection and, where known, the demand, remissions, net demand and the collections under each principal head of Civil Revenue (including Forests) during the past two years in Lower Burma:—

Item of revenue.	1898-99.				1899-1900.				Increase or decrease of demand.	Increase or decrease of collections.
	Demand.	Remissions.	Net demand.	Collections.	Demand.	Remissions.	Net demand.	Collections.		
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

14. Income-tax	..	...	...	†9,51,642	...	...	...	9,82,742	...	+ 31,100
Total ...	...	...	...	4,26,05,181	...	...	...	4,31,74,462	...	+ 5,69,281

208. The collections of land revenue rose by Rs. 10,08,730. ‡ The area assessed and the revenue demand rose by 3·35 and 7·45 per cent. respectively. Remissions increased by Rs. 29,469 or more than 40 per cent. on the figures of 1898-99. The increase in remissions was mainly due to the heavy floods from which Hanthawaddy suffered. The advance in collections followed on the introduction of revision settlement rates into parts of Bassein and Myaungmya districts, on the introduction of intermediate rates prior to re-settlement in Hanthawaddy, Tharrawaddy, and Pegu, and on the extension of the cropped area. The number of coercive processes fell largely, and there was only one committal to jail. There was a satisfactory absence of outstandings of revenue in Kyaukypu district. The plan of allowing low rates on fallows without application was used freely, and the concession proved a great boon to the small cultivator. The application of the concession needs, however, careful watching, as it may otherwise unduly benefit speculators who have taken up land with no intention of cultivating it.

Land revenue.

209. The number of capitation-tax assessees rose to 1,066,072: the increase was 8,973 or only 25 per cent. of the increase in 1898-99. The figures of 1898-99 would seem to have been incorrect, at least in Kyaukpyu. Coercive processes were on the whole less frequently resorted to. Land rate in lieu of capitation-tax produced a slightly higher revenue than in 1898-99.

Capitation-tax.

210. The total demand from fisheries rose by 8 per cent., almost the whole of the increase falling under the head *Rents of Leased Fisheries*, the revenue from licenses for fishing instruments remaining stationary. In Sandoway the increase in the number of licenses issued and in the revenue was very satisfactory. The fishing season in the Irrawaddy division was expected to be an excellent one, but the large captures of im-

Fisheries.

* Revised figures.

† Includes collections by Accountant-General on salaries in Upper Burma.

‡ Excludes differences of Rs. — 6,712 on excess collections and Rs. — 66,937 on collctions of net outstandings between the figures of 1898-99 and 1899-1900.

mature fish reduced prices, and there was difficulty in collecting the revenue demand. Complete orders on Captain Maxwell's report on the delta fisheries have not yet been passed but will probably issue shortly.

Miscellaneous receipts.

211. The most notable increases under miscellaneous heads consist in receipts under the Village Act and survey fees for land granted (*pottas*).

Agricultural advances.

212. Rupees 82,488 were advanced under the Land Improvement and Agriculturists Loans Act against Rs. 10,850 in the year 1898-99. Much diversity of practice exists: in some districts cultivators take up the loans readily, whilst in others no loans are said to be required. Lack of funds caused no less than 553 out of 669 applications to be rejected in Tharrawaddy.

Revenue collection and revenue business.

213. The number of circle thugyi's fell from 415 to 395, the system of revenue collection by village headmen having been introduced into 22 new circles. The total commission earned by circle thugyis was—

	Rs.
Land revenue collections	4,12,404
Capitation-tax	2,09,075

The deduction from their commissions on account of survey charges was Rs. 1,80,057 or 43·66 per cent. on the land revenue collections. The number of revenue-collecting village headmen increased by 333 to 4,364. They worked well as a body.

(*b*) *Upper Burma.*

214. The following statement exhibits the collections and, where known the demand, remissions, net demand, and the collections under each principal head of Civil Revenue (including Forests) in Upper Burma during the past two years:—

Item of revenue.	1898-99.				1899-1900.				Increase or decrease of demand.	Increase or decrease of collections.

Total ...	...	..	...	1,39,43,802	...	...	...	1,41,56,433	...	+2,12,631

Thathameda.

215. The number of households assessed to *thathameda* rose to 631,244, the highest figure reached since the Annexation. Every division contributed to the increase, but the apprehension is expressed that the subdivision of families might have been occasionally carried to excess. Collections fell slightly owing to the imposition of a lower rate of *thathameda* with the introduction of assessment on non-State lands. The decrease in collection will continue as new districts come under settlement. The season was generally favourable to cultivation, and remissions fell from Rs. 1,16,468 to Rs. 30,502. Of this comparatively small sum, approximately a quarter was remitted in Shwebo. The constant remissions called for by this district will cease with the construction of the Shwebo canal. In Minbu and Kyauksè the adoption of the system of assessing land left the total fiscal demand of the district practically unchanged. In Mandalay there was a loss for the year of Rs. 45,424. This in a great measure was, however, due to destructive floods and to the restriction of the new assessment to the *kaukkyi* crop.

* Revised figures.

† Excludes collections by Accountant-General on salaries in Upper Burma.

Ordinary land revenue.

216. The large increase over the revised figures of 1898-99 of Rs. 4,00,631 in the demand and of Rs. 4,05,494 in the collection of ordinary land revenue was due to the assessment to land revenue for the first time of non-State lands in the Minbu and Kyauksè districts and throughout the Mandalay division. Taking into account concurrent reductions of *thathameda*, the resulting increase from the new system was not higher than Rs. 28,041. Remissions were high in Mandalay, where floods caused much damage. In the unsettled portions of the Sagaing division produce rates are still assessed; whilst in the districts of the Mandalay division similar areas are being assessed at acre rates.

Miscellaneous revenue: General and fisheries.

217. The demand of miscellaneous land revenue rose by over one and-a-half lakhs, the greater part of the increase coming under the heads of "Fisheries" and "Petroleum." Under "Fisheries" the demand rose by almost half-a-lakh and was higher than the demand of any year since the Annexation. Collections rose by Rs. 14,000, although in Mandalay district large remissions had to be given on account of damage done by floods. This district nevertheless, which contributes approximately one-third of the whole fishery revenue, accounted for Rs. 11,060 of the increase, whilst collections in Katha, Ruby Mines, and Bhamo were noticeably smaller than in 1898-99.

Miscellaneous revenue: Water-rate.

218. In Shwebo a good rainfall and the personal attention given to the work of assessment by the Deputy Commissioner led to an increase in collection of Rs. 90,815, all of which was collected during the year: the area under irrigation rose from 19,960 acres to 62,763. In Kyauksè the water-rate was levied in a consolidated sum with the general land revenue, and the figures for the district show accordingly a nominal decrease. The principle of including water-rate in a consolidated land revenue demand will be followed in the assessment of irrigated non-State land in other districts, and receipts under the separate head of "Water-rate" will accordingly disappear. The method of assessment of the lands which will be irrigated from the Mandalay canal is under consideration.

Miscellaneous revenue: Petroleum.

219. The increase in the revenue from petroleum of more than a lakh of rupees represents an increased output of over eight million gallons. The Minbu oil-field has been finally abandoned, but the development of both the Yenangyat and Yenangyaung fields is steadily progressing.

Miscellaneous revenue: Rubies and jade.

220. The value of the output of the Ruby Mines rose from Rs. 8,69,252 to Rs. 13,62,722, consequent on the introduction of electric-pumping machinery. The receipts from the Nanyaseik tract fell. The jade and amber license fetched a slightly higher price. The lease of the jade farm, of which two years were yet to run, was resigned after the close of the year, as disturbances in China had closed the market for jade at Canton. The license was re-sold for one year only.

Collection of revenue.

221. The number of revenue-collecting village headmen is now given as 7,256. In the Meiktila division the abolition of a number of petty headmanships in Kyauksè district caused a decrease in that district of 48 headmen. Coercive processes rose from 3,710 to 4,279, not an extraordinary rise if the introduction of the assessment of non-State lands to revenue is taken into account.

Agricultural advances.

222. Rupees 1,79,625 were advanced in the year under review, and Rs. 2,71,516 recovered. The good agricultural year facilitated the repayment of advances and may have caused a reduction in applications also. In Magwe only Rs. 4,070 out of an allotment of Rs. 10,000 were advanced, whilst the allotment was found insufficient in Katha. Meiktila, Lower Chindwin, and Thayetmyo districts took either small sums in advances or none at all. It is still doubtful whether District Officers are as careful as they should be to explain the loan system and encourage readiness in applying for this very advantageous form of State aid.

C. *Upper and Lower Burma.*

Salt revenue.

223. The total quantity of salt put on the market in 1899 was 1,840,618 maunds. The increase of 6 per cent. was, however, to a great extent nominal, being due to a more liberal, and undoubtedly more correct, estimate of the outturn obtained at the salt works of several districts, notably Hanthawaddy and Shwebo. Nearly 34 per cent. of the salt consumed was manufactured locally. About 27 per cent. was imported English salt, 34 per cent. was German, and the remainder, or nearly 5 per cent. came from other places. The total revenue from salt amounted to Rs. 14,46,209, or Rs. 16,949 less than in 1898. The gross revenue demand on home-made salt rose by Rs. 13,367, to Rs. 2,38,242, whilst the duty realized in foreign salt fell by Rs. 12,07,967. The increased revenue demand on home-made salt was due to a large increase in the number of earthern pots licensed in the Kyaukpyu and Sandoway districts, whilst the total output from these vessels is estimated to have been 78,921 maunds against 35,409 maunds in 1898. Except in these two districts there was little variation in the distribution of the local outturn.

Most of the locally manufactured salt is consumed in the divisions where it is manufactured. Tenasserim, however, exports about 38 per cent. of the local output to Rangoon. In Upper Burma the Sagaing division, besides supplying its own demands, is probably able to supplement to a small extent the requirements of the neighbouring divisions. In Lower Burma the Arakan division produces enough for local consumption, while the Irrawaddy and Pegu divisions require large importations of foreign salt. Nearly all the imported salt entered the country through Rangoon. Bassein received a small quantity, but the other Burman ports had practically no importations. The importations of foreign salt in 1899 were considerably larger than in the previous year, but the quantity taken out of bond for consumption was less by 30,316 maunds. This is attributed to low prices caused by over-supply and inferior quality. The price of foreign salt ruled two to three annas per maund lower in 1899 than in 1898. Local salt did not vary much in value except in the southern part of Tenasserim division, where there was a heavy fall due to over-production and to the movements of the fishing fleets.

On a comparison of the figures for estimated output and revenue it would seem that the incidence of the excise demand per maund of locally manufactured salt was, in the year under review, about six annas. This appears low when compared with the import duty of Re. 1 per maund and it was considered that good grounds existed for raising the composition rates to avoid unduly protecting the local industry. The difference between the rates was not perhaps really so great as the figures indicate, but it was undoubtedly considerable, and probably the local salt actually paid about half the rate levied on the salt imported into the province. Since the returns for 1899 were completed the rates of composition duty have accordingly been raised and the feasibility of direct taxation of locally manufactured salt on the actual outturn is now under consideration.

Stamp revenue.

224. The variations in the stamp revenue of the Province during the year present no remarkable features calling for detailed comment. The advance in receipts was satisfactory but not extraordinary. The gross stamp revenue for the year amounted to Rs. 19,37,405, being Rs. 1,71,132, or 9·69 per cent. greater than it was in 1898-99. Out of the total increase Rangoon contributed no less than Rs. 1,04,153, an increase in that district of nearly 19 *per cent.* Of the other districts Henzada and Amherst show the greatest advance. In the Arakan division the district of Akyab shows the large decrease of Rs. 17,267, and the total revenue from this division fell more than 15 *per cent.* In Akyab, where most of the stamp revenue of the division is collected, monetary transactions are said to have declined in the year: advances to paddy-brokers were no longer made, and several native banking firms withdrew agencies. In the other divisions of the province there was a satisfactory increase, except in Sagaing, where there was a slight falling off. The total expenditure amounted to Rs. 60,187, being only slightly in excess of that of 1898-99. The expenditure thus amounted to about 3 *per cent.* of the gross revenue. Of this expenditure Rs. 7,474 were accounted for by refunds of court-fees under the Government of India Resolution of 1888.

Excise.

225. The gross revenue of the Excise Department rose to Rs. 53,10,221, of which liquor contributed 49·14 per cent. and opium with other drugs 50·86 per cent. The increase over the gross revenue for the year 1898-99 amounted to Rs. 5,28,154. The increase was shared by every division and by almost every district, and extended to both liquor and opium. The incidence of the gross excise revenue, taking into account customs duties, is rising steadily, and is now 13 annas per head of population. The only district which showed a conspicuous decrease was Amherst, where the receipts from liquor excise fell by Rs. 39,588. One distillery and one outstill license were withdrawn, but there was no corresponding reduction in revenue, whilst the addition of 24 more shops for the manufacture and sale of country fermented liquor swelled the revenue by Rs. 94,599. The number of licenses issued for the sale of foreign liquor varied little from the number of 1898-99, and the revenue under this head was practically stationary. Four thousand two hundred and thirty-six gallons of spirit more than in the previous year paid duty. Notwithstanding that the number of licenses for the sale of foreign liquor fell slightly the excise revenue under the head *Foreign liquor* rose by 2·13 per cent. to Rs. 11,10,464. Rangoon Town and Mandalay contributed an increased revenue of over Rs. 10,000 each. In Bassein district, in spite of the competition of country fermented liquor, the average license fee for the retail vend of foreign liquor rose from Rs. 868 to Rs. 1,426. As in 1898-99, a single brewery license was issued for the province, the output of beer falling by 23,157 gallons.

Charges fell by Rs. 8,158, the decrease being due to reduced establishments.

The number of still licenses for the manufacture of country spirit fell by one. The average price paid rose by as much as Rs. 286, to Rs. 2,837. The total revenue from fees for licenses of this kind rose to Rs. 1,30,480, or an increase of Rs. 10,570. The question of increasing the number of outstills in order to check illicit distillation was considered, but it was decided not to add to their number, as it was thought that the less harmful country fermented liquor was ousting country spirit. It is, however, doubtful whether this tendency operates strongly yet, in view of the fact that the average price paid for each license rose considerably, though licenses for the retail vend of country fermented liquor were at the same time given more freely. Two hundred and seventy-eight licenses for the sale of country fermented liquor were issued in the year under review against 254 in the preceding year, whilst the resulting revenue rose by almost a lakh. There seem to be no grounds for thinking that in the Upper Province illicit fermentation is carried on to any extent.

The number of licenses for the sale of *tari* remained practically unchanged, while the average price paid rose from Rs. 476 to Rs. 511, and the total fees to Rs. 4,21,369. In Upper Burma 110 licenses were issued against 91 in 1898-99.

Opium.

226. The number of opium licenses fell by 31, from 267 to 236. The decrease represented a diminution of 31 in the licenses taken out by tattooers and was not accompanied by a proportionate fall in the revenue, which realized as much as Rs. 3,31,556 more than in 1898-99. The sale of licenses for retail vend at much higher prices accounted for this increase, though the actual number of licenses rose by two only. Of the two new licenses, one was issued in Myitkyina and one in Katha district. The gross revenue from opium rose by more than $3\frac{1}{2}$ lakhs, or an increase of 15·59 per cent., almost the whole of which was realized from increased license fees. Thirty-one thousand nine hundred and seventy-eight seers of opium were sold against 30,138 in the year 1898-99. Sale-proceeds rose by Rs. 37,758. The maximum quantity of opium permitted over the whole province rose from $867\frac{1}{4}$ maunds to 905 maunds, 276 maunds being allowed for the Upper Province. Akyab was permitted $24\frac{3}{4}$ maunds in excess of last year's maximum, and the full quantity allowed was taken out. In the Pegu division the maximum issue and the number of licenses remained unchanged, while the license fees paid rose by Rs. 1,27,000. In the Mandalay division the consumption of foreign (Shan) opium and of Government opium is almost the same. In the Meiktila division keen competition raised the sum paid for license fees in Meiktila and Myingyan districts by nearly 100 per cent. In each case the maximum quantity was taken out.

No change was made in the number of centres for the retail vend of opium by Government agency, beyond the replacement by regular licensed shops of the temporary sale centres at Maliwun and Victoria Point. The quantity sold and the price realized did not vary noticeably from the figures of the preceding year.

Two applications to export Yünnanese opium through Burma to China were refused, and since the close of year simple rules restricting the possession and cultivation of opium have been sanctioned for some of the Southern Shan States adjoining the Myelat. There is, however, no doubt that smuggling is still rife and that the issues of Government opium are quite insufficient to meet the total consumption.

Working of the excise and opium law.

227. The number of offences against the Excise and Opium law detected and of arrests made was less than in the previous year, and seizures of opium and ganja fell considerably. Rewards were not usually high and fewer were granted than in 1898-99. In this respect and in the percentage of detections and convictions the Excise and Opium Acts appear to have been best enforced in the Tenasserim division, where, however, figures for Thatôn district have to be discounted. Heavy rewards in the Mandalay division are making it harder for smugglers to secure the connivance of the Hill Kachins in passing opium through their country.

Fifteen special establishments were employed. The working of these establishments was again not altogether successful, though the larger number of arrests made indicates greater activity than was shown in 1898-99. The establishment at Meiktila and Yamèthin has been abolished since the close of the year of review. The best work seems to have been done in the Irrawaddy division and in the Amherst district. Taking the figures of convictions for drunkenness as they stand, only 929 Burmans out of a total Burman population of 6,647,258 or ·014 per cent. were charged with this offence against 2·5 per cent. of non-Burmans. The use of opium is said to be growing in Bassein in both town and country, and there is no doubt that the large seizures in Mandalay are an indication of the inordinate extent to which smuggling, doubtless with the connivance of the licensed vendors, is carried on in spite of repressive measures in the Upper Province. The reopening of the list of consumers will doubtless show that much illicit consumption has been going on in Lower Burma since 1893.

Rules under the Excise Act came into force in the civil station of Lashio and in the Chin Hills, with a view to providing Pathans and other Natives of India there with a lawful means of obtaining liquor. A proposal to allow Kachins serving with Military Police battalions the concession of favourably dutied rum is now under the consideration of the Government of India. But another proposal to provide hemp drugs for the use of persons serving in the army or the Military Police was, after consideration, rejected.

Income-tax.

228. The receipts from income-tax rose by Rs. 37,437, the total sum collected being Rs. 10,50,469, representing an increase in the income of the assessed classes of Rs. 15,70,000. The year's collections are the highest on record; they show under the head "Ordinary Collections" an excess over the original estimate of Rs. 77,546. "Profits of Companies" contributed a little more, and "Other Sources" a little less than one-third of the nett increase of Rs. 37,437. There was a satisfactory increase in the income-tax collected by heads of firms from their employés. The Chetty assessors employed in Rangoon were employed also in Yandoon, Myaungmya and Henzada. Their work appears to have been successful except in the latter place, where a misunderstanding led to large reductions being granted. Rangoon Town, Amherst (Moulmein), and Mandalay (Mandalay) remain the chief centres of collection of the tax on salaries. In Rangoon Town the demand rose by Rs. 8,570. The increase in the number of firms collecting the assessment on their employés themselves was satisfactory, and was most marked in Moulmein, where the number of such firms rose from one to nine. Companies paid Rs. 1,02,640 as against Rs. 88,333 in the preceding year. The improvement is ascribed to a revival of trade, the shipping, trading and bazaar companies benefitting most. The average income of the assessed companies rose substantially. Tax on interest on securities pro-

duced a little more than in 1898-99. The number of assessees under the head "Other sources of income" rose from 15,153 to 15,267. The initial demand was Rs. 5,91,136, a sum of Rs. 4,324 less than the initial demand of 1898-99, while the final demand of the year of report shows an advance of Rs. 12,375. These figures indicate increased care in the preparation of the assessment rolls. Out of the total number of persons brought on the rolls, however, 1,074 were removed for various causes, and there would still seem to be room for more discrimination in the initiation of assessments. The decreases of Rs. 7,981 in Thôngwa and Rs. 2,016 in Myaungmya are, not altogether convincingly, attributed to bad trade and losses sustained by paddy brokers. The year was one of general prosperity, and undue leniency in assessments may have been shown. In Mandalay the final demand rose from Rs. 57,190 to Rs. 61,314, whilst the number of objections fell from 335 to 200, and of appeals from 68 to 21. The total cost of collection rose by rather less than 3 per cent. from Rs. 34,508 to Rs. 35,429, while the total collections increased by nearly 4 per cent.

2.—Finance.

229. The following statement exhibits the gross receipts and expenditure of the years 1898-99 and 1899-1900 distributed between Imperial, Provincial, Incorporated Local, Excluded Local and Municipal Funds. The transactions of the Rangoon and Moulmein Municipalities, the Rangoon Port Trust and the Rangoon Pilot Fund are included in these figures, although these funds do not bank with Government:—

	1898-99.		1899-1900.	
	Receipts.	Expenditure.	Receipts.	Expenditure.
	Rs.	Rs.	Rs.	Rs.
Imperial	3,38,45,011	86,19,698	3,36,93,174	89,85,278
Provincial	3,41,28,998	3,00,14,056	3,47,45,359	3,21,32,764
Incorporated Local	21,45,511	21,07,037	22,76,310	22,38,506
Excluded Local	26,31,022	27,16,160	25,50,200	25,07,336
Municipalities	54,43,150	53,40,148	53,59,238	54,42,221
Total ...	7,81,93,692	4,87,97,099	7,86,24,281	5,13,06,105

N.B.—The figures for the Rangoon Municipality were not included in the statement given in the Administration Report for 1898-99.

Imperial.

230. There was a net decrease of Rs. 1,51,837 in receipts as compared with the previous year, namely,—

	Rs.
Gross increase	15,91,556
Gross decrease	17,43,393
Net decrease ...	1,51,837

The gross increase of Rs. 15,91,556 occurred under the following heads:—

	Rs.
Land revenue	5,62,551
Opium	6,937
Stamps	42,792
Excise	1,62,538
Assessed taxes	18,066
State Railways (gross earnings)	7,92,448
Petty increases under other heads	6,224
Total ...	15,91,556

The falling off of Rs. 17,43,393 is distributed as follows :—

	Rs.
Salt	22,432
Customs	13,95,098
Forest	2,69,418
Tributes	51,469
Petty decreases under other heads	4,976
Total ...	17,43,393
Net decrease ...	1,51,837

The increase under *Land Revenue* was due to further extension of the area assessed to revenue, to revision of settlements, and to an *ad interim* enhancement of rates pending re-settlement, and to an increase in fishery and petroleum revenues. Under *Opium* the increase was due to the sale of a larger quantity of the drug during the year. The improvement under *Stamps* is ascribed partly to the grant of letters of administration in respect of several large estates and partly to an increase in litigation and to the development of trade. Under *Excise* the increase is chiefly due to the auction sales of licenses having realized better prices. The increase under *Assessed Taxes* represents normal growth of revenue. Under *State Railways* (*gross earnings*) the advance was chiefly caused by an unprecedented rise in paddy traffic resulting from the opportunity afforded by the rise in prices due to the famine in India to dispose of old stock and to export larger quantities of new stock. The extension of the line to Myingyan also contributed to the increase in the traffic earnings. The falling off under *Salt* was due to over-importation in the previous year, and that under *Customs* is attributable chiefly to the loss of revenue under Export Duties owing to the diversion of a portion of the rice-trade to non-dutiable ports in India on account of the famine, but it is also partly due to accumulation of stocks at the end of March 1899 having affected the imports during the early part of the year under report. Under *Forests* the decline was apparently due to causes which influence such receipts, namely, the demand and the market value of teak timber, but it may be noted that the revenue of 1898-99 under this head includes a sum of Rs. 60,000 representing the Imperial share of revenue amounting to Rs. 1,20,000 paid by the Bombay-Burma Trading Corporation in connection with malpractices committed by their employés in the Pyinmana forests. The decrease under *Tributes* is chiefly due to remission sanctioned for public works. In the previous year the amount of tributes was realized in full and the remissions charged as refunds, whereas in the year under report the remissions were made by short realization of the tributes to the extent of the amount remitted.

On the expenditure side there was a nett increase of Rs. 3,65,580 which is made up as follows :—

Increases.

	Rs.
Forest	10,607
Political	67,377
Miscellaneous	11,921
State Railways (working expenses)	2,82,676
Miscellaneous Railway expenditure	1,17,716
Petty increases under other heads	8,144
Total ...	4,98,441

Decreases.

	Rs.
Refunds and drawbacks	51,570
Excise	13,181
Territorial and political pensions	10,289
Military works	43,772
Petty decreases under other heads	14,049
Total ...	1,32,861
Nett increase ...	3,65,580

The increase under *Forests* is due principally to larger expenditure on surveys, improvement and protection and demarcation of reserves. The increase

under *Political* is attributable partly to the number of officers on furlough having been less than in the previous year and partly to the expenditure in connection with the Burma-China Boundary Commission being larger in the year under report. Under *Miscellaneous* the increase is due to larger expenditure on account of remittance charges owing to an increase in the number of specie remittances in order to provide for shipment of silver to India. The increase under *State Railways* is due to enhanced cost of coal and wood fuel, and to increased mileage due to a rise in traffic and extension of the line. Under *Miscellaneous Railway Expenditure* the increase is nominal, the amount representing a *minus* debit in the accounts for 1898-99 on account of write-back of previous expenditure. No expenditure under this head has been reported on account of 1899-1900. The decrease under *Refunds and Drawbacks* is due to unusually large refunds of Customs revenue in the previous year as well as to remissions of tributes having been treated as refunds in the previous year as already mentioned. Under *Excise* the decrease is chiefly due to smaller payments on account of rewards. The decrease under *Territorial and Political Pensions* is due to lapses of pensions. Under *Military Works* the expenditure in 1899-1900 was smaller than in the previous year.

Provincial.

231. In the Provincial section the receipts show a nett improvement of Rs. 6,16,361, which is made up as follows:—

Increases.

	Rs.
Land revenue	11,25,101
Stamps	1,28,376
Excise	1,62,538
Assessed taxes	18,065
Civil Works	14,805
Contributions	63,200
Petty increases under other heads	4,950
Total	15,17,035

Decreases.

	Rs.
Salt	22,432
Forest	2,69,417
Interest	12,146
Law and Justice—Jails	32,100
Police	1,22,566
Receipts in aid of superannuation	8,386
Miscellaneous	4,18,246
Petty decrease under other heads	15,381
Total	9,00,674
Nett increase	6,16,361

The increases under *Land Revenue, Stamps, Excise* and *Assessed Taxes* were due to the same causes which influenced the receipts in the Imperial section. Under *Civil Works* the increase is due to additional rentable quarters having been provided for Government officers. The further extension of the system of collecting revenue through village headmen has caused an increase under *Contributions* as the District Cess Funds in Lower Burma are required to make contributions to Provincial revenues towards the remuneration of village headmen in consideration of the extent to which the charge against these funds on account of village police has been reduced on the introduction of the present system, under which the village headmen instead of being paid as formerly from the District Cess Funds, in their capacity as village police are now remunerated from Provincial revenues. The falling off under *Salt* and *Forest* was due to the same causes which affected similar receipts in the Imperial section. The decrease under *Interest* is due chiefly to a lower outstanding balance of loans to cultivators. Under *Jails* the decrease was due to a falling off in the demand for jail manufactured articles. The chief causes of the decrease under *Police* are:—

(i) the discontinuance of the contribution for police hitherto paid to Provincial revenues by the Mandalay Municipality owing to the

police charges at Mandalay having been taken over by Government under the Burma Municipal Act of 1898;

(ii) smaller recoveries on account of Punitive police; and

(iii) a decrease in the amount of the adjustment on account of cost of stores returned to the arsenal. The decrease under *Receipts in aid of superannuation* is due to the amount received on account of contributions for pension of officers lent to the Burma Railways Company having been less than in the previous year. The falling off under *Miscellaneous* was due chiefly to larger recoveries on account of famine expenditure in 1898-99.

On the expenditure side there was a nett increase of Rs. 21,18,708 as detailed below:—

Increases.

	Rs.
Refunds and drawbacks	12,437
Land revenue	1,55,257
Forest	10,608
General Administration	12,926
Law and Justice—Courts of Law	1,02,735
Marine	42,390
Medical	32,703
Stationery and printing	1,06,764
Miscellaneous	37,175
Minor works and Navigation	2,65,930
Civil Works	14,90,693
Petty increases under other heads	20,182
Total	22,89,800

Decreases.

Excise	13,182
Customs	16,877
Law and Justice—Jails	61,584
Police	48,933
Scientific and other minor departments	12,390
Contributions	13,060
Petty decreases under other heads	5,066
Total	1,71,092
Nett increase	21,18,708

The increase under *Refunds and Drawbacks* is due to larger refunds of land revenue. The expenditure under *Land Revenue* has exceeded that of the previous year owing partly to the reorganization of the Burma Commission involving an increased charge on account of salaries, but chiefly to the further extension of the system of collecting revenue by village headmen, to increased charges on account of potta surveys, to the extension of supplementary survey operations and to an increase in charges on account of collection of land revenue owing to the increase in receipts. The increase under *Forest* has been explained in the Imperial section. Under *General Administration* the increase is due to additional expenditure under the head "Staff and Household of the Lieutenant-Governor" owing to a higher rate of salary having been drawn by the Private Secretary, to the payment of the Municipal taxes on the Government House at Rangoon by the Civil instead of by the Public Works Department as in the previous year, and to additional expenditure in connection with the Legislative Council. Under *Courts of Law* the principal causes of the increase are the reorganization of the Burma Commission referred to under *Land Revenue* and an increase in the charges on account of diet and travelling allowance of witnesses and refunds of criminal fines. The increase under *Marine* is mainly due to larger outlay on construction of vessels at the Kidderpore dockyard. Under *Medical* the increase is due to a larger number of officers having been on duty in 1899-1900 than in the previous year, to the opening of new hospitals and to increased contributions to the Countess of Dufferin's Fund and to the Leper Asylum. The increase under *Stationery and Printing* is attributable partly to larger expenditure in the Government Press on account of overtime establishment and purchase of stores and stock from England, and partly to a large increase in the value of stationery supplied by Superintendent of Stationery, Calcutta. Under *Miscellaneous* the in-

crease is chiefly due to larger expenditure on account of rewards for proficiency in oriental languages, petty establishments and amounts written off.

The increase under *Minor Works and Navigation* is due to larger expenditure on the Minor Irrigation works in the Mandalay district, on the Meiktila lake, Mān canal, Salin canal, Sittang-Kyaikto canal, and Twantè canal projects, also on the Irrawaddy embankments. Under *Civil Works* the increase is due to larger expenditure in 1899-1900 on police buildings in the Arakan, Bassein, and Mandalay divisions, on construction of Myaungmya Jail and on works connected with the Government House at Maymyo. The decrease under *Excise* has been explained in the Imperial section. Under *Customs* the decrease is due to the restriction of the payment of overtime fees to three-fourths of the fees realized with effect from 1899-1900. The decrease under *Jails* is chiefly due to smaller expenditure on rations. Under *Police* the decrease is due to smaller expenditure under Railway Police and Special Police. The decrease under *Scientific and other Minor Departments* is for the most part, due to larger expenditure in the previous year in connection with the compilation of the "Upper Burma Gazetteer."

Incorporated Local Funds.

232. The transactions of the District Cess and District Funds added to those of the Taunggyi Improvement Fund show a nett increase of Rs. 1,30,799 in receipts and of Rs. 1,31,469 in expenditure as compared with the previous year, namely:—

	Receipts. Rs.	Expenditure. Rs.
District Cess Funds	1,27,563	2,08,435
District Fund	7,987	—80,055
Taunggyi Improvement Fund	—4,751	3,089
Total ...	1,30,799	1,31,469

The gross improvement in receipts of the District Cess Funds amounted to Rs. 1,31,084 and was composed of—

	Rs.
Provincial rates	94,382
Post office	24
Police	6,068
Marine	709
Miscellaneous	27,137
Civil Works	2,533
Civil Works by Public Works Officers	231
Total ...	1,31,084

On the other hand, there was a total falling off of Rs. 3,521 under *Land Revenue*, *Education*, *Medical*, and *Contributions*. The receipts under *Provincial rates* which represent the 10 per cent. collection on ordinary land revenue in Lower Burma show an increase in almost all the districts. The increase under *Police* is chiefly due to larger receipts from slaughter-house license fees, while that under *Miscellaneous* has resulted from larger receipts from bazaars. Under *Civil Works* the increase was due chiefly to larger receipts from ferries and also to a special receipt of Rs. 2,463 representing the closing balance of the Ramree Municipality, which has been merged in the Kyaukpyu District Cess Fund. Petty decreases amounting to Rs. 3,521 do not call for remarks.

The nett increase of Rs. 2,08,435 in the expenditure was the result of the following increases:—

	Rs.
Refunds and drawbacks...	1,039
Post office	2,771
General administration	224
Police	2,084
Education	33,173
Superannuation allowances, &c.	17
Miscellaneous	3,741
Medical	9,925
Minor works and navigation by Civil Officers	1,500
Civil works by Civil Officers	35,688
Civil works by Public Works Officers	62,942
Contributions	63,200
Total ...	2,16,304

partly counterbalanced by the decreases shown below:—

	Rs.
Provincial rates	214
Marine	5,266
Scientific and other minor departments	1,541
Minor works and navigation by Public Works Officers	848
Total ...	7,869

The increase under *Education* represents steady growth in the charges on account of grants-in-aid. Under *Medical* the increase is chiefly on account of new hospitals at Pa-an in the Thatôn district and at Tapun in the Tharrawaddy district, and the employment of additional vaccinators. The outlay under the heads *Civil Works* by Public Works Department Officers and Civil Works by Civil Officers fluctuates according to the funds available and the ability of officers to utilize the available funds. *Contributions from Local to Provincial* are fixed annually by the Local Government in consideration of the extent to which the system of revenue collection by village headmen has been introduced. As mentioned in the report for 1898-99 the complete introduction of the system has been calculated to ultimately relieve the District Cess Funds of expenditure to the extent of 35 per cent. of their income for duties formerly paid by District Cess Funds, but which are now performed by village headmen, who receive their remuneration from Provincial revenues. The petty decreases, amounting to Rs. 7,869, do not call for remarks.

District Funds.

233. The nett increase of Rs. 7,987 in the receipts is made up of Rs. 1,640 under *Police*, Rs. 16,276 under *Miscellaneous*, and Rs. 71 under *Civil Works* counterbalanced by a decrease of Rs. 10,000 under *Contributions from Provincial to Local.*

The increase under miscellaneous is due to larger receipts from bazaars. In the previous year contributions were made from provincial revenues of Rs. 10,000 to the Myitkyina district fund and Rs. 5,000 to the Bhamo district fund, while in the year under report the only contribution made was one of Rs. 5,000 to the Bhamo District Fund. This explains the difference under *Contributions from Provincial to Local.* The nett increase of Rs. 80,055 in the expenditure results from decreases aggregating Rs. 86,223 counterbalanced by increases amounting to Rs. 6,168 as detailed below:—

Decreases.

	Rs.
General administration	87
Minor works and navigation	26,727
Civil works by Public Works Officer...	36,511
Civil works by Civil Officers	22,898
Total ...	86,223

Increases.

	Rs.
Post office	242
Police	505
Miscellaneous	5,421
Total ...	6,168
Nett decrease ...	80,055

As explained in the previous year's report, the expenditure under *Minor Works and Navigation* in that year represented the payment of the cash balance of the Minbu canal funds from the Minbu district fund, to the excluded local fund formed for the transactions with effect from 1898-99. The expenditure under the heads *Civil Works by Public Works Officers* and *Civil Works by Civil Officers* varies according to the funds available and the means at the disposal of the officers in charge of spending the amount allotted. The increase under *Miscellaneous* is due to larger expenditure and conservancy and bazaar establishments.

Taunggyi Improvement Fund.

234. The falling off in the receipts of the Taunggyi Improvement Fund was nominal. As in the previous year, a special contribution of Rs. 6,000 was made by the Public Works Department. The increase in expenditure is chiefly due to outlay

on a bazaar for which a loan of Rs. 27,000 was granted to the fund by Government in the previous year.

Excluded Local Funds.

235. These comprise the following funds :—

Town, Port, Cantonment, Pilot, Educational, Police Reward, and Land Sale and Rent Funds. The Rangoon Port Trust is also an excluded local fund but the transactions do not appear in the Government books.

The transactions of these funds during the year under report were as follows :—

Funds.	Opening balance.	Receipts.	Total.	Expenditure.	Closing balance.
	Rs.	Rs.	Rs.	Rs.	Rs.
Cantonment funds	(*a*) 13,762	1,74,655	1,88,417	1,77,071	11,346
Town funds	61,953	89,668	1,51,621	1,03,574	48,047
Port funds	1,92,850	2,39,788	4,32,638	1,94,034	2,38,604
Pilot funds	69,916	2,36,155	3,06,071	2,14,601	91,470
Canal funds	65,681	932	66,613	66,613	...
Land sale and rent funds	33,855	4,43,099	4,76,954	4,51,490	25,464
SYNDICATE.					
General fund	23,201	34,759	57,960	29,263	28,697
College fund	14,908	56,581	71,489	56,855	14,634
Collegiate fund	15,626	54,550	70,176	54,971	15,205
Rangoon Port Trust fund	4,54,337	12,19,559	16,73,896	11,58,864	5,15,032
Rangoon Police Reward fund... ...	...	454	454	...	454
Total ...	9,46,089	25,50,200	34,96,289	25,07,336	9,88,953

(*a*) The difference between the closing balance of 1898-99 and the opening balance of 1899-1900 is due to the balance of the Moulmein Cantonment Fund having been transferred to the Military Department, Madras, on the abolition of the fund.

The nature of the funds has been described in previous reports. The total outlay in Public Works during the year under report was Rs. 4,48,688, namely, from—

	Rs.
Cantonment funds	17,892
Town Funds	34,070
Port funds	45,559
Syndicate College fund	22
Syndicate collegiate fund...	2,476
Rangoon Port Trust	3,48,669
Total ...	4,48,688

The only excluded local funds which were indebted either to Government or to the public at the close of the year 1899-1900 are the Mergui Port Fund which was indebted to Government to the extent of Rs. 36,170 and the Rangoon Port Trust which was indebted to the public to the extent of Rs. 3,94,041.

There are seven Cantonment funds, namely, those at Mandalay, Rangoon, Bhamo, Meiktila, Shwebo, Maymyo and Thayetmyo.

The Rangoon Police Reward Fund was created during the year under report in accordance with the sanction contained in the Government of India, Home Department (Police) letter No. 120, dated the 15th February 1900.

Municipal Funds.

236. Excluding the Rangoon Municipality, which does not bank with Government, there were 41 Municipalities at the beginning of the year under report, but the number was reduced to 40 with effect from the 1st September 1899, owing to the amalgamation of the Ramree Municipal fund with Kyaukpyu District Cess Fund. The Moulmein fund was permitted by Government to transfer its balance from the Government Treasury to the Bank of Bengal at Moulmein on the 8th August 1899, and the transactions of the fund have since that date ceased to appear in the Government books.

The transactions of the Municipal funds as above, during the year 1899-1900 were as follows:—

	Opening balance.	Receipts.	Total.	Expenditure.	Closing balance.	
					Treasury.	Civil Surgeon's cash-book.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Lower Burma	4,35,098	14,30,702	18,65,800	14,97,727	3,67,245	828
Upper Burma	1,05,021	8,90,408	9,95,429	8,63,958	1,30,983	488
Total ...	5,40,119	23,21,110	28,61,229	23,61,685	4,98,228	1,316

The liabilities of the Municipalities as regards loans on the 31st March 1900 were as detailed below:—

Due to Government.

	Rs.
Prome	47,758
Ma-ubin	1,181
Paungdè	4,632
Mergui	1,380
Yandoon	51,433
Akyab	11,457
Shwegyin	6,629
Sandoway	3,277
Letpadan	4,096
Henzada	9,186
Kyauksè	5,961
Taungdwingyi	2,413

It may be noticed that the amount due by each of the above Municipalities is less than in the previous year. The three Municipalities of Mônywa, Pagan, and Pakôkku were indebted to Government during 1898-99, but they cleared off the loans during the year under review.

Due to the Public.

	Rs.
Rangoon drainage works	21,82,500
Rangoon high pressure water-supply	3,00,000
Rangoon high level water works	7,10,000
Rangoon rubbish disposal scheme...	80,000
Rangoon repayment of block J loan of 1893	1,68,000
Rangoon Town Lands reclamation works	6,42,000
Moulmein street lighting	80,000

There are two other classes of Trust Funds, namely, "Official Assignees" and Cemetery Endowment Funds. These funds do not bank with Government treasuries, and their accounts are not shown in the Government books.

There are three educational endowment funds, namely, Jardine, Renoung and Copleston. These funds do not bank with Government treasuries, and their accounts are not shown in the Government books.

Paper Currency.

237. The circulation of notes on the 31st March of each year since the office was first opened in August 1883 has been as follows:—

	Rs.
31st March 1884	20,90,495
31st March 1885	13,36,705
31st March 1886	15,86,780
31st March 1887	32,01,200
31st March 1888	37,42,850
31st March 1889	28,44,310
31st March 1890	28,90,800
31st March 1891	53,11,715
31st March 1892	39,46,175
31st March 1893	66,77,090
31st March 1894	39,75,125
31st March 1895	56,50,720
31st March 1896	49,28,225
31st March 1897	53,57,155
31st March 1898	59,46,620
31st March 1899	58,85,090
31st March 1900	75,89,640

The issues and receipts of notes for the two years, 1898-99 and 1899-1900 have been as follows:—

Year.	Issues. Rs.	Receipts. Rs.
1898-99	12,99,04,390	12,99,65,920
1899-1900	15,27,53,020	15,10,48,470

The details by denominations are—

	Issues.		Receipts.	
	1898-99.	1899-1900.	1898-99.	1899-1900.
5	26,438	26,930	26,430	27,762
10	3,17,880	3,83,442	3,04,905	3,73,473
20	55,625	46,845	53,996	49,529
50	27,938	28,529	27,146	28,269
100	1,93,805	2,27,161	1,92,655	2,16,474
500	9,357	9,503	9,608	9,599
1,000	35,785	43,333	35,648	43,304
10,000	6,424	7,562	6,463	7,502
Total ...	6,73,252	7,73,305	6,56,851	7,55,912

The following table shows the circulation by details of denomination on the 31st March for the two years 1898-99 and 1899-1900:—

Year.	5	10	20	50	100	500	1,000	10,000	Pieces.	Value.
										Rs.
31st March 1899 ...	8,748	73,335	14,595	7,790	25,346	448	998	67	1,31,327	58,85,090
31st March 1900 ...	7,916	83,304	11,911	8,050	36,033	352	1,027	127	1,48,720	75,89,640

The usual progress in the circulation of notes of the denominations of Rs. 10 and Rs. 100 has continued during the year of report, and in the latter case the increase has been very marked.

As regards the five, twenty and fifty rupee notes, the circulation does not yet appear to have shown any decided tendency to increase or decrease from year to year, and the fluctuations in these cases during the year under report do not call for special remarks. The circulation of notes for Rs. 500 and higher denominations is almost wholly dependent upon the requirements of the local banks and the large increase in the total value of circulation of such notes on the 31st March 1900, as compared with that on the corresponding date of the preceding year, was mainly due to an exceptionally active state of the rice trade which caused the local branch of the Bank of Bengal to obtain telegraphic transfers from the Currency Office at Calcutta, for an unusually large amount, the payment of which was taken almost exclusively in notes of the highest denominations.

VI.—VITAL STATISTICS AND MEDICAL SERVICES.

Vital Satistics of the General Population.

Vital statistics.

238. It is perhaps doubtful if in Burma the agencies available for the work of registration are capable of being made so efficient as those in some provinces of India, and the unreliable nature of the statistics collected in Lower Burma, in which the system of registration has been in force for over two decades, would seem to support this view. Much, however, can be done by constant inspection and patient instruction, and, in fact, the statistics of 1899 would appear to indicate that the constant admonitions of recent years, coupled with the improved system of village administration, are bearing fruit in a steady, if slow, improvement on the part of the collecting and recording agencies. It cannot, however, be doubted from internal evidence that the vital statistics still fall considerably short of what they should be in accuracy. The registration of deaths was introduced in certain selected districts of Upper Burma in the beginning of the year, but it has been decided not to attempt for the present the registration of births.

In Lower Burma the birth-rate per mille calculated on the census figures of 1891 was 37·04 compared with 34·11 in 1898 and 31·82 in 1897. The increase was doubtless due in some degree to the increased population numbers since the census of 1891, but was probably mainly the result of the omission of a smaller number of births from the registers. The proportion of male to female children born was 108 of the former to 100 of the latter.

The recorded death-rate for Lower Burma was 27·30 as compared with 26·13 in 1898 and was the highest on record. The increase was probably due to improved registration. The recorded death-rate for towns in Upper Burma was 35·15. The general death-rate for Upper Burma, including rural tracts, was 21·03. In view of the fact that this was the first year in which the registration of deaths was attempted in the rural tracts of Upper Burma, the results cannot be regarded as wholly unsatisfactory, but the figures cannot be regarded as having any practical value.

Principal diseases.

239. The mortality from cholera was 4,942 as compared with 2,972 in the previous year. The mortality in that year, however, was abnormally low and the number of deaths attributed to this cause in 1899 was below the average of the past five years. Cholera was widely diffused and attacked every district except Toungoo in Lower Burma, and except Meiktila and Yamèthin of the districts for which statistics were recorded in Upper Burma. Out of a total number of 344 circles of registration 218 recorded deaths, yet the proportion of villages which furnished deaths was very small. Comparative immunity from cholera was counterbalanced by the greater prevalence of small-pox; 5,891 deaths were recorded, the total for 1898 being 4,826 and the mean of the previous five years 2,344. The outbreak was again specially severe in the Pegu division.

The greatest mortality was as usual under the head "Fevers," to which were attributed 51,177 deaths in Lower Burma and 19,406 deaths in Upper Burma. There was a marked improvement in the sale of quinine powders by Post Office subordinates, but at the same time a continual falling off in the number of packets issued to other officers.

Immigration and Emigration.

240. The following table shows the number of immigrants and emigrants who passed through the principal ports of the province during the past two years:—

	1898-99.		1899-1900.	
	Emigrants.	Immigrants.	Emigrants.	Immigrants.
Akyab	14,972	16,407	16,974	16,242
Rangoon	91,033	132,177	86,819	149,922
Moulmein	743	596	1,894	858

The number of emigrants from Akyab and Moulmein was much in excess of the number in 1898-99. The number of immigrants into Rangoon, during 1899-1900, exceeded the number in 1898-99 by 17,745. The number of emigrants decreased. There are no signs of a cessation of the inflow of natives of India into the province.

Medical Relief.

General statistics.

241. The number of dispensaries rose from 105 to 110 during the year, five new dispensaries having been opened. Only one institution was closed, but this was reopened at another place the next day, the transfer having been due to a change of the subdivisional headquarters. The aggregate number of patients treated during 1899 was 818,039, of whom 34,749 were in-patients. The corresponding figures for 1898 were 799,521 and 34,091. Of the in-patients 25,591, or about 74 per cent. were cured and 2,611 or 8 per cent. died. The corresponding figures for the two previous triennial periods were 74 per cent. cured and 6 per cent. died in 1893 to 1895, and 73 per cent. cured and 7 per cent. died in 1896 to 1898.

The number of women treated during the year was 20 less than in the previous year. The number of children treated shows a greater proportionate increase than the number of men. The decline in the number of female patients was probably due to the lack of separate accommodation provided for them and to the want of consideration shown to them by examining them in more or less public places. The number of Burmans treated decreased by nearly 3,000; all other classes show an increase.

The number of beds has increased from 2,515 in 1898 to 2,597 in 1899; of these 56 per cent. were occupied daily on an average. Yandoon again experienced the need for more accommodation.

Principal diseases.

242. There was slight decrease in the number of malarial fevers, and a large decrease in the number of eye-diseases. There were 1,800 cases of small-pox treated as compared with 651 in 1898: the serious epidemic which visited Rangoon and the surrounding delta districts at the end of 1898 and during the beginning of 1899 is responsible for this increase. It is hoped that the passing of the Burma Vaccination Law Amendment Act will tend to check the ravages of this disease. Cases of leprosy rose from 176 to 218, and cholera from 342 to 581. Beri-beri was responsible for a number of cases. Captain Barry contributed an interesting report on this little-understood disease. The ratio of deaths to the total number of cases treated in the Rangoon General Hospital during a period of three years has been just under 50 per cent. Out of 944 cases treated, 769 were Hindus, 102 Mahomedans, 54 Burmans, and 19 belonged to other classes.

There was an increase in the number of surgical operations performed as compared with the previous year, and a slightly larger ratio of successes.

Financial.

243. There was a considerable increase both in the total income and expenditure of dispensaries during 1899 as compared with 1898. Almost every head of income shows an increase, notably the contributions from Government as "Special allowance" and from "Municipal funds." Expenditure increased in every direction, except in the purchase of European medicines, the diminution under this head being attributed to greater economy and more careful check over their use. There has been a decline in the amount of dispensary investments: the system was only begun in 1898. The percentage of the total cost borne by Government rose from 18·86 to 20·21. The amount collected by subscriptions was expended rather more liberally than in the previous year.

The average total cost per head at 11 of the largest dispensaries in this province, varied from Rs. 2-7-5 at Rangoon to annas 3-8 at Pyinmana. The average cost of 9 institutions in Madras, is Rs. 1-11-9, but among the latter have been included hospitals of a special kind, for lepers for instance, the cost of which is high and has materially raised the average.

Railway dispensaries.

244. Mogaung dispensary was closed during the year, the total number of railway dispensaries at the end of the year being 14. The number of in-patients fell from 201 to 31: of the former number, however, Mogaung dispensary in 1898 was responsible for 179: excluding this the figures show a slight increase. The total number of out-patients treated during 1899 was 28,968 as compared with 30,587 in 1898, 2,434, of which, however, belonged to Mogaung. The average daily attendance fell from 167 to 139. The total expenditure rose from Rs. 16,986 to Rs. 25,549: this increase is apparently due in part to more accurate classification of accounts.

Police hospitals.

245. The number of police hospitals remained the same as in 1898, though changes in the distribution of the force necessitated the temporary opening and closing of several dispensaries during the year. The number of admissions rose from 15,555 to 16,273, while the death-rate rose from 10·84 to 17·42. These unsatisfactory figures are probably due to the detention of battalions for too long a period in unhealthy stations as well as to defective housing. There were 71 deaths from cholera, 10 of which occurred in the Toungoo battalion, and 56 in the Karen battalion at Mônywa. In the Ruby Mines district the admissions per mille of strength were 2,545·56 and the death-rate 45·56 per mille. The Upper Chindwin came next in point of unhealthiness.

Sanitation.

Sanitation.

246. No sanitary work of importance was undertaken during the year, but several preliminary surveys and experiments were carried out with a view to arriving at a decision regarding the kind of scheme most suitable for adoption in various towns. Much still remains to be done in even the larger towns to procure a good water-supply, to organize a thorough system of drainage, and to place the arrangements for the removal of night-soil and general conservancy on a satisfactory footing.

Schemes for improving the water-supply of Bassein, Moulmein, Prome, and Mandalay have been drawn up and approved, but unless the money required for the carrying out of the schemes can be raised by loan, it is to be feared that the schemes must for the present remain in abeyance. Some progress was made in the examination of the schemes proposed for the improvement of the Rangoon water-supply, and the Municipal Committee are at present engaged in considering the reports of the officers who have examined the schemes, with a view to arriving at a final decision on the matter.

Two isolated cases of plague were removed from vessels arriving in Rangoon, but fortunately the province has so far escaped a visitation of plague in epidemic form. This result is especially satisfactory in view of the special danger of infection caused by the large number of coolie immigrants, and must be attributed in no small measure to the system of medical inspection of vessels arriving from infected ports which has been introduced in accordance with the provisions of the Venice Sanitary Convention and was in force throughout the year. All passengers are examined on arrival by the Medical Officer and are subjected to surveillance for a period of 10 days. Any persons who cannot give a satisfactory account of their destination are detained under surveillance in the Plague Segregation Camp. Some changes in the rules have recently been introduced with a view to rendering the system of inspection more efficient.

Vaccination.

General results.

247. There was a slight increase in the number of vaccinators employed, and an almost proportionate increase in the number of persons vaccinated, which has risen from 466,308 to 496,887. The increase in the number of re-vaccinations was comparatively greater than the rise in the total of primary vaccinations. In Mandalay district the total number of re-vaccinations rose from 1,627 in the previous year to 8,508 in the year under review, the number of primary vaccinations declining from 17,466 to 15,780, while Henzada, Amherst, Tavoy, and the Ruby Mines also showed an

increase under this head out of all proportion to the rise in the number of primary vaccinations. Fourteen native supervisors were employed as against 12 in the previous year.

There was some advance in the degree of protection afforded, but until greater accuracy is secured in the returns, it is unsafe to attempt to form conclusions.

Comparative results by districts.

248. The average number of persons vaccinated by each vaccinator varied from 1,024 in Myitkyina to 5,109 in Sandoway. The figures for the latter district were unreliable. The percentage of successful primary vaccinations was highest in Minbu (98·76), and Rangoon (98·64), and lowest in the Shan States (62·30 and 74·90), and in Myitkyina (77·83). With the exception of the Shan States, Akyab showed the smallest number of persons successfully vaccinated per mille of population.

Dispensary vaccinations.

249. The number of primary operations decreased from 8,209 to 6,033, and the number of re-vaccinations rose from 6,140 to 6,594. The percentage of successful primary vaccinations was considerably lower than the average for the whole province: in Mogaung it was as low as 44·71. The percentage of successful re-vaccinations, on the other hand, was abnormally high.

Vaccination in the Shan States.

250. The total number of persons vaccinated in the Shan States rose from 6,725 to 8,262; the number of vaccinators increased from 5 to 6 and their average number of operations slightly increased. The results, however, were not so satisfactory, as the percentage of successful operations fell from 84·89 to 68·93. No re-vaccinations were performed. Inspection revealed that many of the returns sent in by the vaccinators were falsified.

Vaccination in Rangoon.

251. The number of primary vaccinations in the Rangoon Municipality again decreased from 5,516 to 2,457, while re-vaccinations fell from 4,938 to 2,899. The average number of operations performed by each vaccinator was only 1,309; in the previous year it was 2,366. Out of a total of 3,164 births registered, only 1,119 children under one year of age were successfully vaccinated.

Verification of results.

252. There was again a decrease in the number of cases verified by native Superintendents. In Lower Burma there were 11 native Superintendents and in Upper Burma only three. One man cannot successfully supervise the staff of vaccinators for two or more districts, with the result that many operators escape almost wholly from inspection. The consequences are obvious. In Sandoway and Tavoy, for example, which claim to have successfully vaccinated a larger number of persons per 1,000 than any other district, the total number of cases verified by native Superintendents was 88 and 1,198 respectively, or ·56 and 4·85 respectively of the total number of vaccinations performed. In Amherst the native Superintendents inspected 11,568 cases; in Myaungmya, which has long been unfavourably known for its backwardness in vaccination, the total of cases inspected amounted to 214.

The inspection work of Civil Surgeons was more thoroughly carried out than in the previous year. In the majority of cases the percentage of successful cases discovered by their inspections was smaller than the number discovered by the native Superintendents, from which it would appear that the latter are not absolutely reliable in their figures. For example, the percentages of successes discovered by the Civil Surgeon and the native Superintendent in Hanthawaddy are 59·01 and 92·11 respectively.

Financial.

253. There was an increase in the total cost of the department of Rs. 4,008-3-0 as compared with the previous year. The appointment of two more native Superintendents and nine more vaccinators is chiefly responsible for this. Rather more than half the expenditure was borne by Local Funds; the balance Government and Municipalities contributed in about the same ratio as in the preceding year, the figures being 22·31 and 25·52 respectively.

The average cost of each successful case in the districts outside of Municipal towns varied from one anna in Sandoway and Tavoy to seven annas and one

pie in Myitkyina and eight annas and nine pies in the Southern Shan States. In the majority of cases there was a slight decrease in cost. The cost of each successful case varied from Rs. 1-1-4 in Rangoon to anna 1-2 in Myanaung.

General remarks.

254. During the year the Burma Vaccination Law Amendment Act was passed. This Act, which is the outcome of a long discussion, gives power to Superintendents of Vaccination in Rangoon Municipality, and in other Municipalities to which the Act may be extended, to require an unprotected person to be vaccinated, and provides moreover for the compulsory vaccination of inmates of lodging-houses or cooly-barracks.

VII.—INSTRUCTION.

Education.

255. An examination of the figures shows that during the last five years primary education has been nearly stationary. There seems reason to believe that the claims of primary education have in the past been not sufficiently considered, and that an undue proportion of the total expenditure from Provincial Funds has been devoted to the higher branches of education to the detriment of primary education. The question will be fully considered by the Lieutenant-Governor in consultation with the Director. On the other hand, the quality of the education in the primary schools appears to be good.

The necessity for co-operation between Educational and Administrative Officers has been repeatedly insisted on. It is understood that the instructions issued on this point are generally observed.

The conferences of managers and teachers and other persons interested in education, which have been held under the personal direction of the Director of Public Instruction, have proved a valuable agency in spreading and improving education.

Teachers' Associations continue to do good work.

General results.

256. The total number of schools in the province has risen from 16,331 to 17,050, and the number of pupils under instruction from 270,257 to 287,987; but if private elementary schools are excluded, the result is less satisfactory. It is then seen that the number of institutions on the register has decreased by 204. Primary schools, Vernacular and Anglo-Vernacular, show a decrease of 233. This was chiefly due to a large transference in Upper Burma of public unaided schools to the private list. These are all monastic schools with a very small attendance of pupils. The total attendance of all public primary schools increased by 5,191. The number of schools for girls remained nearly stationary, but there was a substantial increase in the number of pupils. There was again a satisfactory improvement in the number of pupils of Middle Vernacular schools. The number of these schools rose from 211 to 235. Collegiate students, High school pupils, and Middle English scholars remained nearly stationary.

Financial.

257. The total expenditure on education rose from Rs. 14,54,433 to Rs. 16,07,948, the nett Government expenditure being Rs. 10,83,851 as compared with Rs. 9,68,680 in the previous year. The burden of the increase was shared as follows: Provincial Revenues Rs. 50,649, Municipal Funds Rs. 29,259, other Local Funds Rs. 35,263. The increase in the expenditure from Provincial Revenues was due to increased earnings in grants in both secondary and primary schools.

Buildings.

258. Buildings show an increase of Rs. 56,628, made up partly of building grants made by the Education Department, and partly expenditure incurred by the Public Works Department. An Engineering school-building was purchased at Insein.

Educational Syndicate.

259. The Educational Syndicate held one general meeting in March 1900. The Executive Committee met on nine occasions.

The Rangoon College remained under the control of the Syndicate during the year. The question whether the management of the College should remain with the Syndicate or should be transferred to the control of Government has not yet been finally decided. The Bernard Free Library is also under their charge. This institution was visited by 2,447 persons as against an average of 2,330 per annum during the previous six years.

Besides the control of these institutions and the conduct of examinations, the Executive Committee advised on various matters referred to them by the Local Government for opinion. The General Fund of the Educational Syndicate shows for 1899-1900 receipts, Rs. 34,758-14-0, and expenditure, Rs. 29,263-8-4. In both the College and School Funds also the receipts were in excess of the estimates, and expenditure was well within the amounts allotted for the purpose.

School and college fees (including boarding and hostel fees) amounted to Rs. 43,607-6-0. The increase in the amount received from fees during the last eight years was entirely due to the increase in the number of students, and no change had hitherto been made in the rate of fee, which had remained at Rs. 60 per annum, as originally fixed in 1883. The proportion which the fees bear to total expenditure was very low, while the fees themselves appeared to be fixed on a lower scale than in any other province in India. The Lieutenant-Governor, while aware of the importance of refraining from any measure which may tend to act adversely on the growth of University education in this province, considered that the fee might be considerably enhanced without materially affecting the numbers in the college, and accordingly decided to raise the fee to Rs. 7 and Rs. 9 per mensem for F. A. and B. A. classes respectively. It is hoped that the co-operation of the managers of the Baptist College in this measure may be obtained.

University education.

260. Burma has as yet no University of its own. There are two colleges, the Rangoon College and the Baptist College. The Rangoon College is affiliated to the Calcutta University up to the B. A. standard, while the Baptist College is affiliated up to the F. A. standard.

The attendance of students at both institutions shows a decrease as compared with the previous year. Of ten students who went up from the Rangoon College for the B. A. Examination of the Calcutta University, two only passed in the Pass course. Of 53 candidates for the F. A. Examination, 22 passed, all but three in the third division.

The Baptist College is an institution of a few years' growth, and is still in its infancy. The Lieutenant-Governor has recently sanctioned a building grant for the extension of the college premises.

Secondary education.

261. There was a substantial increase in the number of secondary boys' schools, and in the number of pupils. The number of pupils attending girls' schools remained almost the same as in the previous year. The examination results showed some improvement. The number of candidates for the Entrance Examination rose from 167 to 185, and the passes from 95 to 111.

The Baptist College did not repeat its success of the previous year. The Collegiate School showed some improvement. The best results in the Entrance examination were attained by the Akyab Municipal High School, from which nine candidates were presented for examination, and all passed.

In the Seventh and Eighth Standards the number of passes rose from 367 to 510 and from 158 to 170 respectively.

The number of Middle Vernacular schools increased from 211 to 235 during the year. Seven hundred and ninety-three pupils in these schools were successful in the Fifth, Sixth, and Seventh Standard examinations, as compared with 632 in 1898-99.

Primary education.

262. The number of pupils attending Primary schools, including pupils in the Primary Departments of Middle and High schools, increased from 136,751 to 143,780. There was a more than corresponding improvement in the number that were successful in the Upper Primary and Lower Primary examinations. Passes from Government and Municipal Anglo-Vernacular Primary schools increased but slightly, but there was a substantial increase of 7,216 in the number of passes from Indigenous Vernacular schools. Some progress was reported from most districts except Moulmein. Indigenous schools, other than Burmese, showed a slight improvement in the number of pupils, and in the results of their examinations.

Special instruction.

263. One new Normal school for teachers was opened and the aggregate number of students increased by 44. The results of the Final Teachers' test showed some slight improve-

ment as compared with the previous year. The attendance at the Government school at Moulmein improved.

The number of pupil-teachers employed showed a slight increase. The number of passes obtained, however, decreased. Twenty Vernacular pupil-teachers who have completed three years of work as pupil teachers and have passed the secondary grade test, are selected each year for a year's training at the Government Normal School at Moulmein.

The American Baptist Mission Technical School at Toungoo showed little progress. Weaving and lace-making were taught in a few girls' schools, but the results attained were insignificant. There was an increase in attendance at Kindergarten and Slöjd classes. The works is said to be improving. The results of the Teachers' examination in drawing were satisfactory. Sanction was given to the re-opening of the Law Classes, which were closed in 1898.* The attendance at the Engineering school continued to increase. At the final examination out of seven candidates six were successful.

At the Dufferin Hospital 15 pupils completed their course of training in sick nursing and midwifery and passed the required examinations.

Female education.

264. The attendance of female pupils showed an increase of 4,407. The number of girls who were successful in the various examinations, except those of the two lowest grades, was almost the same as in the previous year.

Female education is specially fostered in Burma by the payment of enhanced rates for girls under the grant-in-aid rules. It must, however, be admitted that female education in the province has made little progress during the past few years.

Education of special classes.

265. The number of schools attended by European pupils only remained the same as in the previous year, and there was almost no change in the attendance of pupils. The examination results showed some improvement.

The state of Mahommedan and Tamil schools is not encouraging. The number of pupils at Chin and Kachin schools is very small, and does not appear to be increasing.

Karen schools showed an increase of 38, and Karen pupils an increase of 888. Education is spreading among the non-Christian Karens. They have now 137 schools, with over 1,000 pupils. The examination results, however, showed but a small percentage of passes in the various standards.

General.

266. The Text-Book Committee continued to do useful work in selecting and preparing good vernacular text-books. Under the orders of the Government of India the Committee will in future concern itself with text-books generally, and not exclusively with those in the vernacular.

Literature and the Press.

267. One hundred and nineteen publications were registered under Act XXV of 1867 as compared with 103 in the previous year. Of these, 90 were original, 25 were re-publications, and four were translations. Fourteen of the books registered during the year under report were intended for educational purposes. Of the remaining 105 non-educational works, one was classified under the head "Biography," eleven under "Drama," one under "Fiction," one under "History," sixteen under "Language," one under "Law," two under "Medicine," six under "Miscellaneous," one under "Poetry," seventy-one under "Religion," and eight under "Science." Of the 119 publications included in the statement, five were published in English, three in English and Burmese, forty-three in Burmese, fifty-eight in Pali-Burmese, two in Tamil, one in Talaing, two in Kachin, two in Shan, one in Pwo-Karen, one in Sgau-Karen, and one in English and Sgau-Karen. Of the 998 books published during the year, 71 come under the head "Religion" and 11 under "Drama" based on Buddhist literature.

Arts and Sciences.

268. *Nil.*

VIII.—ARCHÆOLOGY.

269. The appointment of Government Archæologist was held throughout the year by Mr. Taw Sein Ko, who also officiated as Adviser on Chinese Affairs.

During the year, the attention of the Archæological Department was mainly devoted to the conservation of ancient monuments of historical or antiquarian interest. The sum of Rs. 5,000 was allotted for the purpose in the budget of the Public Works Department, and steps were taken for the preservation, against vandalism, of the pagodas and other antiquarian remains at Pagan. It has been proposed that 127 pagodas of that township should be conserved by State agency, that these buildings should be divided into eight groups, and that ten care-takers, costing Rs. 83 per mensem, should be entertained to look after them and inspect them at regular intervals. There is not much probability that the temples of Pagan will be despoiled of its frescoes or other objects of art by the natives of the country, as there is no market for such sacrilegious spoils in the province itself. The risk of spoliation lies in the visits of European adventurers, who know that any object of antiquarian interest, they may purloin, will find eager purchasers at Berlin, Paris, Vienna, or St. Petersburgh. While proposals have been made for the custody of the Pagan temples, the Public Works Department has been asked to construct masonry sheds for the storage of inscriptions at Pagan, Sagaing, and Tagaung. Some of the inscriptions, on account of their great size and weight, will be preserved *in situ*, while the majority of them will be removed to the central sheds.

In April last, permission was granted to Mr. R. C. J. Swinhoe, Solicitor, Mandalay, and Major Nichols, R.A.M.C., to make excavations at Tagaung in search of inscriptions. A mound in the neighbourhood of the Shwezigôn pagoda was opened, and a stone inscription broken in three pieces was found. The largest piece is used as a cover to a relic-chamber, which is intact, and the inscription bears date 1354 A.D. It was set up by Thadominbya, the founder of Ava, when he was Governor of Tagaung. In the relic-chamber the following articles were found:—

Eighteen small images of Buddha, one of crystal and the rest of brass, together with a quantity of relics, consisting mainly of small pieces of "calcareous gravel and sheep's teeth."

One small polished jade-stone.
One round crystal bead.
One smaller crystal bead.
Three moonstones.
One amber *nadaung*.
One flat moss agate.
Eight pearls.
Six amber beads.
Ninety-three stones consisting of rubies, spinels, &c.
Five small pieces of malachite.
Six small sapphires.
Three greenish crystals.
Small bits of rubies, &c.
Three small rings.
One small brass dish.
One needle.
One small white China basin.
One green stone.
Two gold beads.
Two small silver dishes.

A number of votive tablets of baked clay with Sanskrit legends were also found.

The find is an important one from a historical point of view, as it indicates the ascendancy of Chinese influence at the period of building the pagoda, which is certainly subsequent to 1354 A.D. The "round crystal bead" is the Chinese button worn on the cap and is the insignia of official rank. The "small white China basin" is of exquisite crockery, and is probably the product of the famous kilns of Kwei-lin in the province of Kwei-chou.

A branch office was opened at Pagan in January last, with a view to collecting materials for a detailed archæological survey. It was engaged upon the following work:—

(1) The preparation of a map of Pagan showing the locality of the existing pagodas.
(2) The preparation of another map of Pagan showing the locality of 127 pagodas, which are to be placed in the custody of care-takers paid by Government.
(3) The compilation of a register of the above buildings and of the articles of antiquarian interest contained in each, requiring special care and attention.
(4) Researches into the origin of serpent-worship and *nat*-worship in pre-Buddhistic times.
(5) An enquiry into the introduction of a debased form of Northern Buddhism and its struggle for supremacy with the form of Southern Buddhism introduced into Thatôn from Ceylon.
(6) An investigation into the origin of the different shapes and forms of pagodas.
(7) The preparation of a list of pagodas in chronological order.
(8) The preparation of plans, measurements, and drawings of the celebrated pagodas of Pagan.
(9) The compilation of a history of Pagan in the light of modern research with special reference to the change of capitals.
(10) The preparation of copies of the frescoes in the temples by means of photography or by tracing on oil-cloth or tissue paper.
(11) The copying of such manuscripts as are of use to the Archæological Department.
(12) The drawing up of a list of mounds and pagodas in ruins, which should be excavated.

The main office at Rangoon was engaged upon the following work:—

(1) The compilation of an Index Inscriptionum Birmanicarum, of which Volume I has been published.
(2) The translation and annotation of the two volumes of the Arakan Pagoda Inscriptions.
(3) The compilation of palœographical tables illustrating the evolution of the Burmese alphabet.

Under the orders of the Local Government, the Archæological Department is preparing a list of the buildings, tombs, monuments, &c., in Burma, of archæological and historical interest, which, it is considered, should be conserved by Government. As the question of conservation of these buildings, which exist not only at Pagan, but also at Ava, Sagaing, Mandalay, Tagaung, Prome, Pegu, Toungoo, Thatôn, Moulmein, and in many parts of Arakan, comprises (*a*) custody, (*b*) preservation, (*c*) restoration, and (*d*) illustration, it has been proposed that a selected officer of the Public Works Department should be appointed Inspector of Ancient Monuments in order to assist the Government Archæologist in the general supervision and guardianship of the many historic remains existing all over the province.

Definite proposals have been made by the Committee appointed to consider the question of establishing a Provincial Museum. Itis estimated that the cost of constructing the building on the model of the Lahore Museum will be about $5\frac{1}{2}$ lakhs of rupees. A valuable piece of land situated between the

Agri-Horticultural Society's Gardens and Godwin road has been acquired by Government under the Land Acquisition Act of 1894, the amount of compensation paid being Rs. 1,14,443-12-0. To this amount will have to be added a further sum which will have to be given as compensation to the Trustees of the land granted to the Agri-Horticultural Society, for giving up to Government for the erection of the Museum the portion of the garden land stretching from the newly acquired land in Godwin road eastward to a point opposite Latter street. The land at the disposal of the Committee for the erection of the Provincial Museum is thus bounded on the north by Commissioner's road, on the east by a projection of Latter street to Commissioner's road, on the south by the canal, and on the west by Godwin road. The building will face north, and the Phayre statue will be removed from its present position and placed in front of it. It has been suggested that a bridge should be thrown over the canal in continuation of Latter street, that the canal itself should be turned into an ornamental sheet of water, and that seats should be provided on its banks for the use of the public.

It has been proposed that the Bernard Free Library should be amalgamated with the Provincial Museum, and that the latter should consist of the following departments:—

(*a*) Archæology;
(*b*) Art;
(*c*) Economic products;
(*d*) Natural history; and
(*e*) Library.

The management of the Museum will be vested in a Committee, and each of the departments will be supervised by a member of that Committee. The Government Archæologist will be placed in charge of the first department, and he will be appointed Curator of the Museum as well as Secretary to the Museum Committee.

LIBRARY OF THE BOMBAY BRANCH OF THE ROYAL ASIATIC SOCIETY

IX.—MISCELLANEOUS.

Ecclesiastical.

270. The work in connection with the construction of the Memorial Church at Mandalay has been suspended by the orders of the Government of India, and the plans have been sent to the architect for modification.

Another church is being built at Mandalay in order to supply the needs of the town congregation. The entire cost of its erection will be defrayed by voluntary contributions.

During the past year a pretty little church has been opened at Sagaing.

Steps have also been taken with a view to the erection of churches at Myingyan, Minbu, and Mergui.

In the case of the first two named churches a moiety of the cost of construction has already been raised by private subscriptions.

During the past year one Chaplain has gone on furlough completing with those already on leave the full number of absentees allowable. Of the Additional Clergy Society Chaplains one was invalided home, and three have arrived during the year. The Additional Clergy Society's Chaplains receive grants-in-aid from the Government and two S. P. G. Missionaries have also received such grants during the past year for ministering to English congregations. Notwithstanding that out-stations have to be visited by each Chaplain, there are numerous small communities of Europeans scattered about to whom with the existing staff it is impossible to minister.

Stationery.

271. As in previous years the stationery required for Government use was procured from the Superintendent of Stationery, Calcutta, at a cost of Rs. 2,98,481, which, compared with Rs. 2,20,977 in 1898-99, shows an increase of Rs. 77,504. Of this increase the Printing Department (mainly owing to having worked up arrears from 1898) was responsible for Rs. 64,936, and other Government Departments for Rs. 12,568. With the exception of paper of high grades, of which comparatively small supplies are needed, the paper used is of Indian manufacture. These papers are improving in finish and quality, and are well suited to all ordinary official purposes.

PART III.

BURMA STATISTICAL RETURNS.

II.—STATISTICS OF PROTECTION.

(A) LEGISLATIVE.

[No. 13.] *1.—Statement of Acts passed by the Legislature of Burma in the year 1899 and duly assented to as required by law.*

No., year, and title of Act.	By whom introduced.	Object and character of Act.	Date of assent.
I of 1899.			
The Burma Gambling Act	The Hon'ble Mr. Symes, C.I.E.	The object of the Act was to consolidate the provisions of the Gambling Act, 1867, and the Burma Gaming Act, 1884, and to more clearly declare the law in two important respects where divergent constructions had been adopted by the Courts of Upper and Lower Burma. The provisions enabling Magistrates to demand security from *ti* gamblers were also extended to all kinds of unlawful gaming, and several minor alterations of the law were also adopted.	Lieutenant-Governor's assent 16th March 1899. Governor-General's assent 1st April 1899.
II of 1899.			
The Burma Ferries Act Amendment Act.	The Hon'ble Mr. Bridges.	The object of the Act was to expressly provide that compensation assessed and recovered for an injury to a public ferry under section 30 of the Act should, instead of becoming part of the public revenue, be credited to local funds or awarded by the Magistrate to the lessee of the ferry under a power given in that behalf.	Lieutenant-Governor's assent 23rd March 1899. Governor-General's assent 10th April 1899.
III of 1899.			
The Burma Military Police Act, 1887, Amendment Act.	The Hon'ble Mr. Symes, C.I.E.	The object of the Act was to adopt certain more suitable designations of rank by substituting terms which had come into use for terms which had fallen out of use, and in certain directions to obtain increased powers for the maintenance of discipline by empowering the Senior Native Officer temporarily in command at the headquarters of a Battalion to award minor punishments to men of the class of sepoy during the absence of the Commandant, Adjutant, and Assistant Commandant. The minor punishments allowed under section 9 of the Act were also made similar to those allowed in the Native Army, and power was taken to invest Adjutants and Assistant Commandants with the powers of a Magistrate in respect of offences committed by Military Police Officers.	Lieutenant-Governor's assent 19th March 1899. Governor-General's assent 12th April 1899.
IV of 1899.			
The Rangoon Police Act	The Hon'ble Mr. Symes, C.I.E.	The object of the Act was to constitute a separate police force for Rangoon Town under a Commissioner of Police invested with the more important powers held by the Commissioner of Police in Calcutta, and to assimilate, as far as practicable, the organization and working of the force to that of a Presidency Town. The Act also contained provisions similar to those in force in Presidency Towns against thieves and vagabonds, and for the punishment of street offences, and authorizing the arrest by private persons for certain offences until the name and address of the prisoner are ascertained and similar provisions considered necessary for the prevention of offences and maintenance of order in a large seaport town.	Lieutenant-Governor's assent 27th March 1899. Governor-General's assent 13th April 1899.

[No. 14.] *2.—Statement of Bills proposed or pending in the Legislature of Burma in the year 1899.*

Nil, except those specified in Statement No. 13.

[No. 15.] *3.—Statement of Draft Bills and Regulations submitted by the Chief Administrative authority of Burma for the consideration of the Legislature of India during the year 1899.*

Title of Bill.	By whom proposed.	Object and character of Bill.	Fate, result or present position of the proposed Bill.
The Lower Burma Courts Bill.	Lieutenant-Governor...	The object of the Bill was to provide for the establishment of a Chief Court for Lower Burma, and the transfer to that Court of the jurisdiction and powers of the former Courts of the Recorder of Rangoon, the Judicial Commissioner, Lower Burma, and of the Special Court. The Bill repealed the Lower Burma Courts Act, 1889, and adopted the nomenclature of the Subordinate	Passed into law as Act VI of 1900.

[No. 15.] *3.—Statement of Draft Bills and Regulations submitted by the Chief Administrative authority of Burma for the consideration of the Legislature of India during the year 1899*—concluded.

Title of Bill.	By whom proposed.	Object and character of Bill.	Fate, resu or present position of the proposed Bill.
		Courts of the Upper Burma Civil Courts Regulation, 1896. It also altered the law as to appeals by providing that appeals from Subdivisional Courts should lie to Divisional Courts, that the period of limitation for appeals to the latter Court be 60 days, and that appeals above Rs. 5,000 in value from District Courts should lie to the Chief Court. It also authorized the Local Government to provide by notification that all appeals from specified Courts should lie to the Chief Court, and amongst other alterations of the law as to second appeals, abolished second appeals in small causes and in certain unclassed suits.	
A Regulation to further amend the Upper Burma Towns Regulation, 1891.	Lieutenant-Governor...	The object of the Regulation was to substitute the word "town" for the word "village" in section 7-A of the Upper Burma Towns Regulation, 1891, as amended by the Burma Laws Act, 1898, and so enable, in accordance with the original intention, the application of the penal provisions of that section to *pwès* in towns.	Passed into law as Regulation II of 1899.

POLICE.

crime for the year 1899.

STATION OR TAKEN UP BY THE POLICE IN THE YEAR 1899.

NOT SENT TO MAGISTRATE (ACCUSED, IF ANY) RELEASED UNDER SECTION 169, CRIMINAL PROCEDURE CODE.					Cases other than those in columns 12 to 16 in which the offender was not detected or apprehended.	Cases still under investigation by the police at the end of the year.	Cases sent before the Magistrate.	Cases pending in Court at beginning of year.	Total of cases before the Courts.	Number ending in discharge or acquittal.	Number ending in conviction.	Percentage of cases ending in conviction to total of columns 22 and 23.	Number declared by Court, after trial, never to have occurred, or to be mistakes of law or fact.	Number in which the Court held, after trial, that a non-cognizable offence only was committed.	Number still under trial at close of the year.	REMARKS.					
In which the Magistrate ordered case to be struck off as false, mistaken or non-cognizable.	In which no such order was passed, but the case was not tried by Magistrate.	*In which Magistrate sent for the accused and tried the case.*														Died.	Escaped.	Lunacy.	Compounded.	Absconded.	Withdrawn.
		Convicted.	Not convicted.	Pending at close of year.

APPENDIX PART III.

RETURNS OF THE TELEGRAPH DEPARTMENT.

[No. 90.] *Statistics of Telegraph lines and offices in the province of Burma for the year 1899-1900.*

LINES.

Mileage of lines.				Mileage of Wires (including cables).			
At end of previous year.	Added during the year.	Deducted during the year.	Remaining at end of year.	At end of previous year.	Added during the year.	Deducted during the year.	Remaining at end of the year.
5,296	...	113*	5,183	12,148	638	...	12,786

* This net decrease is due to the dismantlement of lines Namkhan Junction to Namkhan and Kamaing to Nanyaseik; also to the dismantlement of the road lines from Meiktila to Myingyan and Sagaing to Alôn, the wires of these two latter section having been transferred to the posts along railway alignment.

OFFICES.

Particulars.	Number of Telegraph Offices open at end of previous year.	Add number opened during the year.	Deduct number closed during the year.	Number open at end of the year.	Number of telegrams despatched during the year from Government offices.	Increase over previous year.	Indian share of collections.
							Rs. A. P.
